

MOTORISED SYSTEMS

ABOUT US

Digisonic is a leading company in the field of retractable motorised systems and mechanisms. For years, we have offered various hi-tech solutions to support Tv's and other furniture elements, aiming to enhance your interior spaces to the fullest.

Digisonic motorised lifts offer complete versatility and customization, allowing for the integration of hi-tech solutions even in the smallest spaces while maintaining the harmony of your furniture's disposition. Our flexible design approach assists architects, carpenters, and designers in creating home environments with freedom and expression.

DIGISONIC liven up your spaces

ARCHIMEDE SERIES

MOTORISED TV LIFTS

**ARCHIMEDE**

Lift mechanism for Tv up to 90"

**ARCHIMEDE BANDIERA**

Lift mechanism with
90° lateral rotation for Tv up to 65"

**ARCHIMEDE ROTOR**

Lift mechanism with *rotation up to 350° for Tv up to 80"*

**ARCHIMEDE LATERALE**

Motorized tv mechanism with
a lateral stroke for Tv up to 65"

ARCHIMEDE COLONNA

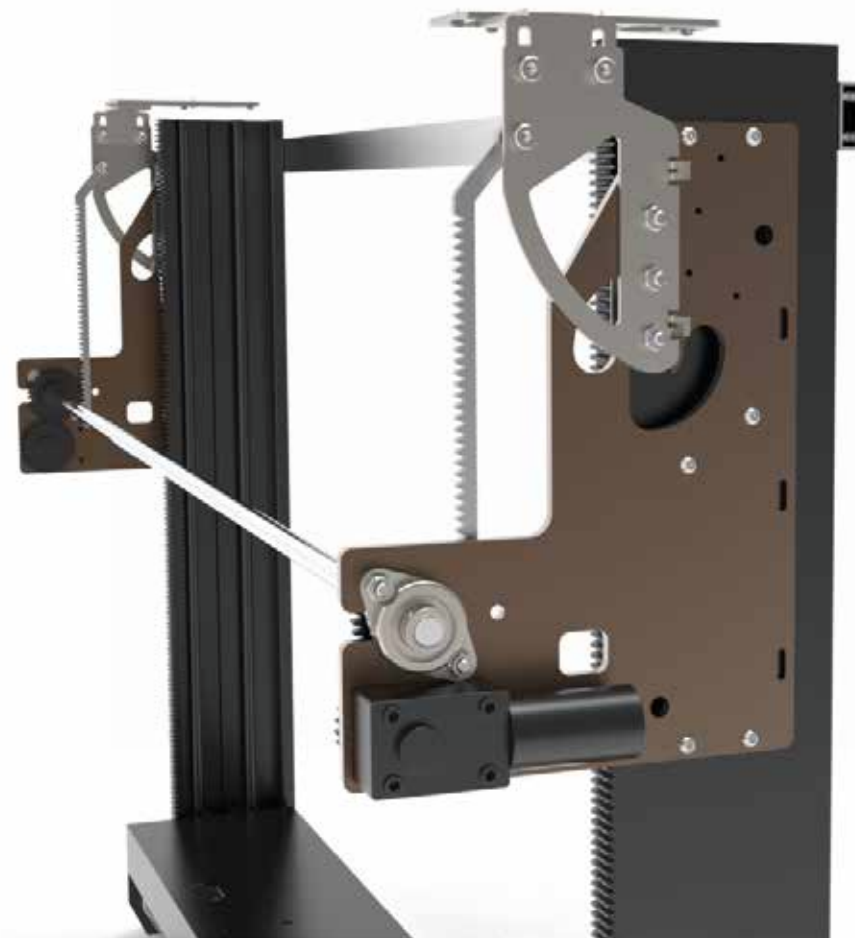

Lift Mechanism Ideal for *Small Spaces* for TV up to 60"

RELIABILITY & SAFETY

All of our mechanisms are made with high-quality materials and paints that ensure resistance and durability over time. Anticorodal aluminum is an essential component in the production of linear guides, while stainless steel and galvanized steel are used for all the rest.

Thanks to a **low-voltage (24V)** motors, all of our systems are safe and reliable.

CAREFULNESS

During the design phase, we took into account all the necessary spaces so that the base of the lift can be covered with the furniture finish once it is raised. In fact the system will stop before the cabinet's top, giving the opportunity to refine it with the wood panel as the same colour to the cabinet.

