

Hydrogenated Rosin

This series of light-colored hydrogenated rosins and rosin esters offers a water-white appearance, excellent thermal stability, and low odor. They are widely applicable in **high-performance adhesives, UV-curable adhesives, medical-grade adhesives, and cosmetic depilatory products**. Additionally, they are suitable for use in **light-colored solder pastes and flux formulations**.

Product Type	Softening Point (R&B), °C	Acid Value mg/g	Color, Gardner Solid	Resin Type
KHR70EX	65~75	155~175	≤150(Hazen)	Hydrogenated Rosin
KHR70S	70~80	≤200	≤150(Hazen)	
KHR75	75~85	160~180	≤150(Hazen)	
KHR130	125~135	≥230	≤180(Hazen)	Hydrogenated Rosin Ester
KH85SL	80~88	≤20	≤1	
KH105W	98~108	≤30	≤1
