

FIBERTECH  [®]
COMPOSITES SOLUTIONS

GROUP
STILE ITALIANO

Trust the Innovation, make it Carbon!

WHO WE ARE

Fibertech Group Srl was founded early in 2014 by Michele Valentini, who decided to bring together people and experience for the design, production and marketing of innovative and high technical composite products.

We are a **young company** but our deeper knowledge and passion for the composite materials allows us to meet our customers' expectations.

Fibertech strongly believes in technical and commercial relationships with other companies in the composite sector.

MARKET SECTORS

AEROSPACE
AUTOMOTIVE
NAUTICAL
BUILDING

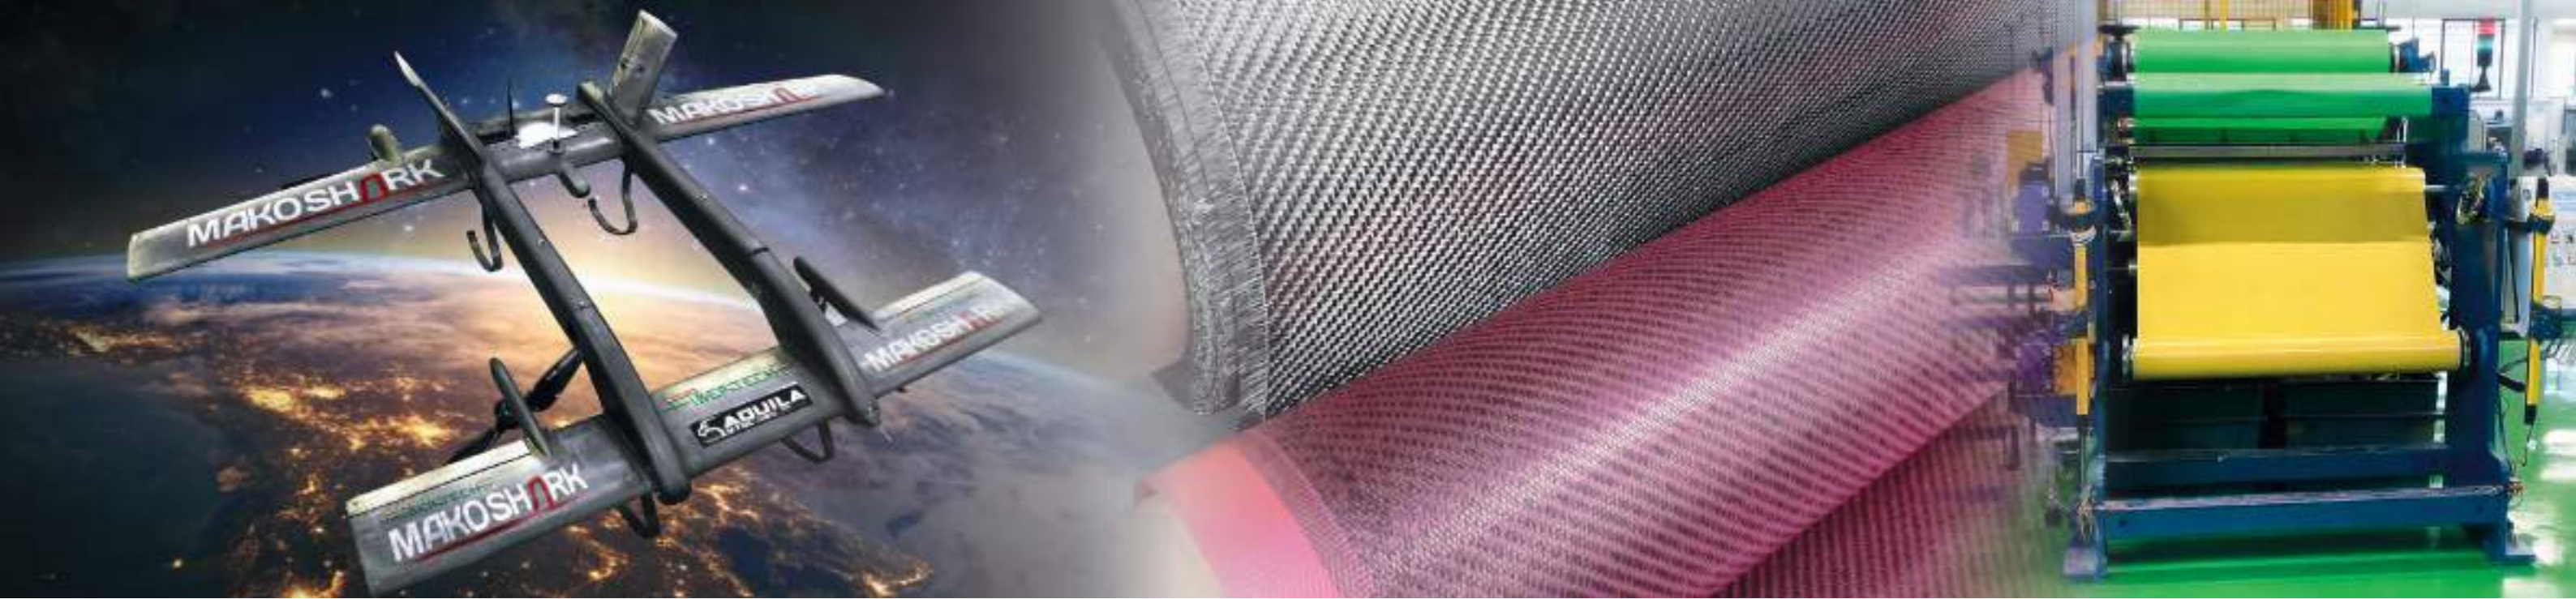

OUR FACILITIES

Headquarters and first production site in Marnate.
Second production site in Castellanza.

OUR FIBERLAB

FiberLab, our R&D Laboratory, is the heart of our studies on composite materials.
Well-equipped laboratory for chemical/thermo-chemical/mechanical analysis
and composite prototyping.

PREPREGS

The **prepregs** offered by Fibertech Group are divided in **two main classes** based on **epoxy formulations**.

A new formulation for the **Aerospace sector** is based on **Cyanate Ester**.

19 hot melt epoxy formulations for standard fabrics impregnation and natural fiber impregnation, under **NATURALIPREG brand**.

These formulations are suitable for: **tooling, nautical, cosmetic, structural, flame retardand, vacuum bag only, high Tg applications. Adhesive film and Class A film** are included.

7 hot melt epoxy formulations for recycled carbon non woven textile.

These formulations are suitable for: **tooling** under **MAGMA line brand; cosmetic, structural, high Tg applications** under **PAGLIETTA line**.