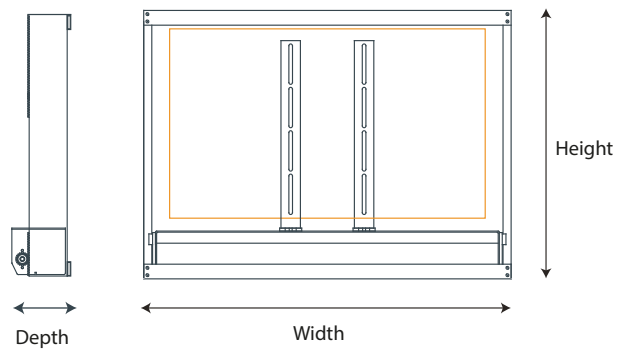

ARCHIMEDE

ARCHIMEDE

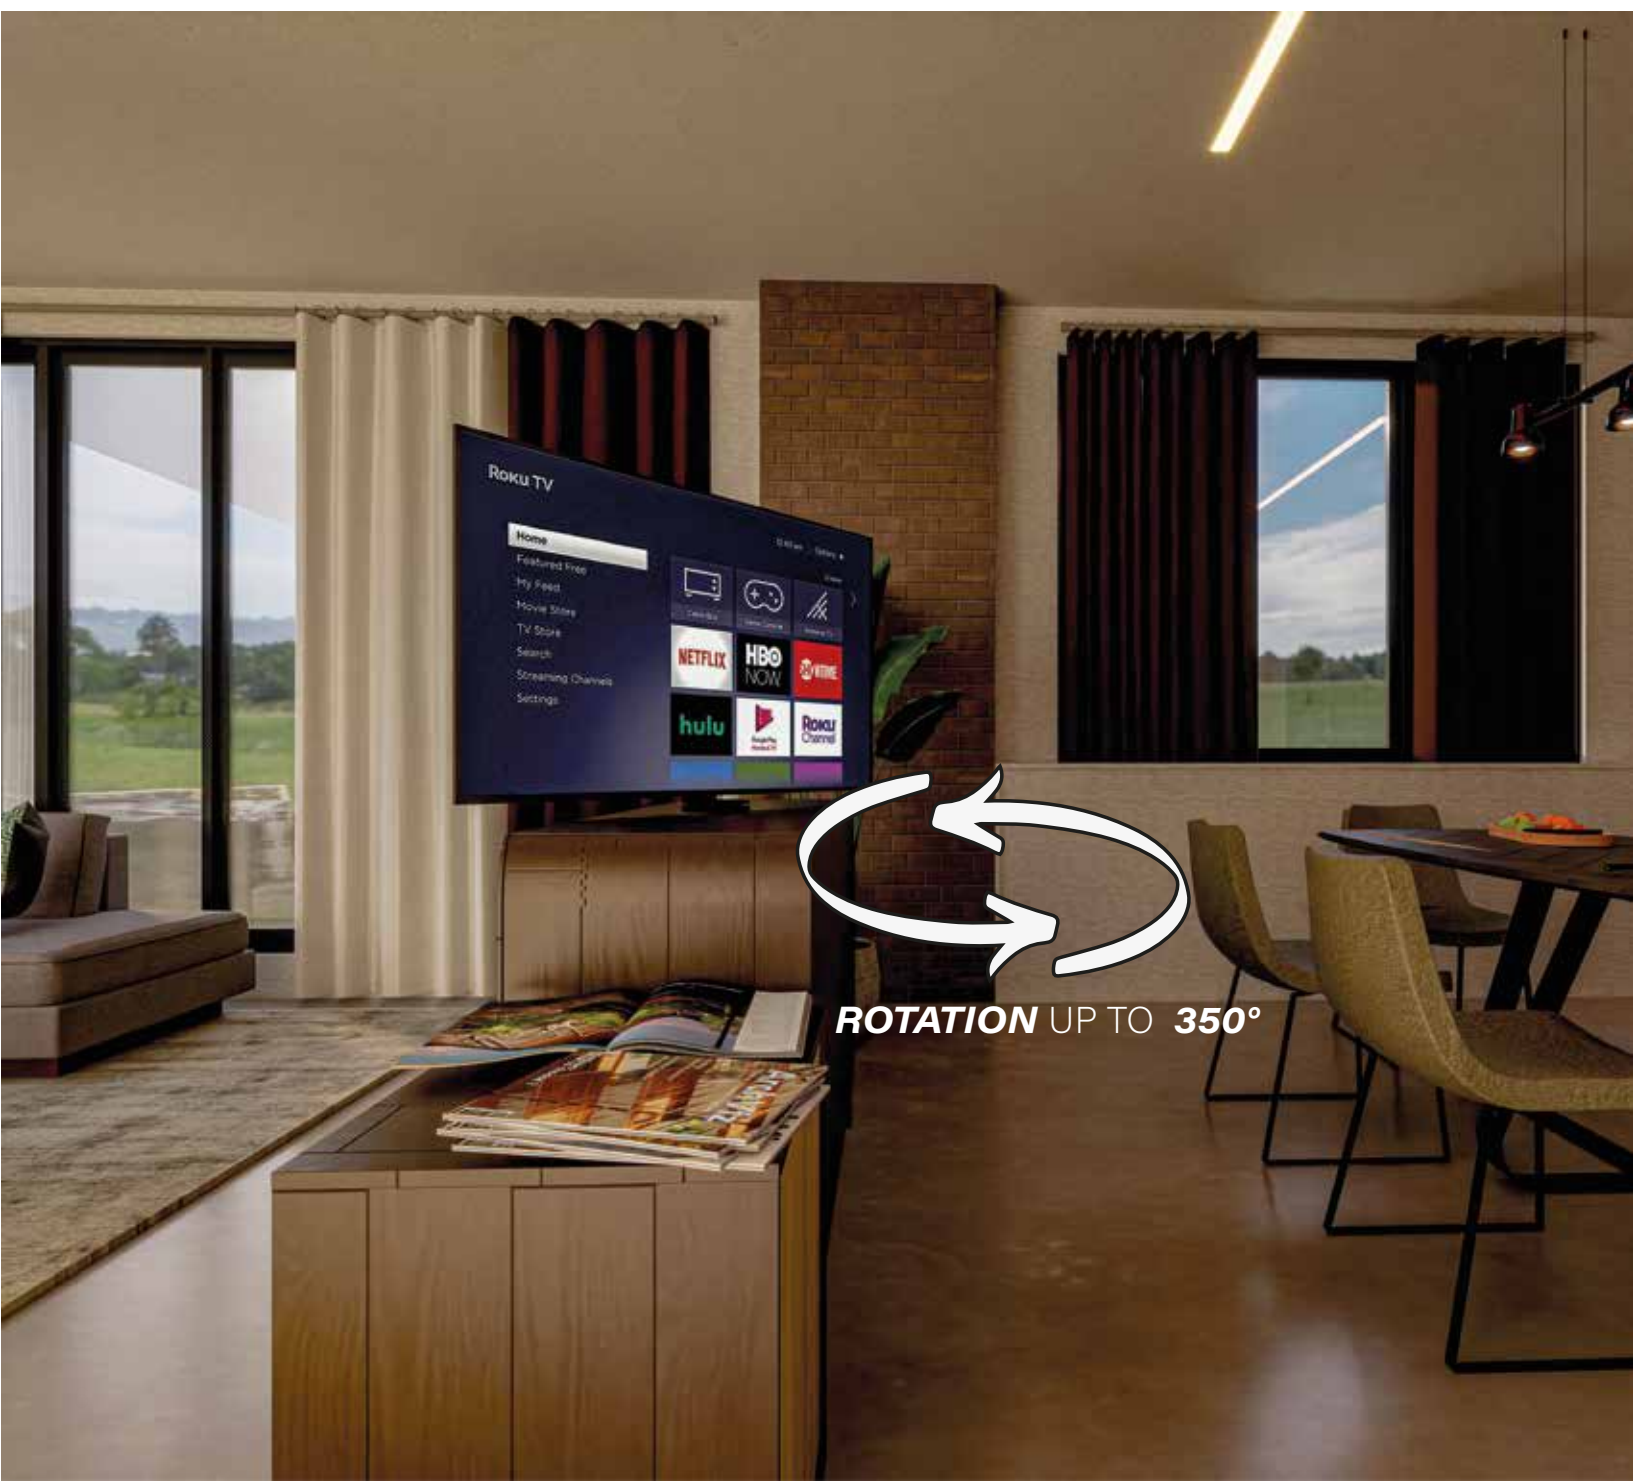

The main model of the series is Archimede, a motorized lift mechanism for televisions, shelves, and furniture with countless applications.

Designed and projected to be inserted into cabinet or counter walls, Archimede will rise up with your devices giving you an incredible viewing experience.

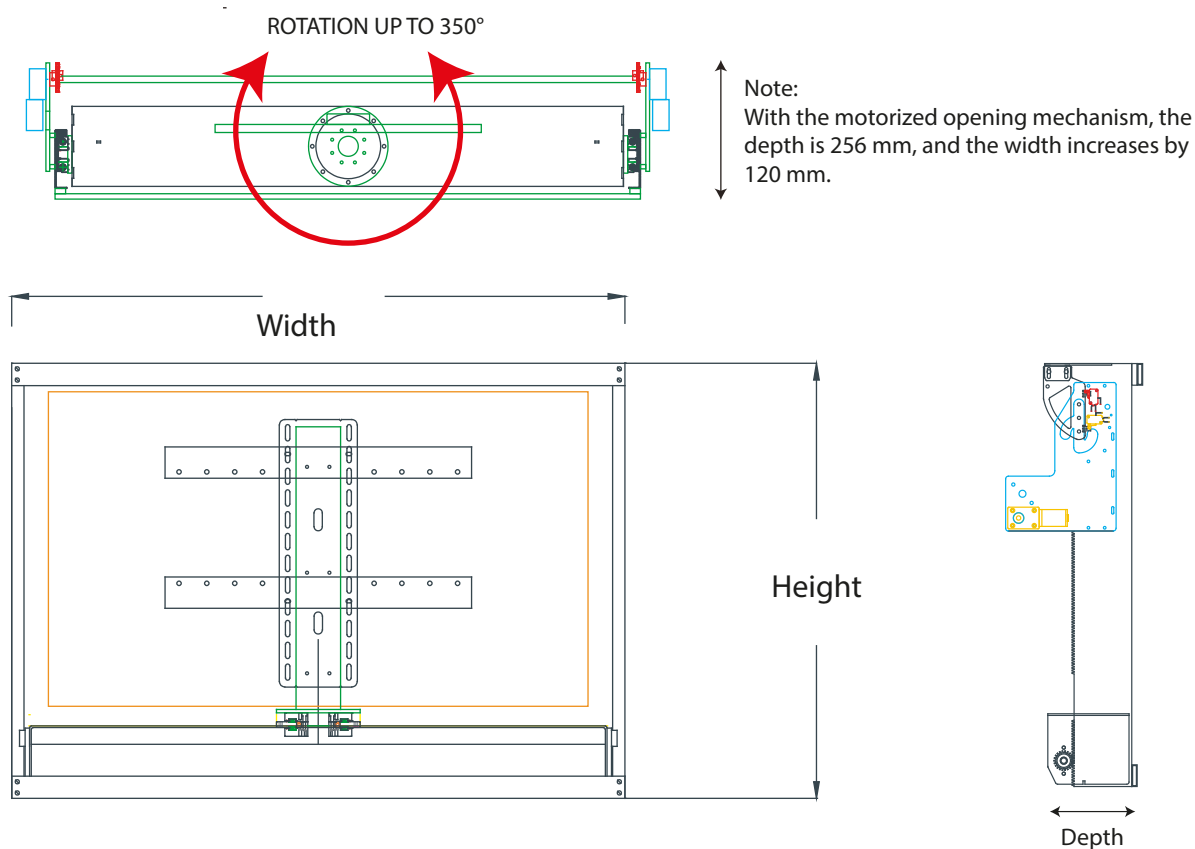

Model	Width (mm)	Height (mm)	Depth (mm)	VESA	Space for TV	TV

ARCHIMEDE ROTOR

ARCHIMEDE ROTOR

Archimede Rotor has the ability to lift and **rotate up to 350°**. In spacious, bright, and modern environments, such as open spaces, it allows you for positioning the television at the desired height and direction for optimal viewing from any angle. It is ideal for use between the kitchen and dining room.

