TURNKEY SOLUTIONS FOR SORTING AND PACKING

SORTING & PACKING SYSTEMS

EXTERNAL & INTERNAL QUALITY SORTING

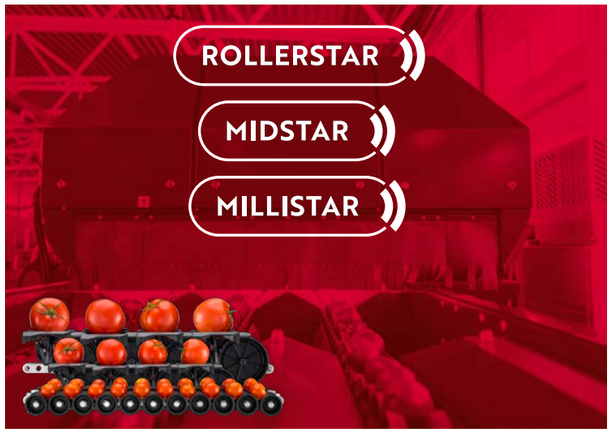
TRACKING & TRACING SOFTWARE

CUPSIZER & PENTACUP

SORTING MACHINE

SORTING

The **Cupsizer and Pentacup** are designed to handle tomatoes at high speed. Thanks to the designed **unique diabolos and cups** our automated singulator can align and rotate your tomatoes **without manual operators**.



ROLLERSTAR, MIDSTAR & MILLISTAR

SORTING MACHINE

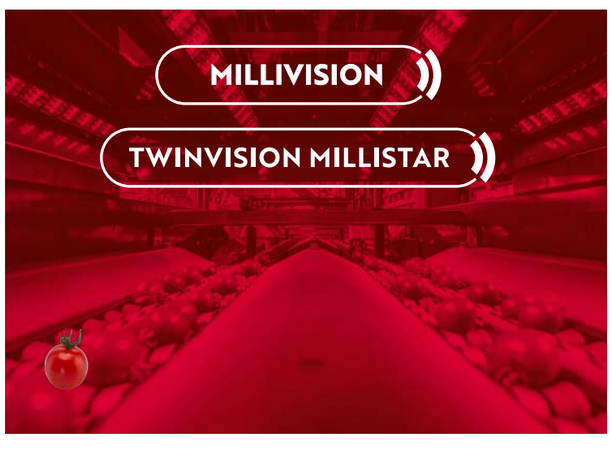
The **Rollerstar, Midstar and Millistar grading machines** are specifically designed for a wide range of product sizes. **The spreading V-belts guarantee a smooth transfer** onto the carrier, and from there the carrier's **mid-positioned rotating axis** ensures a gentle transfer to the brushes and outlet belt.

DUALVISION & ADVANCED VISION

EXTERNAL QUALITY

SENSORS

The **Dualvision** camera system is specifically designed to grade your product by **color and diameter**. The **Advanced Vision** system has the ability to identify and grade defects **based on individual characteristics** instead of solely by color and contrast alone. It allows you to optimize batch quality and to add value by satisfying the needs of different markets.



MILLIVISION & TWINVISION MILLISTAR

EXTERNAL QUALITY

The **Millivision** camera system is designed to grade your product by color and diameter. The **Twinvision Millistar** system has the ability to identify and grade defects based on individual characteristics. **It allows you to optimize batch quality** and to add value by satisfying the needs of different markets.

INSCAN PULSE

INTERNAL QUALITY

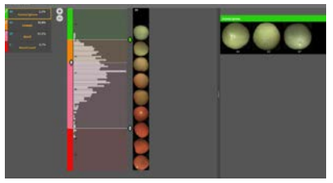
The tomato **Inscan** system non-destructively measures the internal quality of your tomatoes and provides a perfect product to your customers. This allows you to **determine the sugar content for optimum sweetness**, and evaluate the maturity of the tomato.

FLOWMASTER

USER INTERFACE

SOFTWARE

Explore **Flowmaster**, the most flexible and **user-friendly system** on the market! It allows our customers to control their sorting and packing needs in a very simple and efficient way.



· **Empower your operators:** real-time control for optimal sorting.

· **Real-time insights:** stay informed with live updates on product distribution, empowering operators to make informed decisions for optimal sorting outcomes.

· **Instant adjustments:** with Flowmaster, adjustments to quality specifications are immediately visible, ensuring seamless adaptation to changing sorting needs.
