CRAFTED IN THE HEART OF CEYLON
ECO - FRIENDLY SOLUTIONS FROM
SRI LANKA'S LUSH LANDSCAPES

OUR JOURNEY

From Coconut Groves to Global Markets

Over three decades, we partnered with local coconut farmers, to form the foundation of wicky plantation company. These communities, with their generations of expertise possess an in depth knowledge about every aspect related to coconut and making use of it optimally.

Through our diverse product range, we support these families and uplift their quality of life. Our dedication to quality has earned us a strong global clientele of 64 countries, which includes UK, USA and Canada.

In line with our mission, we have expanded our operations into the coir industry. As the initial step we invested in a mill to extract coir pith, husk chips, and fibre. At present we produce and export high-quality coir products, such as grow bags, coir substrates, horticultural products, industrial fibre, and erosion control solutions.

Eco Trends is a backward integration measure to ensure the fullest utilization of the organic coconut husk.

To inspire healthy growing across the globe with continuous improvement & innovation.

“ By having an unique product range , we aim to support the families who work with us ”

SUSTAINABILITY

VISION

To inspire healthy growing across the globe with superior, organic growing solutions through continuous improvement and innovation.

MISSION

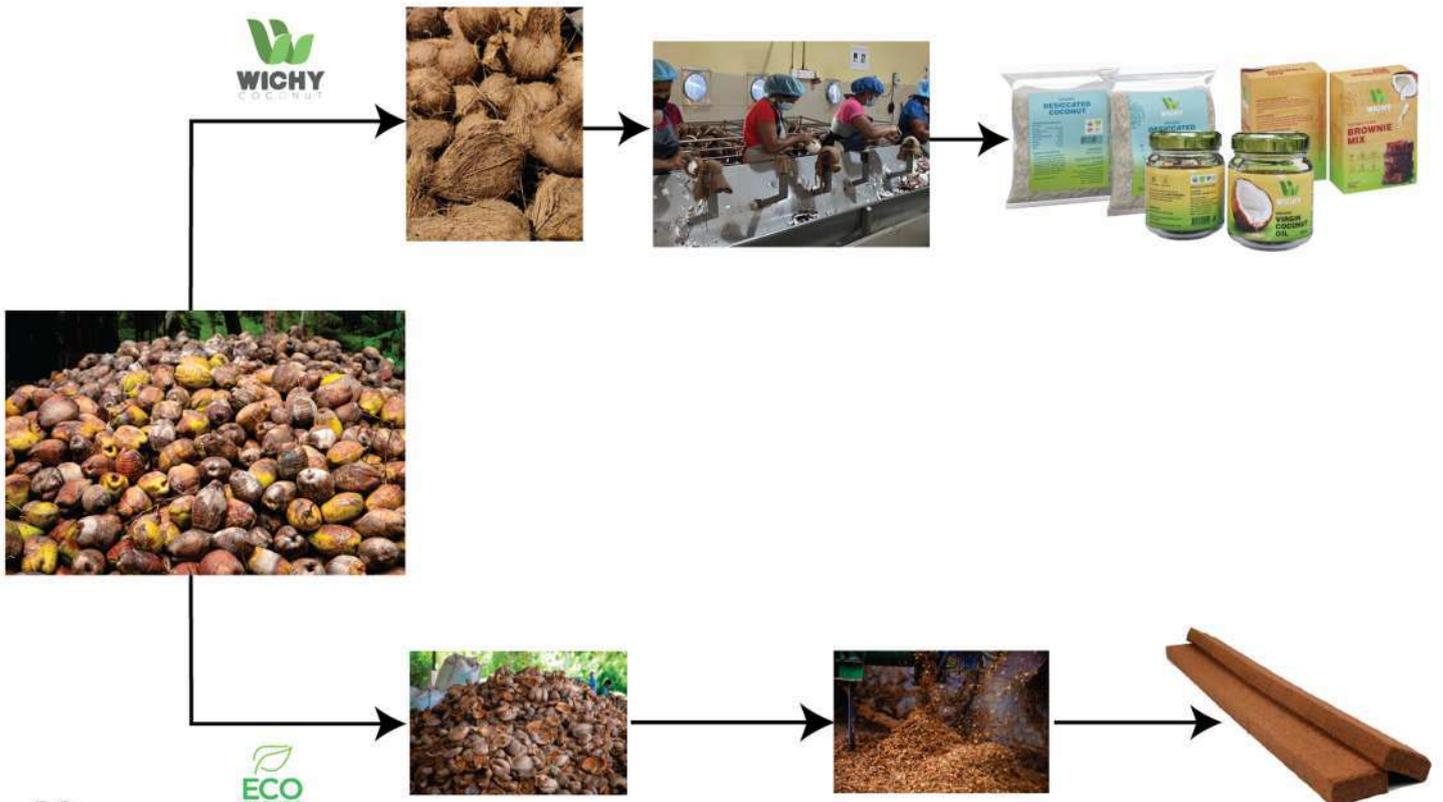

INSPIRE Innovation & Sustainability

BUILD Talent & Strategic relationships globally

CREATE Sustainable, eco-friendly products assuring optimal utilization of the coconut.

