# EVENPRODUCTS STEEL COVERS

Engineered for durability and protection, Evenproducts' MagiZinc® steel covers provide a long-lasting solution for tank security in harsh conditions. Designed with ease of installation in mind, they meet strict safety and environmental standards while delivering unmatched performance across a range of applications.

## KEY BENEFITS

### Effortless Installation

Precision-engineered panels and purlin design allow for fast, efficient assembly

### Built to Last

Constructed from S280 structural-grade steel with MagiZinc® ZM310 coating

### Weather Resistant

Withstands wind and snow loads, ensuring protection in extreme conditions

### Fully Compliant

Meets Health & Safety and Air Gap regulations

### Stock

- Compliance: ISO9001, BSEN1090 Class II, UKCA/CE Mark
- Powder coating available in a range of RAL colours
- Hatch, ball valve brackets, and optional enclosures available

# INSTALLATION & MAINTENANCE

## Installation

Engineered for fast installation with minimal labour—ensure proper alignment of panels and secure all fixing points

## Environmental Suitability

Tested to withstand wind and snow loads. Confirm compatibility with your site's environmental demands

## Maintenance

Conduct regular inspections to check for debris, snow buildup, or corrosion. Clean panels as needed and maintain hatches for access

## Technical Specifications

### Material

S280 structural-grade steel

### Coating

MagiZinc® ZM310

### Sizes Available

Short panelled tanks:  
2.68m to 12.06m & 14.07m

Long panelled tanks: 6ft to 48ft

\*Our robust steel cover vs. collapsed low quality alternative cover

## See The Difference

The Images from December 2024 show the performance difference. Our steel covers are built to withstand demanding conditions, protecting not only the cover itself but also the liner and stored contents.