Model	Width (mm)	Height (mm)	Depth (mm)	VESA	Space for the Tv	TV
ARC 120 R	1200	860	175	200-300-400	1130x668	48-49"

ARCHIMEDE BANDIERA

**ROTATION UP TO 90°
FROM *RIGHT* OR *LEFT***

ARCHIMEDE BANDIERA

Archimede Bandiera is **designed to be mounted near a wall**, allowing **rotation from one side up to 90 degrees**. During the design phase, the customer can specify the side of the rotating system, either right or left. This solution is **ideal for situations where space constraints and viewing angles** prevent furniture from being positioned away from walls or under windows.

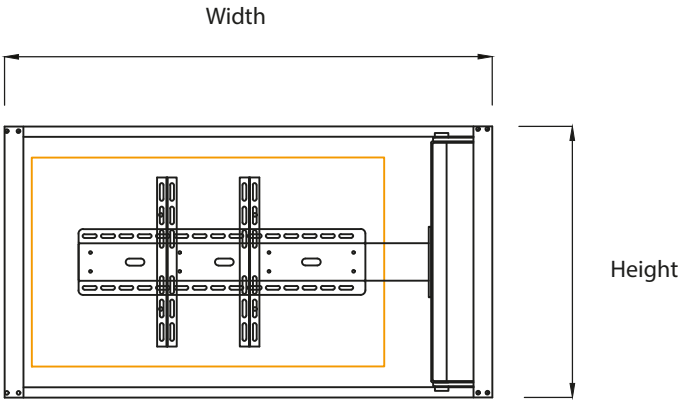

Model	Width (mm)	Height (mm)	Depth (mm)	VESA	Space for the Tv	TV
ARC 120 B	1200	860	175	200-300-400	1130x668	48-49"

ARC 150 B	1500	1020	175	200-300-400	1365x790	60"
ARC 160 B	1600	1080	175	200-300-400	1455x840	65

ARCHIMEDE LATERALE

ARCHIMEDE LATERALE

Archimede Laterale **fits perfectly into walls, partitions, cabinets, false walls for fireplaces, or bookshelves.** It allows for the effortless freeing of hidden spaces. Unlike previous Archimede models, it **extends horizontally from the wall.**

ARCHIMEDE COLONNA

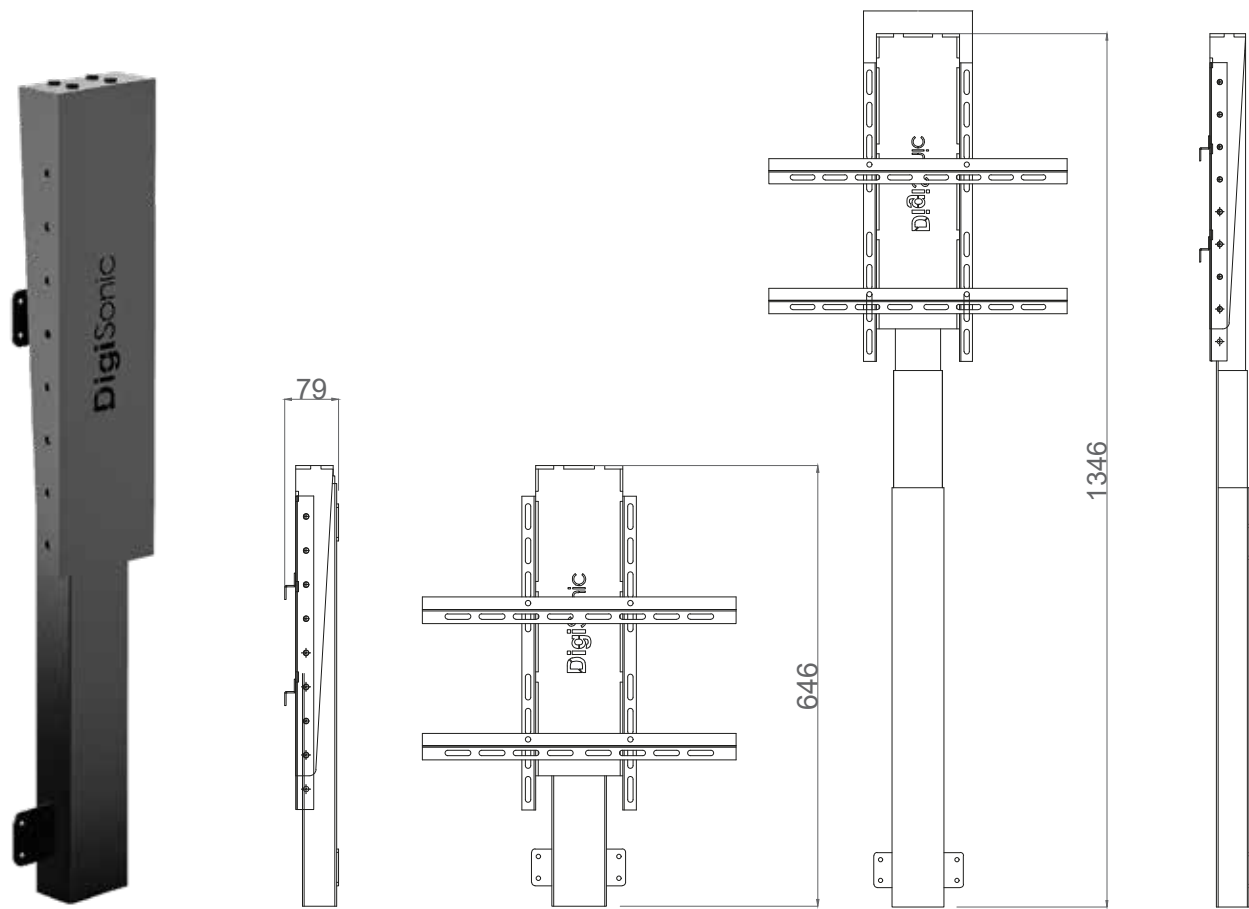

ARCHIMEDE COLONNA

Archimede Colonna is a motorized electric TV lift equipped with a reliable and quiet lifting column, whose compact dimensions make it *ideal for small spaces*.

The ARCHIMEDE COLUMN 700 is suitable for tv up to **43 pollici**

The ARCHIMEDE COLUMN 1000 is suitable for tv up to **60 pollici**

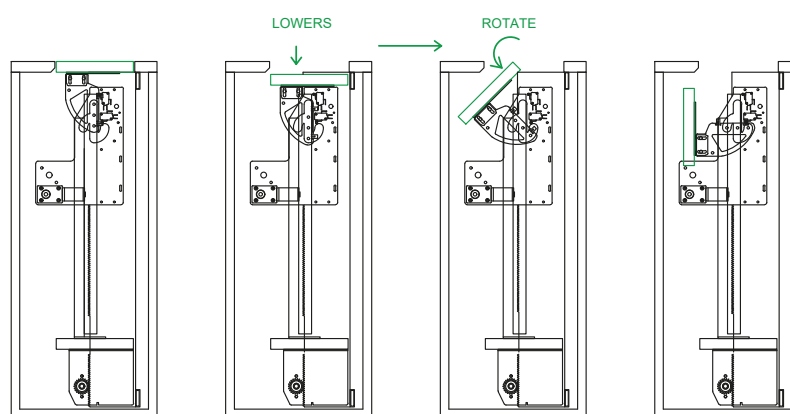

Model	Width (mm)	Depth (mm)	Height (mm)	Height max (mm)	Stroke (mm)	Max load capacity (kg)
ARCHIMEDE COLUMN 700	168	79	646	1346	700	65
ARCHIMEDE COLUMN 1000	168	79	796	1796	1000	65

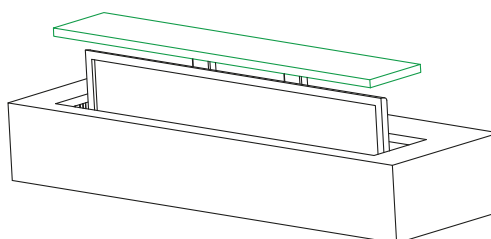

CLOSURE OF THE LID

MOTORIZED LID

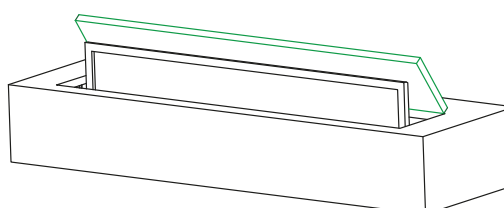

The motorized lid is particularly useful, giving an aesthetic and visual impact very surprising thanks to the applied technology. As a principle of operation, the motorized lid opens and positions itself inside the furniture in a synchronized way before the Tv rises up. When the Tv is not in use, the lid still remains flush with the top, maintaining the aesthetics and integrity of the furniture.

