

## The Terrazza E-Weedee PRO® EGO Kit consists of :

### 1. The E-Weedee PRO® machine

Power	: 4,5 kW
Motor type	: DC motor 48V/120A
Rotation speed	: +- < 200 rt/min
Weight	: 79 kg
Dimensions	: 160cm x 80cm x 73cm
Noise level dB(A)	: 74 dB(A)
Hand/arm vibration ahwd	: 3.9 m/s2 A
Diameter work width	: 45 cm - Weedee® brush : 70 cm - TWT® brush
Battery running time	: Model 1 with 2 x 12 Ah batt = 2(*) hours(**)

Available models: : Model 1: 2 x 12 Ah batt + 2 x chargers

Model 2: exclusive of batteries and chargers

(\*) In case of typical professional use

(\*\*) Charge cycle: 800 to 1000 charges ( see EGO specifications)

### 4. Terrazza-EGO Super charger

Charger- 2 pack  
Charges 12 Ah in +- 90min

### 5. Terrazza-EGO Battery pack

Batteries - 2 pack 2x 12Ah

### 2. Weedee® weed removal brush

Removes weeds and mosses from the surface and the joints.

### 3. Terrazza Wire TECH®

Removes long and lush weeds as well as big parts of their roots from larger surface areas.

## The Terrazza E-Weedee PRO®: options and consumables

AXI®sweeper brush with collection box (optional)

Weedee® weed removal brush

Bundle of braided metal tufts

Bundle of synthetic tufts

Protection stop

### Consumables for Wire TECH®

# Terrazza E-Weedee PRO®

Professional weed removal machine

## Terrazza MC®

Innovators in green cleaning technology

**EGO**  
POWER BEYOND BELIEF™

## Terrazza E-Weedee PRO®: in depth and efficient weed removal with the Weedee® brush and the Terrazza Wire® TECH

The battery driven E- Weedee PRO® is a unique weed removal machine thanks to the **reduced rotation speed** of the brushes. Its **excellent manoeuvrability** allows the E-Weedee PRO® to remove weed and mosses from hard surfaces without the use of chemicals, high pressure or a thermic treatment.

Depending on the type of work, different types of brushes can be mounted on the E-Weedee PRO® machine.

### Multifunctionality at its best!

The **Weedee® brush** removes weeds and mosses from the surface and between the joints and can be used easily and quickly for an interim treatment of the surface.

The **Terrazza Wire TECH® Brush (TWT)**, with a working width of 70 cm, is ideal for more heavily soiled areas. The synthetic bundles and the braided steel bundles remove long and lush weeds from the surface. The bundles can be replaced in case of heavy wear.

For sweeping, either performing a daily sweep or sweeping up the collected weeds, **the AXI® sweeper brush** can also be mounted on the E- Weedee PRO® machine. The AXI® brush with or without collection tray is optionally available with the E- Weedee PRO® kit.

The brushes are each equipped with a connector that makes changing the brushes very easy and smooth.

The Terrazza E-Weedee PRO® can be used on all sorts of paved surfaces: terraces, driveways, parking lots, sidewalks, pavements, etc., in concrete, bricks, cobblestones, clinkers, asphalt, etc.,...

The Terrazza E-Weedee PRO® machine is especially designed for the needs of professional cleaning companies, contractors, landscape gardeners and for local authorities.

## Durable and ecological weed removal

Working with the E-Weedee PRO® provides double benefits in terms of ecological footprint.

Thanks to its rechargeable battery, **the E-machine produces no emissions and is CO2-neutral.**

With the addition of the EGO electric motor and the use of the Arc Lithium 56V battery, the machine has a high energy capacity and delivers high performance. Better, when brushing with the Weedee® or the Wire TECH® brush, **no chemicals are used.**

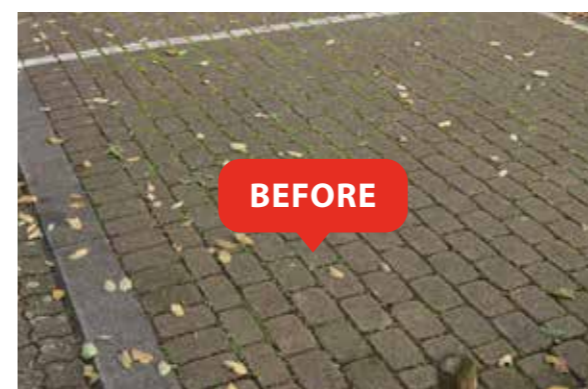

All this makes the E-Weedee PRO® the most ecological and ideal tool to use in the environment of plants, people and animals.

Terrazza MC® developed a **unique patented brush technology** that is the combination of perfectly controlled vertical pressure, minimal resistance and a reduced rotation speed. Thanks to this unique combination, **the wear and tear of the brushes is reduced to a minimum.**

The **Terrazza Wire TECH® (TWT)**, composed of bundles of Terrazza Synthetic tufts and Terrazza braided metal tufts, **removes easily long and lush weeds** from hard surfaces. Thanks to its unique shape, big parts of the **weed roots are also removed.** Weed removal with the Terrazza Wire TECH® is the ideal pre-treatment before an in depth weed removal with the Weedee® brush.

**The Weedee® brush removes weeds and mosses from the surface and the joints. The tufts stay nicely upright and remove the weeds and big parts of the weed roots from the joints.**

The Terrazza E-Weedee PRO® is a unique concept, especially designed with the Terrazza technology which stands for durable and ecological weed removal.

## Unique and superior: the Terrazza E- Weedee PRO®

Advantages of the Terrazza MC® – EGO technical corporation:

- The Terrazza E-Weedee PRO® with the EGO electric batteries are compatible with all professional hand tools from EGO powertools. (note: The E-Weedee PRO® machine can be delivered with or without the batteries)
- The Arc Lithium 56V battery delivers all the power of petrol, but without the noise, hassle or fumes.
- The running time: The E-Weedee PRO® machine is standard delivered with with two 12 Ah batteries which deliver a running time for about \*2 hours. With this configuration comes also a fast battery charger that has a super-fast recharge time of 80 minutes. There is also a built-in indicator for the left running time.
- Contains EGO battery system: easy charge & change

Advantages of the Terrazza Weedee PRO® EGO Technology

The Terrazza E-Weedee PRO® brushes are designed to maximize results at a reduced rotation speed. This provides the following benefits:

- **Removes weeds and big parts of the weed root**
- **No flying -potentially dangerous- sharp objects**, such as stones, etc.,...
- **No damage** to the surface, kerbs, walls, signposts, lamp posts, etc.,...

The machine is easy to operate and **pleasant to work with** thanks to the perfectly horizontal rotation of the brush.

Due to the nice even weight distribution and the large wheels, the Weedee PRO® has **excellent manoeuvrability.**

The handle is easy to fold (without the use of tools) which results in a compact size and that makes the E-Weedee PRO® **easy to store or transport.**
