The world's fastest test for detecting
Legionella pneumophila sg1-15

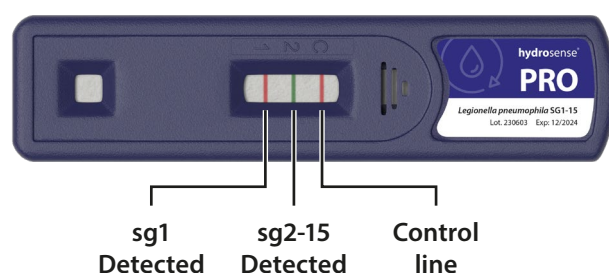

Hydrosense PRO Ultra Legionella Swab Test

Our comprehensive and sensitive Legionella swab test is designed for testing surfaces and biofilm. The process involves collecting a sample through swabbing areas where biofilm accumulates eg. shower heads, taps, storage tanks, pipework and the water edge of pools or hot tubs.

Biofilm is the common habitat for *Legionella pneumophila*. This slimy substance protects the bacterium from heat or chemical treatments.

This method is highly recommended for evaluating surfaces in environments such as cooling towers, water tanks, sinks, showers, hot tubs, misters, sprinklers, air washers, and humidifiers, among others.

RAPID TEST TYPE	LIMIT OF DETECTION	PART NUMBER
PRO Ultra Swab	200 CFU per swabbed area	500502