Alternative way to the motorized lid

The lid is fixed above the TV with brackets

The lid is hinged at the top part of the furniture

SMART HOME FUNCTIONS

COMPATIBILITY WITH HOME AUTOMATION

The integration of the Archimede line with virtual assistants creates smart, practical, and interactive products, making them even more appealing. To connect Archimede to the most common home automation systems, it will be enough to connect a low-voltage Wi-Fi relay module to the electronic control unit via clean contacts.

After installing the necessary applications and registering the device, it will be possible to detect it through popular apps such as Alexa, Google Home, Apple Home Kit, Nest, Kasa, Yonomi, etc., and control Archimede's functions using voice commands.

CUSTOMIZATION

Our models can be **customized** according to your needs.

CONTACT US

Email us at info@digisonic.it

COLLECTION OF DATA

Gathering essential information, such as dimensions and weights, to proceed with the design.

PRELIMINARY DRAWINGS

Concepts and preliminary solutions are developed, evaluating technical feasibility, costs, and functional requirements, creating a project outline.

CLIENT'S APPROVAL

The client has reviewed and confirmed the compliance of the work or project, giving the green light to proceed to the next phase

PRODUCTION

The production phase consists of laser cutting of the components, welding, painting, assembly, and testing

DELIVERY

We ship worldwide.

PROJECT TIMELINE

OUTDOOR FURNITURE

SOLUTIONS FOR EVERY SPACE

Do you want to install one of our motorized systems outdoors? Perhaps by the pool or in the garden under the veranda?

We take care of everything! A motorized mechanism installed outdoors requires all the protections that ensure its complete safety, from its positioning to the furniture that will contain it.

Digisonic offers the possibility to design custom outdoor furniture, painted in fiberglass, with a drainage system that allows water to flow outside, protecting our system.

LET'S DESIGNED IT TOGETHER

From a television to a retractable outdoor kitchen, our motorized systems further enhance your outdoor areas with functionality and completely reliable products.

ULISSE SERIES

MOTORIZED TV LIFTS FOR CEILING

SERIE ULISSE

ULISSE

A ceiling tv mount with tilting mechanism that allows for **opening up to 120°**, max TV size 90"

ULISSE ROTOR

A ceiling tv mount with tilting mechanism that allows for **opening and rotation of up to 350°**, max tv size 85"

ULISSE EXTENDER

A ceiling tv mount with tilting mechanism that allows for **opening and for downward extension from 70cm to 1m**.

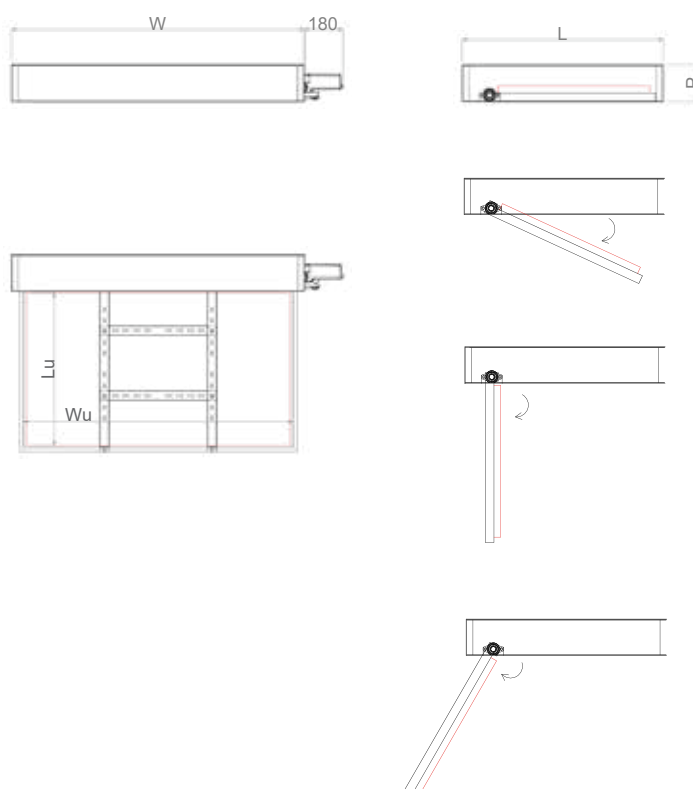

ULISSE

ULISSE

This is the main product of the line: a ceiling-mounted motorized system with a **tilting opening up to 120 degrees**, perfect for installation in a living room or dining room. Depending on the model, it can suits a television from **32 inches up to 90 inches and beyond**.

Model	Width (mm)	Length (mm)	Depth (mm)	VESA	Space for the Tv	TV
ULISSE 32	906	696	170	75-100-200	794x493	32"
ULISSE 42	1112	797	170	100-200-300	1000x595	42"
ULISSE 50	1262	862	170	200-300-400	1150x660	50"
ULISSE 55	1362	932	170	200-300-400	1250x730	55"
ULISSE 60	1512	1042	170	200-300-400	1400x840	60"
ULISSE 65	1612	1102	170	200-300-400	1500x900	65"

