FIRST BUM BAG - SOLAS 160

SOLAS/M.E.D certified inflatable lifejacket, designed to provide maximum safety for professional and maritime applications. With a minimum actual buoyancy of >160 N and a quick-release buckle fastening system, it can be donned and adjusted within few seconds, ensuring simple, intuitive, and immediate use, even in emergency situations.

Lightweight, ergonomic, and manufactured by high-quality materials, the waist pack design ensures maximum freedom of movement, minimal bulk, and outstanding comfort throughout the working day.

Designed for personnel working on board, it delivers reliable performance even in adverse weather and sea conditions, enhancing safety during routine operations as well as emergency situations.

MAIN CHARACTERISTICS:

- Quick-release side buckle
- Side adjustment straps
- Rescue handle
- Compact design
- Waist pack design

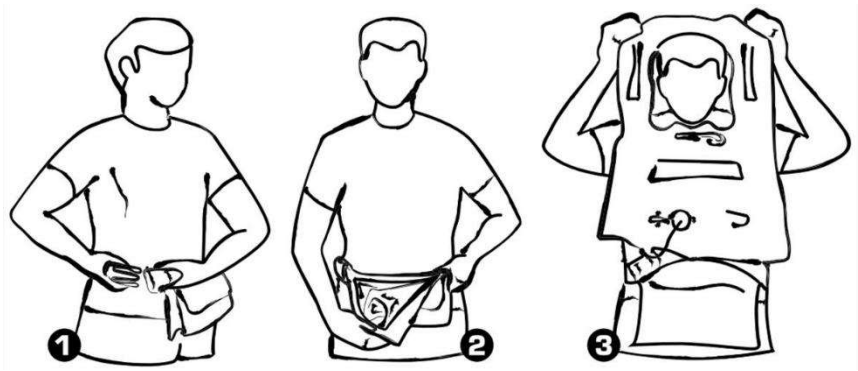
LIFEJACKET MANUFACTURER

CODE	PRODUCT NAME	ACTIVATION	ACTIVATOR
02372	FIRST BUM BAG SOLAS 160	AUTOMATIC - SAA	UML MK5
02372/H	FIRST BUM BAG SOLAS 160	AUTOMATIC- SAA	HAMMAR MA1 EC

Data: 09/07/2026
Rev: 01

FEATURES Codes: 02372 - 02372/H	
Type	Inflatable lifejacket
Activation systems	UML MK5 - Automatic: 02372 HAMMAR MA/EC – Automatic: 02372/H Oral inflation tube fitted as standard on all versions
CO2 gas cylinder	33 g Thread ½" GAS
Real buoyancy	>160 N
Closure system	40 mm webbing with an acetal resin quick-release buckle closure system.
Certification	SOLAS/ M.E.D.
Size	Adult
Supported user weight	>40 kg
Waist circumference	80 – 125 cm
Cover	600D PU-coated polyester fabric, black.
Chamber	420D PU-coated polyamide fabric, yellow.
Product dimension	27 x 15 x 9 cm
Product weight	02372 : 830 gr approx 02372/H : 823 gr approx
Packaging	60 x 40 x 40 cm (24 pcs per box)
Service	Every 12 months
Accessories on demand	Sprayhood
Spare parts	Whistle, Rearming kit, SOLAS/M.E.D. Lifejacket Light
Veleria San Giorgio reserves the right to modify technical specifications without prior notice.	

DONNING INSTRUCTIONS



1 Open the cover

2 Extract the chamber

3 Put on the chamber

SOLAS/ M.E.D. compliant double-compartment buoyancy chamber, made in 420D PU-coated polyamide (PA) fabric with electronically controlled high-frequency welded seams.

Designed to follow the body's natural ergonomics and optimize the wearer's position in the water, it ensures rapid body rotation, keeping the airways clear of the water.

Even when fully inflated, the buoyancy chamber allows the wearer to swim comfortably to a place of safety or quickly board a liferaft.

