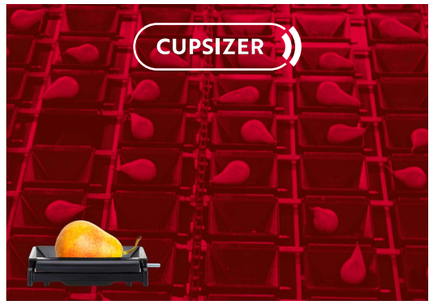
TURNKEY SOLUTIONS FOR SORTING AND PACKING

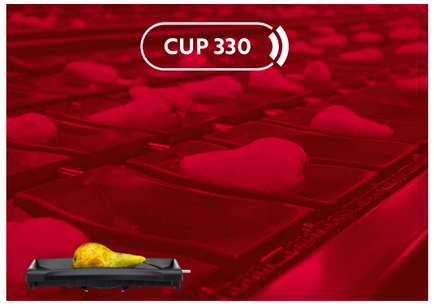
- SORTING & PACKING SYSTEMS
- EXTERNAL & INTERNAL QUALITY SORTING
- TRACKING & TRACING SOFTWARE



CUPSIZER

SORTING MACHINE

The **Cupsizer** is specifically designed to handle your pears. Thanks to the designed **unique brushes and cups** our automated singulator can align and rotate your product **without manual operators**.

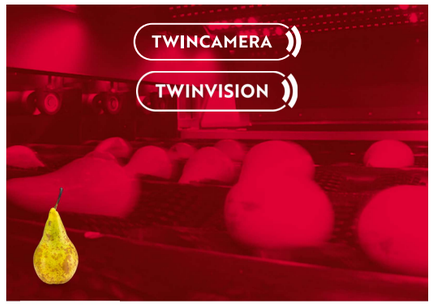


CUP 330

SORTING MACHINE

The **Cup 330** is designed to handle both elongated as well as round pears. Thanks to the designed **unique brushes and extra wide cups** our automated singulator can **align and rotate your pears** without manual operators.

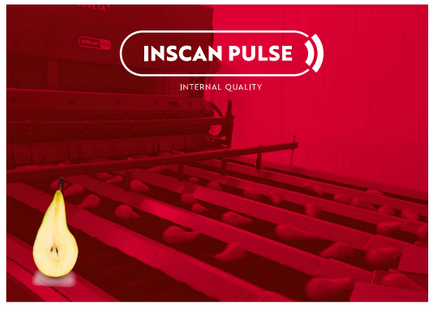
SENSORS



TWINCAMERA & TWINVISION

EXTERNAL QUALITY

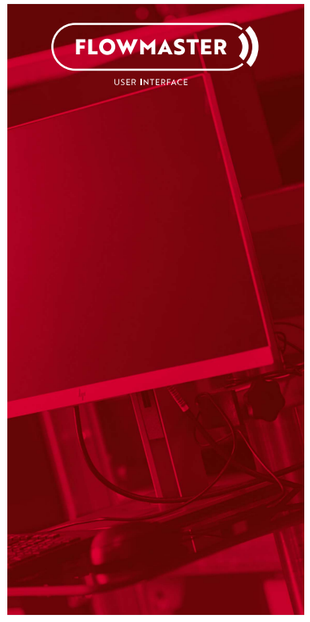
The **Twincamera** system is designed to grade your product by **color and diameter**. The **Twinvision** camera system works with a variety of user defined quality sorting **parameters** allowing each product passing the cameras to be **sorted into a specified category**.



INSCAN PULSE

INTERNAL QUALITY

The pear **Inscan** system has been specifically designed for pears to non-destructively measure their internal quality. This allows you to remove the **internal browning or internal decay** from your batch, providing a perfect product to your customers. Another key benefit is the **Inscan** sensor which measures the sugar content in your pears for **optimum sweetness and client satisfaction**.

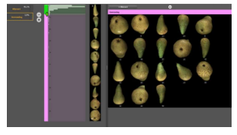


SOFTWARE

FLOWMASTER

USER INTERFACE

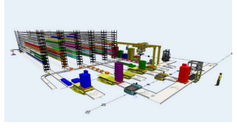
Explore **Flowmaster**, the most flexible and **user-friendly system** on the market! It allows our customers to control their sorting and packing needs in a very simple and efficient way.



- **Empower your operators:** real-time control for optimal sorting.
- **Real-time insights:** stay informed with live updates on product distribution, empowering operators to make informed decisions for optimal sorting outcomes.
- **Instant adjustments:** with Flowmaster, adjustments to quality specifications are immediately visible, ensuring seamless adaptation to changing sorting needs.

PLANT CONTROL

Our **SCADA system** is controlled from a central control panel, ensuring a **full overview** of all your vital production sections. This results in an optimal production environment, year in, year out.



TRACK & TRACE

Our **Track system** manages the entire route of your product data during the **sorting** and **packing** process. Information is collected and can be exported to 3rd party databases to **enable tracing**.