Call us for other dimensions

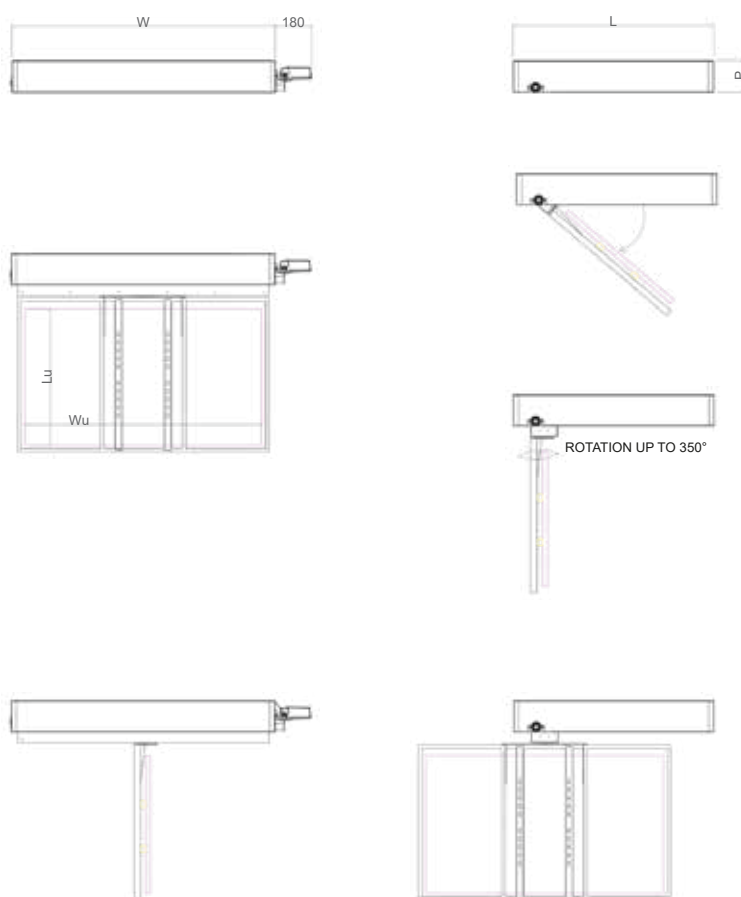

ULISSE ROTOR

ROTATION UP TO 350°

ULISSE ROTOR

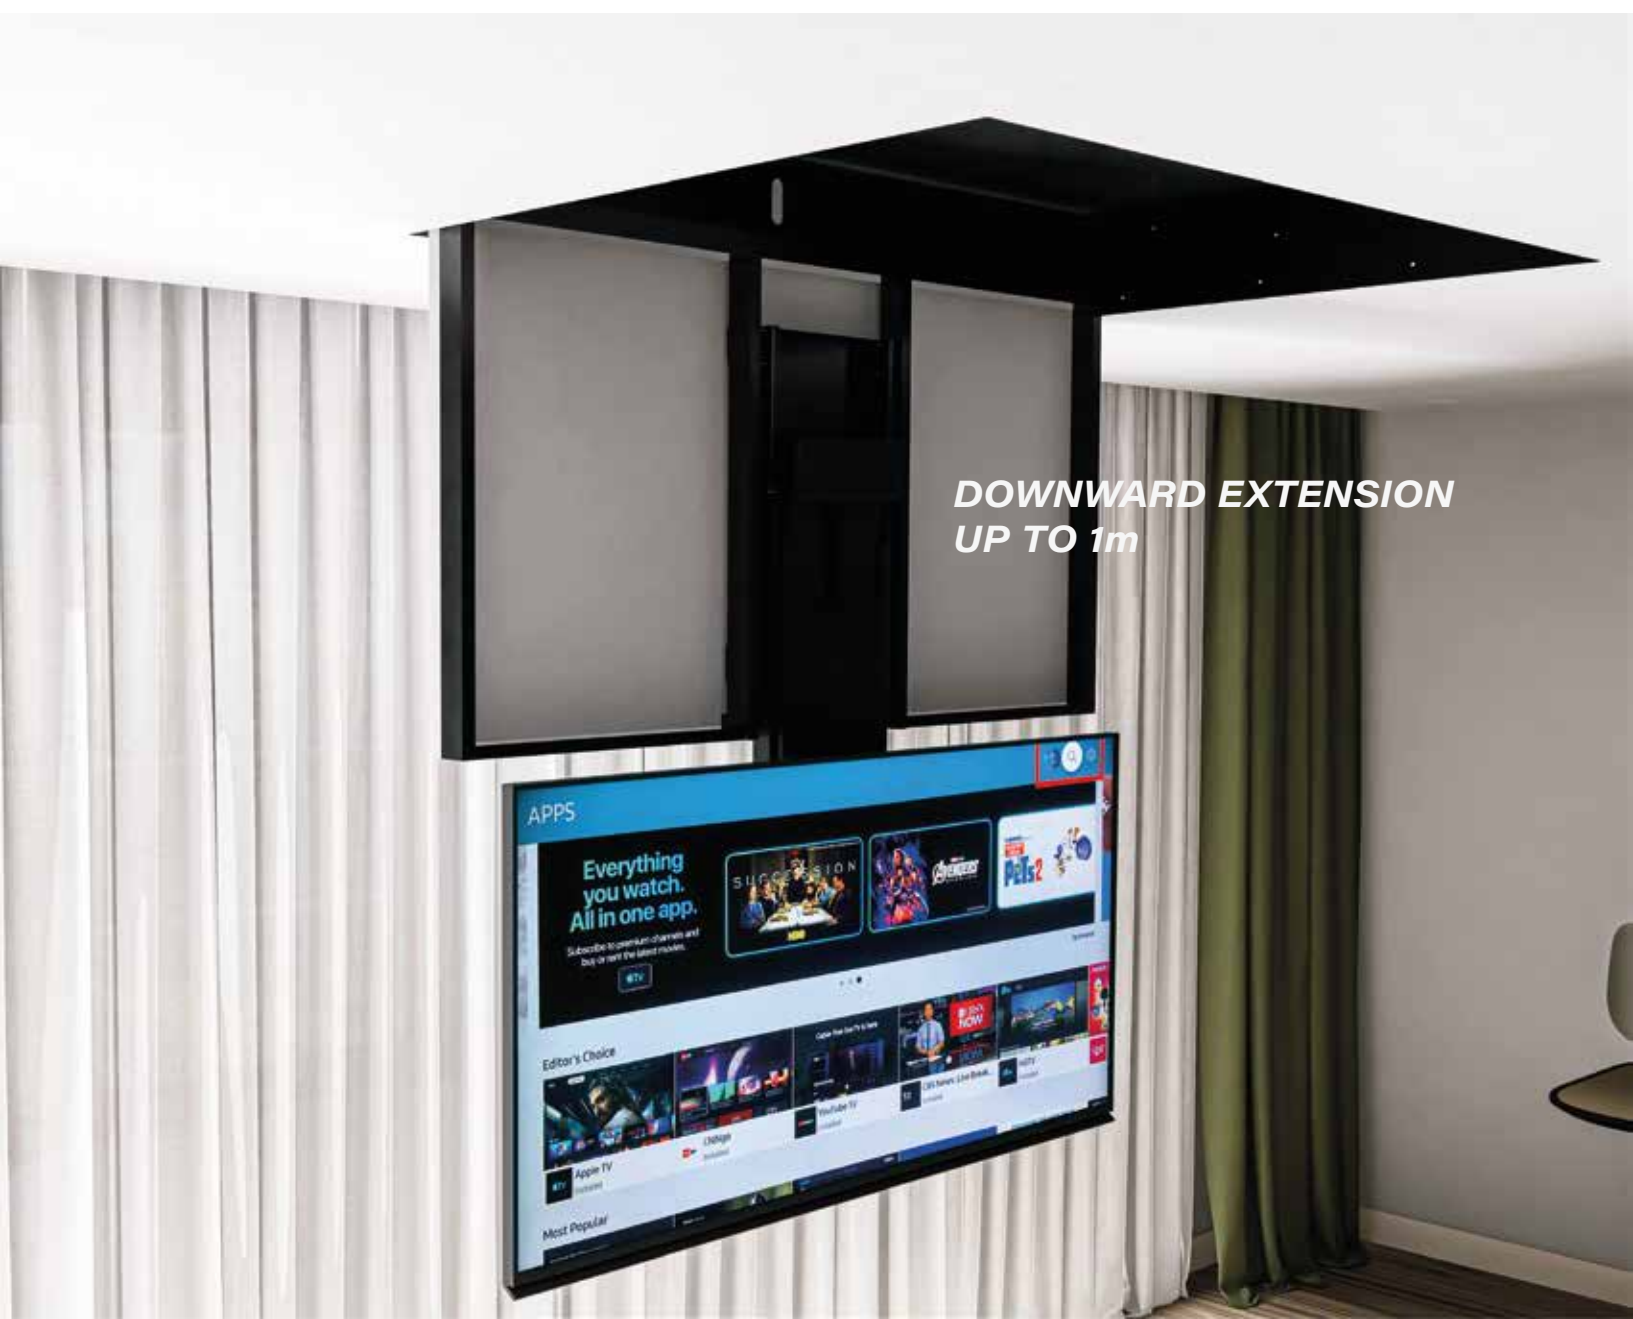

It is a ceiling-mounted motorized system with a tilting opening of up to 90 degrees. **The 350° rotation feature** makes Ulisse Rotor a cutting-edge product that can be installed anywhere, especially in large open spaces where the TV screen can be viewed from any point.

Model	Width (mm)	Length (mm)	Depth (mm)	VESA	Space for the Tv	TV
ULISSE 42 R	1112	917	190	200-300-400	1000x615	42"
ULISSE 55 R	1362	1052	190	200-300-400	1250x718	55"
ULISSE 60 R	1512	1162	190	200-300-400	1400x840	60"
ULISSE 65 R	1612	1222	190	200-300-400	1500x900	65"

Call us for other dimensions.