ACTIVATION SYSTEMS:

The lifejacket integrates two methods of activation systems:

- Automatic activation

In the event of falling overboard, once immersed, the inflation system automatically inflates the buoyancy chamber within 5 seconds.
Automatic activation can be provided by the UML MK5 inflator or equivalent Halkey-Roberts inflator, which use a water-soluble bobbin, or through the HAMMAR MA1/EC activator, based on a hydrostatic activation system.

- Oral inflation

As an emergency or supplementary system, the buoyancy chamber can be inflated through the oral inflation tube, equipped with a non-return valve and protective cap.
Simply blowing into the tube is sufficient to complete or restore the inflation of the chamber.

SPARE PARTS

LED Light code 03030

Automatically activates upon immersion in water. Provides visibility up to 1 nautical mile. SOLAS/ M.E.D. certified and USCG approved.

Microprismatic reflective tape code 367/795

Soft and flexible reflective tape with a sew-on fabric backing, compliant with EN ISO 20471:2013.

Whistle code 25180

Mandatory accessory providing an audible signal. ISO 12402-8 certified.

Rearming kit:
UML MK5: Rearming kit (26233) ,33 g CO_2 cylinder.
HAMMAR MA1/EC: Rearming kit (26233), 33 g CO_2 cylinder.

ID badge holder code 652/PB

Ideal for the secure and professional identification of personnel and visitors.

ACCESSORIES

Sprayhood code 09145/SK

Reduces the risk of secondary drowning caused by the inhalation of sea spray. Improves the visibility and detection of the casualty during rescue operations.

Bumper for Hammar activator code 1278/1

Protective rubber cover for HAMMAR activator.

VELERIA SAN GIORGIO®
LIFEJACKET MANUFACTURER

ESCLUSIVE SAFETY TECNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards. All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

