

# SEALS

SHIELD & SAIL

*The marine industry has relied on outdated boat protection for too long – until now.*

*SEALS is the first-ever Nano Diamond shielding technology designed specifically for boats. Derived from revolutionary technology used to protect spacecrafts, SEALS products offer unmatched water and oil repellence, UV resistance, and the hardest polymer for extreme durability. Traditional ceramic coatings simply can't compete.*

*Boat owners typically spend up to 25% of their annual costs on maintenance. SEALS drastically reduces those expenses and cuts down daily crew workload with its revolutionary, eco-friendly protection that lasts.*

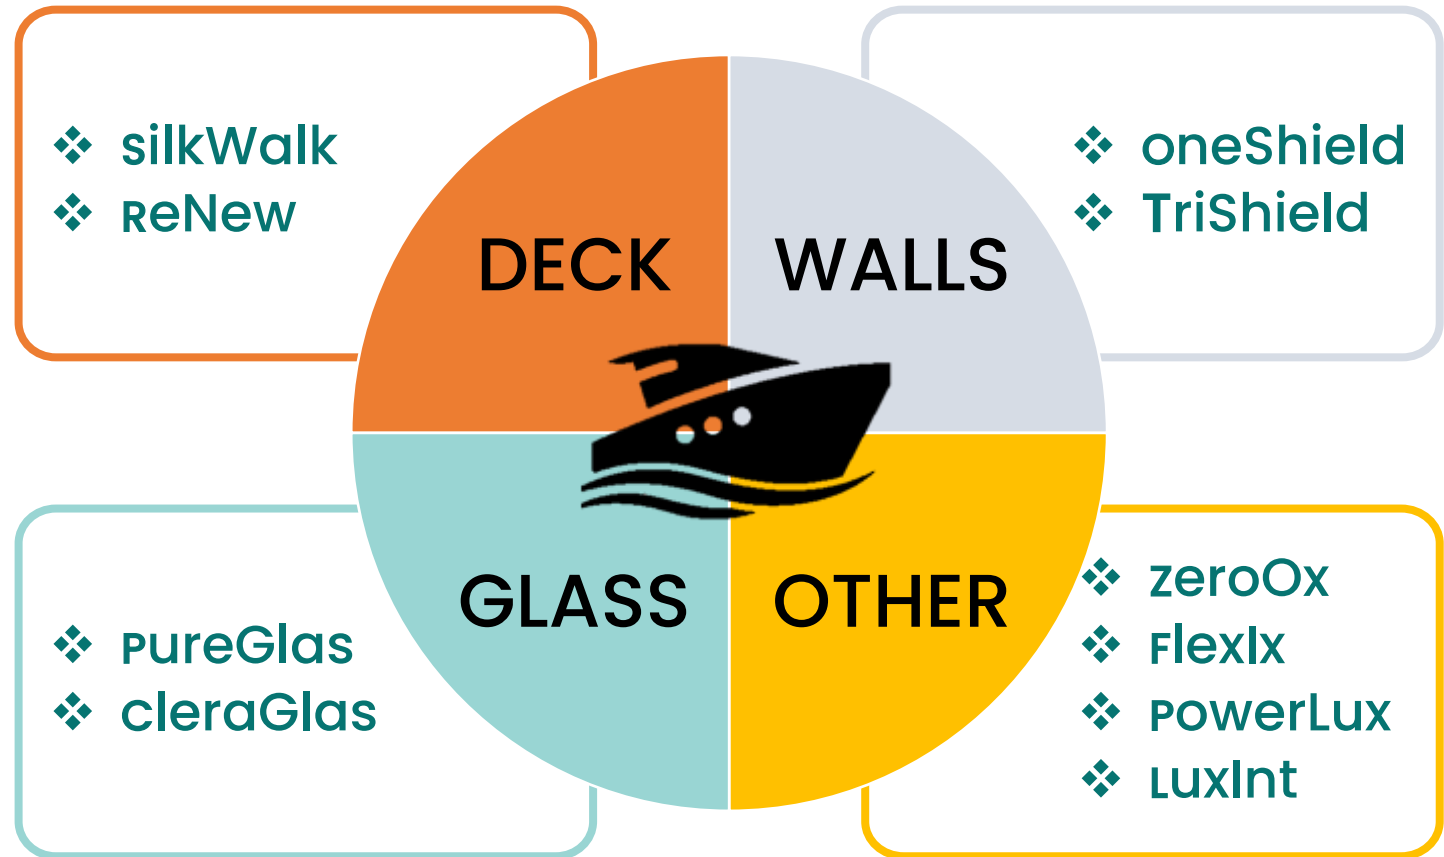

*We've rigorously tested SEALS on many boats, including Lagoon catamarans, Beneteau sailboats, and Sanlorenzo luxury yachts, achieving exceptional results and high satisfaction from owners using SEALS for the first time.*

*Now, we're excited to bring SEALS' groundbreaking technology to a wider audience of sailing enthusiasts, enabling them to experience the future of marine protection.*

# Products

# DECK

## silkWalk

SilkWalk is the ultimate single-application solution for protecting all gelcoat and plexiglass deck surfaces. Its standout features include high hydrophobicity, oleophobicity, and superior resistance to saline environments and UV exposure.