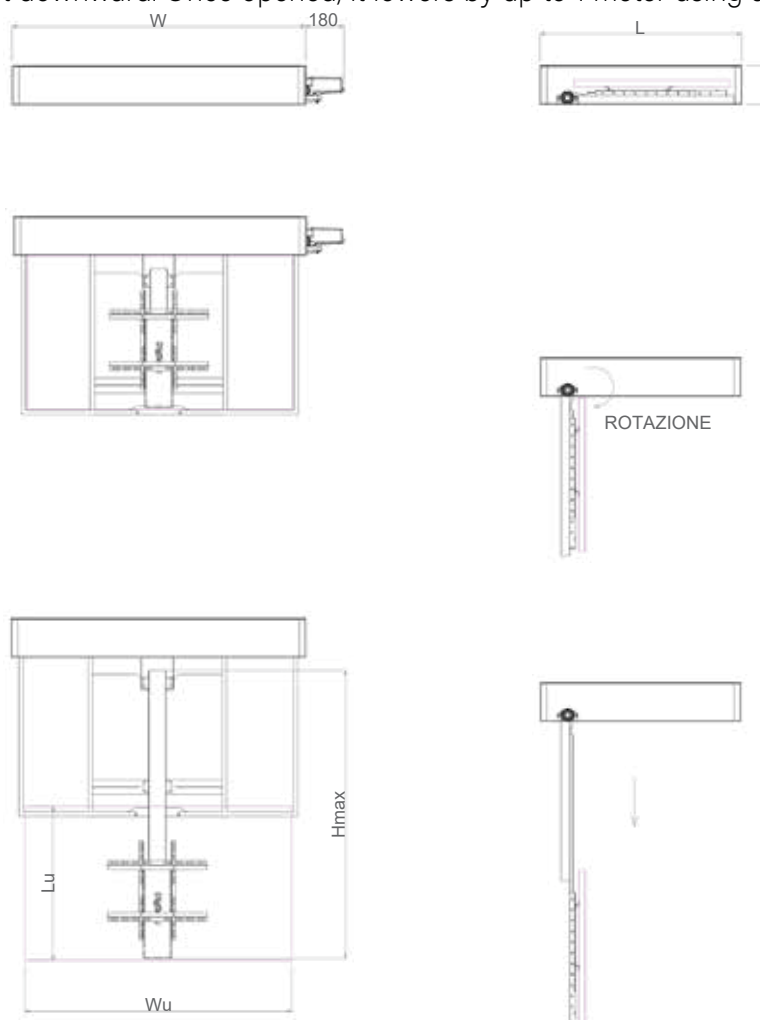

ULISSE EXTENDER

**DOWNWARD EXTENSION
UP TO 1m**

ULISSE EXTENDER

It is a ceiling-mounted motorized system with a tilting opening of up to 90 degrees. Ulisse Extender ensures perfect visibility of the television in environments where the ceiling is particularly high, allowing for height adjustment downward. Once opened, it lowers by up to 1 meter using a telescopic column.

Model	Width (mm)	Length (mm)	Depth (mm)	VESA	Space for the Tv	TV
ULISSE 50 EXT	1262	862	180	200-300-400	1150x660	50"
ULISSE 55 EXT	1362	932	180	200-300-400	1250x730	55"
ULISSE 60 EXT	1512	1042	180	200-300-400	1400x840	60"
ULISSE 65 EXT	1612	1102	180	200-300-400	1500x900	65"

Call us for other dimensions

COMPONENTS INCLUDED IN THE KIT

To connect Ulisse to the most common home automation systems, simply connect a low-voltage Wi-Fi relay module to the electronic control unit via clean contacts. After installing the necessary applications and registering the device, it will be possible to detect it through popular apps such as Alexa, Google Home, Apple Home Kit, Nest, Kasa, Yonomi, etc., and control the functions of Archimede using voice commands.

CONTROL BOARD DS 1000

The DS 1000 control unit manages all functions of the Archimede Series, Ulisse Series, and Ultimate 1000. Powered by 24V.

