

## CREATING THE INFRASTRUCTURE OF CHANGE

ACISA, a standout member of Spain's leading Aldesa Group, excels in creating innovative engineering solutions and offers full-scale installation and maintenance services across various sectors such as renewable energy, mobility, energy efficiency, control systems, security, and telecommunications. Our focus is on leveraging technology to drive progress and efficiency in these industries.

## RETHINKING ITS & TUNNEL MANAGEMENT

Delivering tailored operational solutions and systems  
for tunnel integrators and operators.

## HIGH AUTOMATION MAXIMUM SECURITY

Sagit offers tunnel integrators and operators customizable solutions for daily operations and efficient maintenance planning. With a modular, scalable, and adaptable architecture, our SCADA platform meets compatibility requirements across a wide range of market products and services, adjusting to the diverse parameters that fulfill our international clients' needs.

### Integrated Tunnel Control System

- Electrical distribution
- Lighting
- Signage
- Ventilation
- Traffic monitoring
- Emergency management
- Fire protection
- Access control
- Data collection stations
- Weather stations

## SAGIT TUNNEL MANAGEMENT SOFTWARE

Sagit Tunnel is a customizable SCADA platform for efficient tunnel management using Wonderware, the leading industrial automation software. It connects in real time with data sources, enhances safety, reduces congestion and pollution, and offers advanced monitoring and visualization tools while ensuring high cybersecurity and reliability.