This product delivers a brilliant shine, leaving surfaces silky smooth to the touch while preventing dirt buildup.

It makes cleaning effortless and significantly reduces the time and effort required for routine maintenance, easing the crew's daily workload.

*Available in bottles to treat surfaces of 20, 30, 40, 80 m<sup>2</sup> or larger (on request)*

# DECK

## reNew

ReNew is a product specially designed for simple and effective restoration of all surfaces already treated with SEALS products.

Its formula, perfectly compatible with the whole range of our protective products, prolongs their effects when there is little time for a new application.

Through regular applications, in a few minutes and with simple gestures, new life is given to shiny surfaces and the barrier created by SEALS is restored.

*Available in bottles to treat surfaces of 20, 30, 40, 80 m<sup>2</sup> or larger (on request)*

# WALLS

## TriShield 1,2,3

TriShield is a three-stage professional treatment, applied while the boat is aground, featuring a formula with carbon nanotubes and nanodiamonds.

This treatment provides:

- Significant reduction of surface porosity to nearly zero
- Enhancement of surface resistance by approximately 1000 times (as proven in laboratory tests)
- Effective UVA and UVB protection
- Hydrophobic, saline, and thermal protection, dirt, and vegetation will be easily brushed off or naturally washed away while sailing – no chemical cleaners needed.

*Available in bottles to treat surfaces of 20, 30, 40, 80 m<sup>2</sup> or larger (on request)*

# WALLS

## oneShield

OneShield is a preventive treatment with a single application to be done when the boat is aground.

Its formula contains two innovative elements: carbon nanotubes and nanodiamonds.

The former is the basis for elasticity and the latter for resistance, and combined with UV protection and hydrophobicity, allow the walls to remain shiny when the boat is in the water and add surface resistance against abrasion from fenders, responsible for dulling the gelcoat or paint finish at contact points.

*Available in bottles to treat surfaces of 20, 30, 40 m<sup>2</sup> or larger (on request)*

# GLASS

## PureGlas

PureGlas is a specialized product for glass and ceramic surfaces, featuring a formula with carbon nanotubes and nanodiamonds.

Salt and limestone have finally found their insurmountable enemy: pureGlas.

Its specific formula, specifically designed for these surfaces, prevents dirt from adhering and creating rings, opaque stains, and residual traces of cleaning.

*Available in bottles to treat surfaces of 10, 20, 30, 40, 80 m<sup>2</sup> or larger (on request)*

# GLASS

## cleraGlas

CleraGlas is an exceptional dual-purpose product specifically designed for glass surfaces.

Before applying PureGlas, CleraGlas effectively removes any micro-impurities.

It can also be used periodically to revitalize and maintain the protective properties of the glass surface.

*Available in bottles to treat surfaces of 25 m<sup>2</sup> or larger (on request)*

# STEEL

## zeroOx

With ZeroOx, you can finally say goodbye to one of the most demanding maintenance tasks on your boat: cleaning steel and preventing metal oxidation.

Its advanced formula reduces surface porosity and restores shine by creating a microscopic protective film that prevents salt from adhering and causing oxidation.

Any remaining dirt can then be easily rinsed off, making maintenance effortless.

*Available in bottles to treat surfaces of 10, 20, 30 m<sup>2</sup> or larger (on request)*

# Flexible Surfaces

## Flexix

Flexix is specially formulated for plastic surfaces sensitive to temperature fluctuations, such as tenders, sails, and adhesives, where flexibility, contraction, and expansion are key factors.

It protects these surfaces from salt and UV rays by forming a transparent layer that preserves the original characteristics—without altering the brilliance, brightness, or color.

Flexix creates a durable, impenetrable barrier on delicate surfaces that require extra care.

*Available in bottles to treat surfaces of 5, 10, 20 m<sup>2</sup> or larger (on request)*

# Engines & High Temperature

## PowerLux

PowerLux is specifically developed for surfaces exposed to high operating temperatures.

After cleaning your motor or ceramic/induction hob, applying zeroOx forms a protective barrier against grease, liquids, and cooking residue.

This prevents dirt from adhering, making future cleaning effortless.

*Available in bottles to treat surfaces of 5, 10, 20 m<sup>2</sup> or larger (on request)*

# Interiors

## LuxInt

LuxInt is the perfect solution for all interior surfaces of the boat, including furniture, tables, and leather details.

It offers long-lasting protection for frequently cleaned items.

With LuxInt, cleaning is quicker and easier—simply use a microfiber cloth, no harsh detergents or extra effort is needed.

Easy to apply with a single pass, LuxInt guarantees durable, brilliant protection that lasts.

*Available in bottles to treat surfaces of 20, 30, 40 m<sup>2</sup> or larger (on request)*

# All it takes is just 3 steps

## Prep

Thoroughly clean the surface to ensure it is ready for the application of SEALS products.

## Shield

Apply the product with a single pass and immediately feel the silky finish. You'll be amazed at how effortlessly it glides on, delivering an incredibly smooth touch.

## Sail

That's right, just sail!  
With SEALS, you'll minimize maintenance and cleaning, leaving you with more time to fully enjoy your boat and the pleasure of sailing.

*Clean less ... sail more*