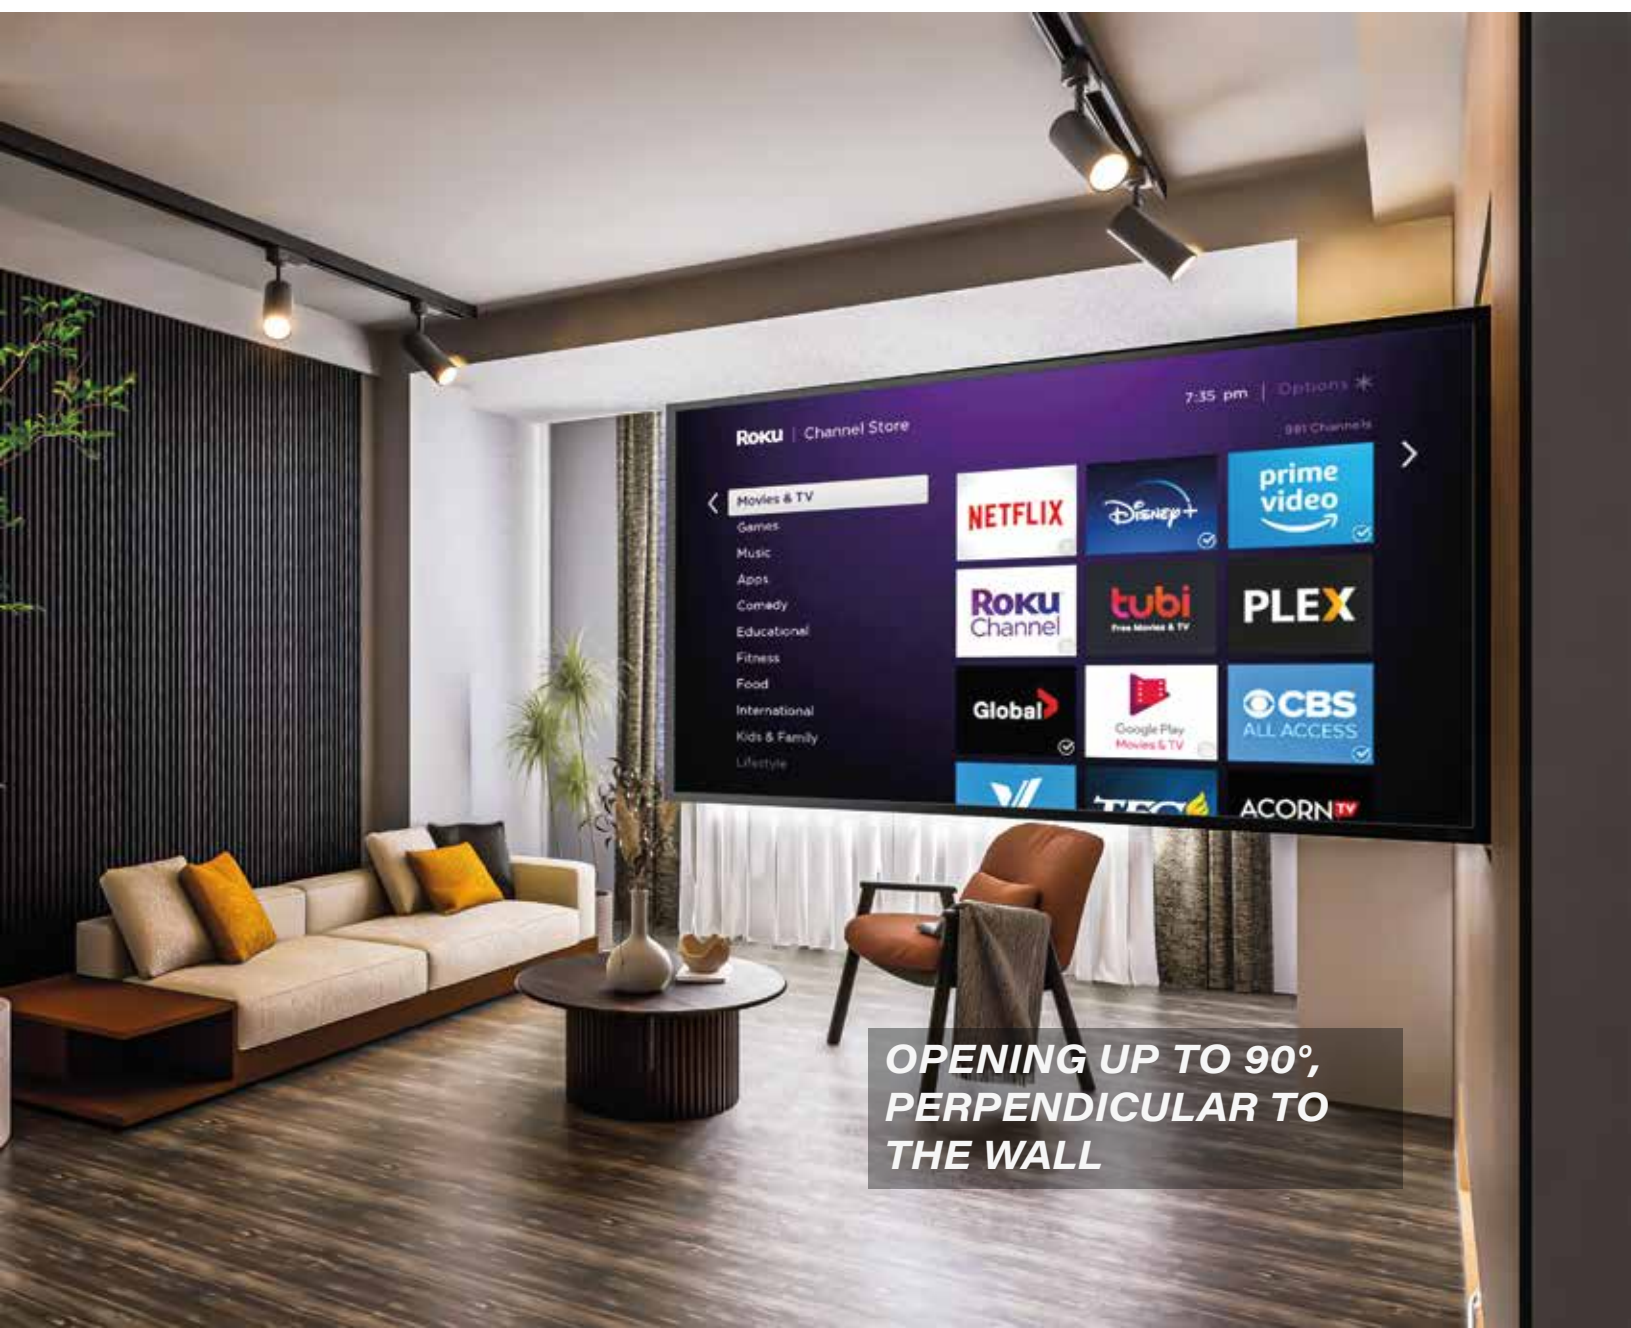

REMOTE CONTROL

The remote control allows you to activate and manage our motorized systems from a distance. With simple buttons, the remote sends signals to rise, lower, rotate, or adjust the movement of the mechanism.

The remote operates with a battery:
A23/23A/V23GA/LRV08/8LR932/MN21

ULTIMATE 1000

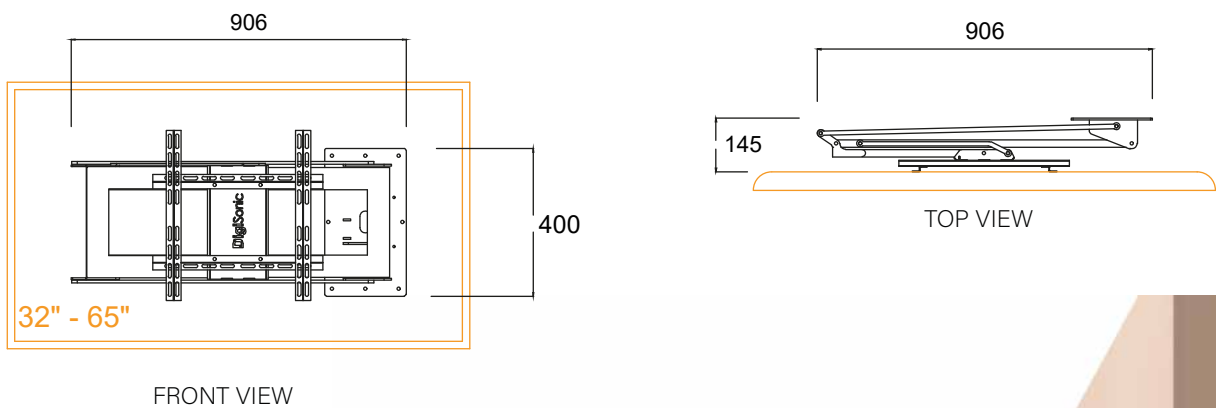

MOTORIZED WALL BRACKET

ULTIMATE 1000

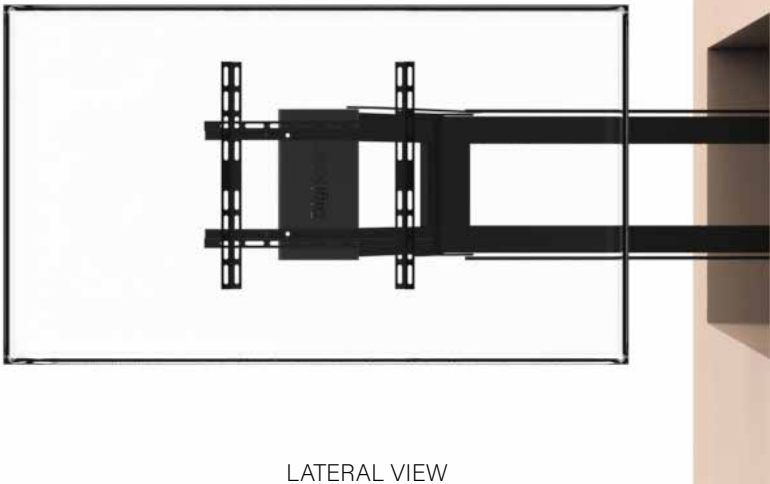

Ultimate 1000 is a motorized bracket for recessed walls or paneling, allowing the screen to move forward and position itself at a 90-degree angle. It is powered by a low-voltage electric piston and controlled by an encoder for smooth movement, with a forward stroke of 40 cm regulated by a limit switch. The bracket can open only to the right or left, depending on the installation, supporting TVs with VESA mounts up to 300/400. Controlled by a remote or home automation system, it features an electronic control unit that can manage safety devices (not included) to stop movement in case of collision.