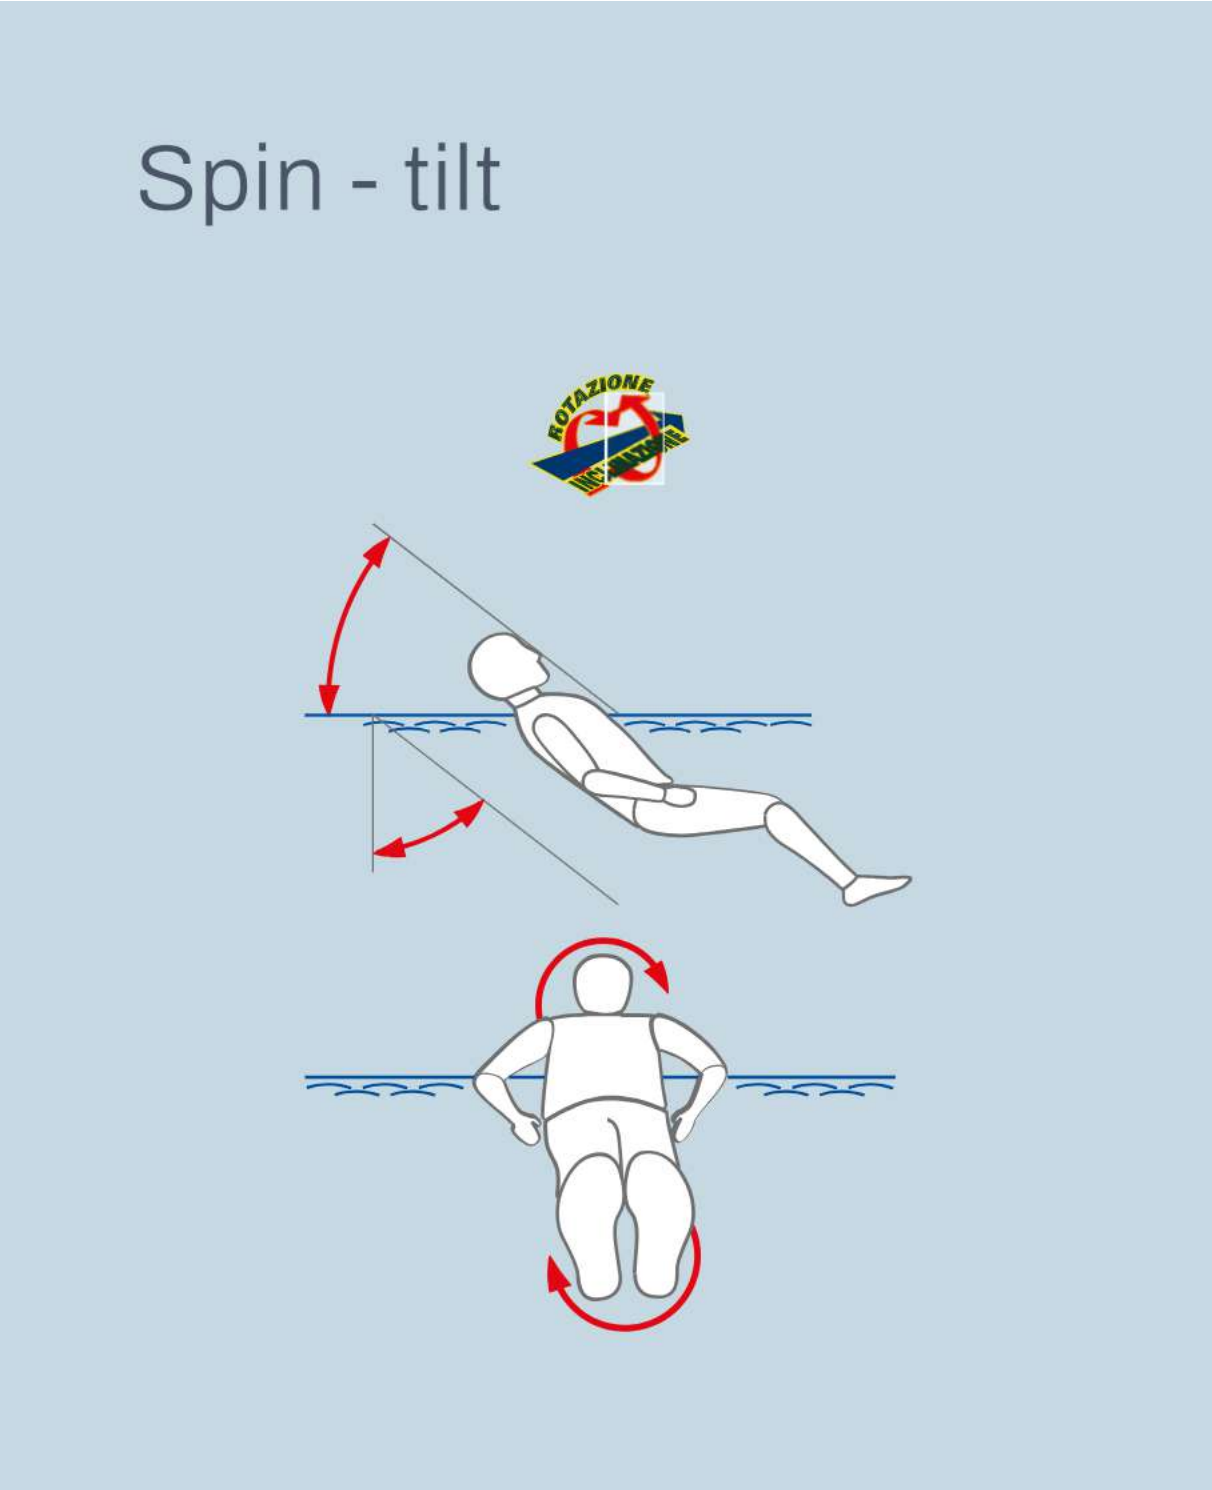
ISO 9001:2015

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision. This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and – most importantly – the highest degree of safety when needed.


Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.
