

YACHTING

SPECIAL GLASS, FROM DESIGN TO INSTALLATION

Since 1975, we have been operating in the glass industry with a specific goal: designing, manufacturing and installing special glass for various sectors.

What has always set us apart is the comprehensiveness of our services and the projects we undertake. We oversee every phase of the project, from co-design to installation, offering tailor-made solutions that we can execute thanks to our in-house equipment and a team of professionals who are constantly updated on the latest technological innovations.

Over the years, we have invested in facilities designed for more sustainable production, achieving the total recovery of processing water and generating up to 200 kWh of electricity from renewable sources.

OUR STRENGTHS

CUSTOM SOLUTIONS

For various sectors and applications

IN-HOUSE EQUIPMENT

Complete and sustainable production

ALL-ROUND SERVICE

From co-design to installation

MANUFACTURING AND PRODUCTS

We produce shaped, heated, laminated and safety glass capable of delivering exceptional performance in terms of strength, aesthetics, thermal and acoustic insulation.

We handle all necessary processing, including:

- Bending
- Thermal tempering
- Chemical strengthening
- Serigraphy
- Lamination

OUR GLASS FOR YACHTS INCLUDES:

- Windscreen
- Side glass
- Portholes
- Interior glass

Refitting

Our coordination with classification societies and the expertise of our technical department enable us to offer yacht refitting, a service designed to modernise and enhance each boat. By reducing weight, increasing

CASE HISTORY

TANKOA C109

MY Diamond Binta

The combination of gravity bending, multilayer lamination, and thermal and UV treatments allowed the creation of lightweight, durable, and high-performance glass, perfectly integrated into the yacht's design.

A result that combines aesthetics, comfort, and protection, in line with Tankoa's high standards.

YACHTING

Glass for yachts

- Co-design
- Research and development
- Survey
- Design
- Management of classification societies
- Production
- Quality control
- Installation

Safety, comfort and aesthetics are essential for yacht glazing. Our experience in the yacht glazing sector, coupled with our innovative equipment, allows us to manage each project through all its phases, providing effective and customised solutions.
