

iREPAIR SC4

Service and charging station

A compact bicycle service station designed for installation in public spaces. It enables quick bicycle repairs and tire inflation 24/7, without the need for on-site staff. Available in two versions: the iRepair S1, intended for basic maintenance operations, and the iRepair SC4, featuring four charging points for electric bicycles.

KEY BENEFITS

- Remote connectivity with charging analytics
- Standalone operation 24/7
- Highly robust construction
- Minimal maintenance requirements
- Customizable design according to customer requirements

KEY FEATURES

- Charging analytics
- Robust metal housing for outdoor use
- Service tools secured with steel cables
