

TRAFFICOUNT 4

Vehicle counter

A standalone radar traffic counter designed for vehicle counting, classification and speed measurement. Using advanced Doppler radar technology, it delivers accurate measurements without any intrusion into the roadway. The device features fast and easy relocation between measurement sites, making it ideal for flexible traffic monitoring applications.

ADVANTAGES

- Battery-powered operation
- Easy installation and maintenance
- Optional solar power supply
- Compact housing design
- Vehicle classification and speed measurement

TECHNICAL SPECIFICATIONS

- Technology: 24.165 GHz Doppler radar
- Direction detection: Bidirectional
- Classification: Up to 7 vehicle classes
- Accuracy: approx 95%
- Speed measurement: 1–220 km/h
- Power supply: 230 V / battery / solar
- Connectivity: 4G, bluetooth, API
- Dimensions: 240 × 220 × 225 mm