OUR STRATEGY & MARKET OVERVIEW

- Global clientele in 60+ countries
- USD 20mn worth of business
- Leading exporter of organic coconut based food products
- Self-owned organic husk extraction mill
- Consumption of 100,000+ organic coconuts per day
- Creating value addition from the husk as a step of backward integration

SOLUTIONS THROUGH ECOTRENDS

BERRY BLISS

This is a specially formulated coir blend designed to provide optimal growing conditions for strawberries, & other berry plants. Our unique mix is engineered to deliver high water retention, ensuring that the delicate, smaller roots of berry plants receive consistent moisture and nutrients.

BLUE COIR

Eco Trends blue coir is a specially blend designed to support the long term growth and productivity of blueberry plants.

AQUAIR COIR

This is a specially formulated coir blend designed for all types of plants. This unique mix strikes the perfect balance between water retention and air porosity

High water retention & Air porosity
Supportive for smaller roots
Optimum crop yield

Strong foundation
Sustainable and organic
Deep root penetration

GROWING MEDIA

A variety of growbags for hydroponic fruit and vegetable farming with customized blends of Coir Substrate

COIR SUBSTRATES BRICKS & BALES

5kg compressed blocks are one of the most popular value added substrate made out of coir. It is one of the cost-effective products for containerized transportation. The product has a moisture capacity below 20% with customized electronic conductivity levels according to buyer's request. Each block weight between 4.5 – 5kg per unit and available in different packing options suitable for retail chains and bulk volumes. Customized blends available using coco peat, coconut husk or any combination of request.

BRIQUETTE

Highly demanded by all home gardeners and retail chains for their convenient size and user-friendliness. Available in individual units and combo packs with coco peat and mix blends.

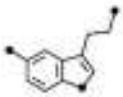

REPTILE BEDDING SOLUTIONS

At Eco Trends, we understand the importance of providing a comfortable and natural environment for your beloved reptiles. Terra Comfort is a specialized line of reptile bedding designed to cater to the unique needs of various reptile species, including lizards, snakes, tortoises and many more

“Natural Bedding for Your reptilian Friends”

KEY FEATURES

Specialized Formulas

Moisture Management

Odour Control

Eco-friendly Materials

HORTICULTURE PRODUCTS

Grow Discs

Ideal for home gardening, hobby growers, large scale farms and large gardens .

Coir Sheets

Coir sheets are made out of a coir and latex mix, offering durability, flexibility, and eco-friendly support.

Coir basket liners

These are environmental friendly products for indoor gardening.

Coir Pots

Coir pots are biodegradable, eco-friendly planting containers made from natural coconut fibers.

Coir weed mats

Mulching around trees is very important, as it helps the young tree to control weeds & retain moisture.

Coir Poles

Coco poles are made out of specially treated coconut fibre.

**Significant role
in gardening,
landscaping,
and agriculture**

GEOTEXTILE AND COIR LOGS

At Eco Trends, we specialize in providing eco-friendly erosion control solutions that are both effective and sustainable. Our range of products includes geotextiles made from coir in various GSM (grams per square meter) levels, as well as coir logs designed to protect river banks and other vulnerable areas.

GEOTEXTILES

Made from natural coir fibres, are available in different GSM levels to suit various erosion control needs. These geotextiles provide effective soil stabilization while promoting natural vegetation growth, making them ideal for a wide range of applications, including slope stabilization, embankment reinforcement, and landscaping projects.

COIR LOGS

Our coir logs are cylindrical structures filled with coir fibres encased in biodegradable netting. These logs act as natural barriers to prevent soil erosion along river banks, shorelines, and other watercourses. They provide immediate stabilization and protection against erosive forces while allowing for the establishment of vegetation over time, further enhancing their effectiveness in long-term erosion control.

ECO FRIENDLY COIR TWINE FOR THE HOP INDUSTRY

Eco Trends' coir twine has been a staple in the hop industry, particularly in the US and Europe markets. Hop flowers are crucial for flavouring and stabilizing beer. Our coir twine, hung on steel trellises standing arounding 6 meters tall, serves as the perfect support system for vertical growth, requiring minimal Lobar.

KEY FEATURES

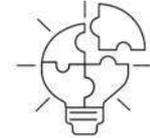

Exceptional Strength

Increased Yield

Eco- Conscious

Tailored Solutions

ECO FRIENDLY GARDENING COIR TWINE

Our gardening coir twine isn't just for hops. It's a versatile solution for eco-conscious gardeners everywhere.