MECHANISM IN CLOSED POSITION

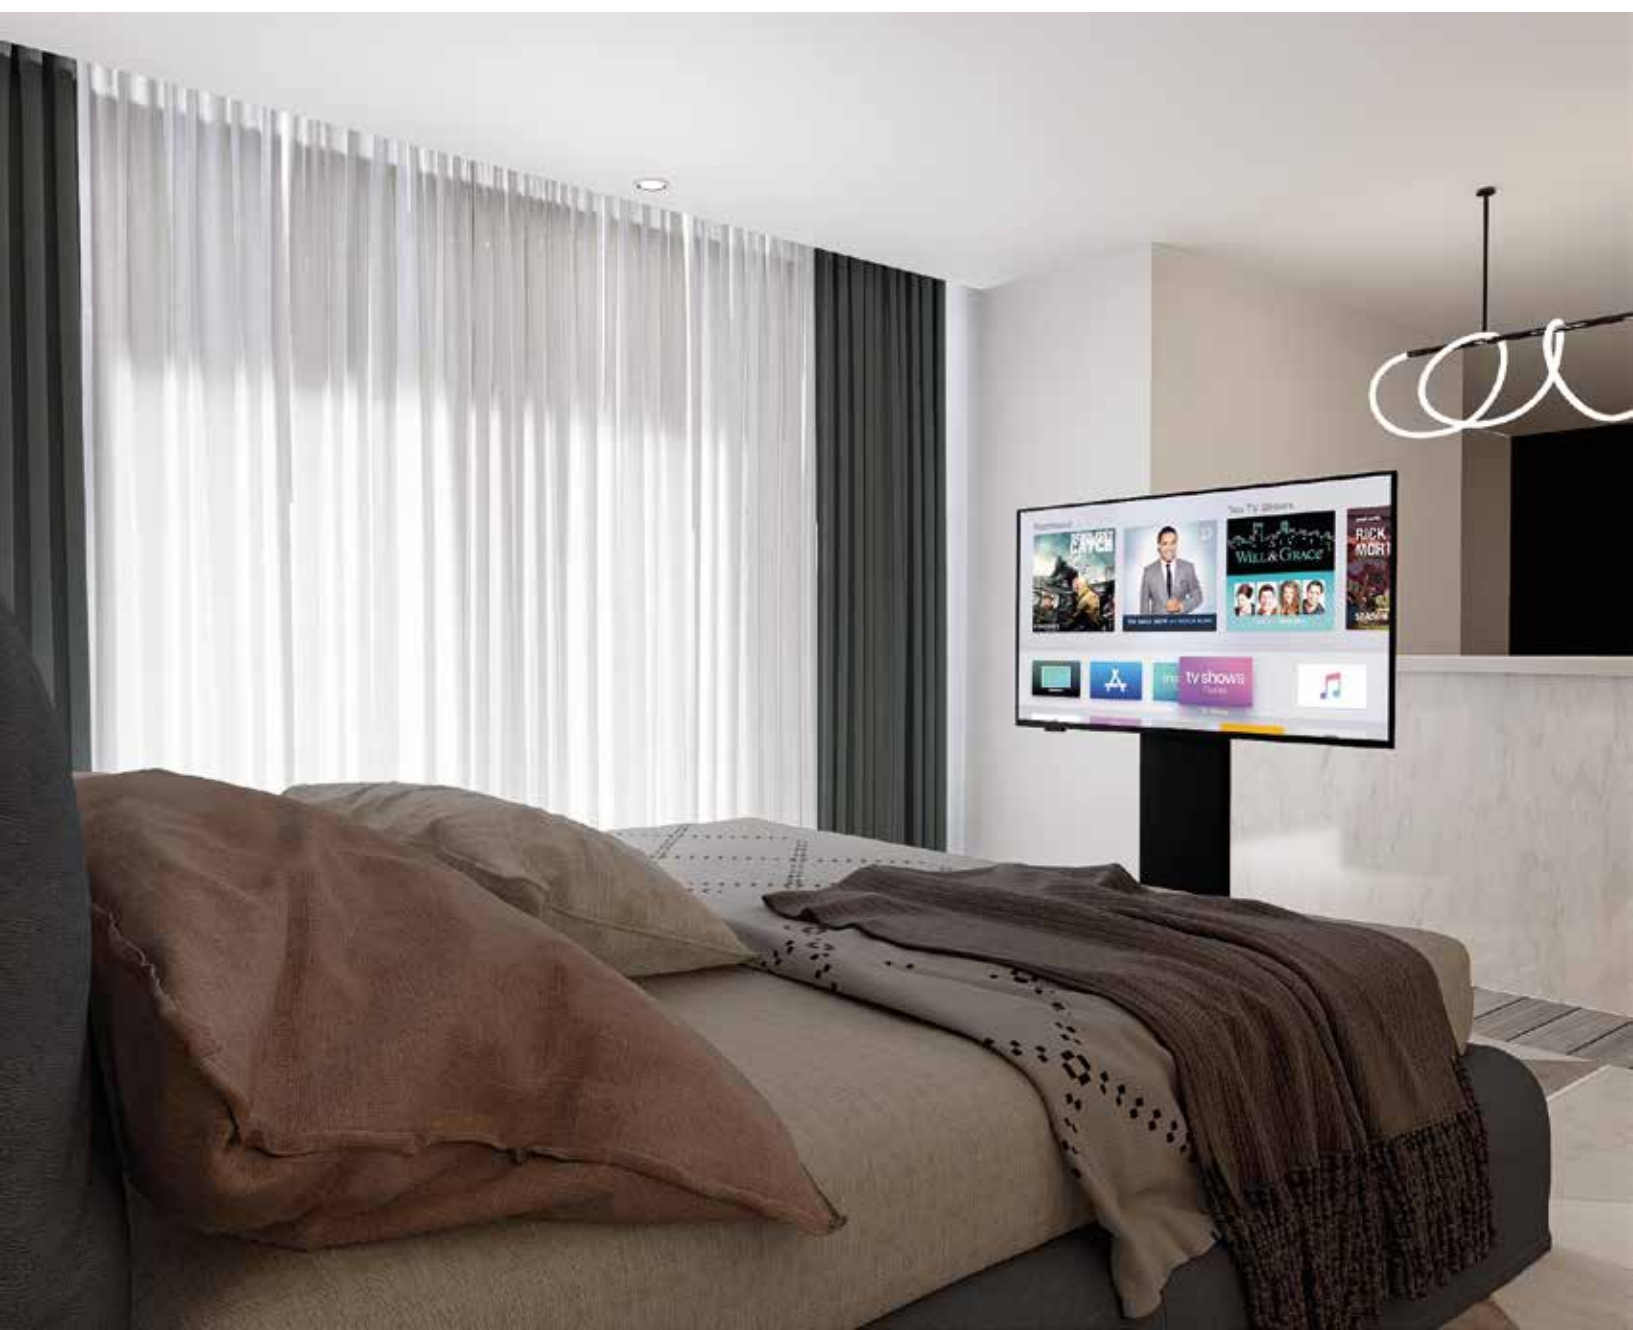

MECHANISM IN OPEN POSITION

When opened, the mechanism is perpendicular to the wall

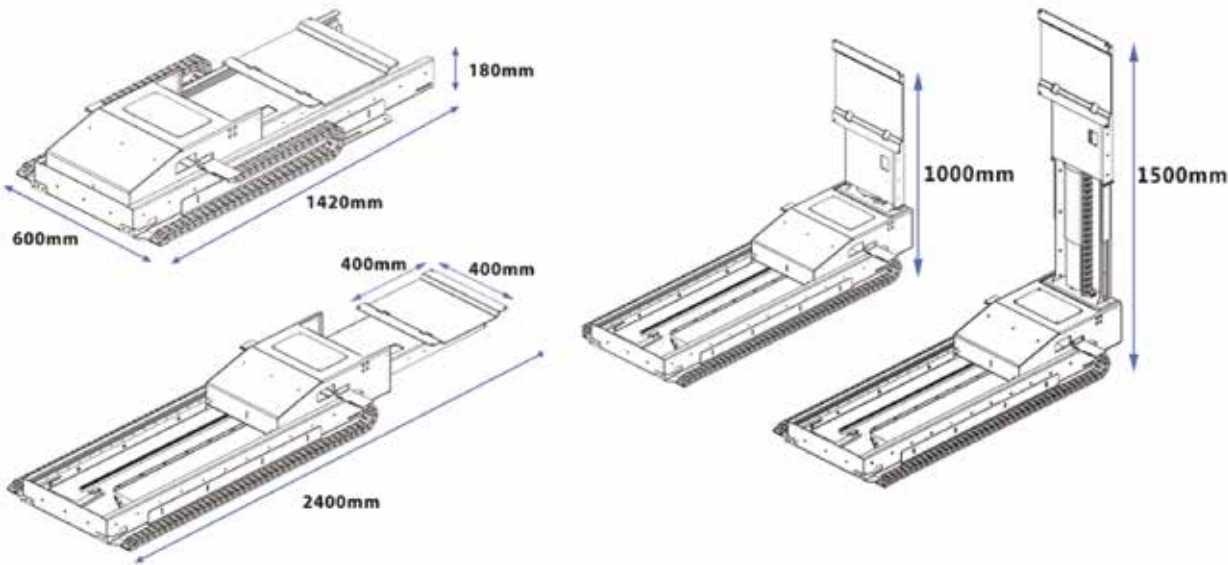

NEMO

MOTORIZED TV LIFT UNDER THE BED

NEMO

Make use of a hidden corner under the bed to save space and enjoy TV, enhancing the viewing experience while lying down. The remote control provides convenience and practicality.

TV DImension	from 32 to 55 inches
VESA	400x400 (max)
Weight	67 kg
Voltage	110/240 50/60 HZ
