

Mive Eco S.r.l.

The real professionals of the sea

About us...

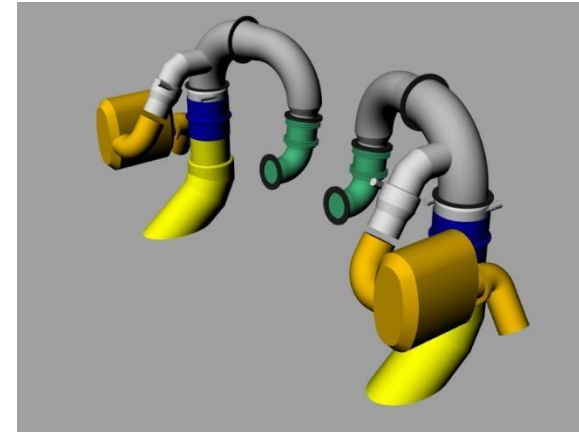

- ▶ Mive Eco srl was founded in 1991 and since the beginning of its activity, the company specializes in the production of thermal and acoustic insulation, highly innovative, and as primary objective the total satisfaction of the customer.
- ▶ Today Mive Eco srl is the leading company in the world in the production of complete exhaust systems for pleasure boats and working boats, counting among its customers all major shipyards.
- ▶ Mive Eco srl also turns out to be the only company in the international scene that designs and manufactures internally all products in its catalog: even the smallest component encloses the values that animate our work: the high specialization in the naval and industrial sector, the experience, the use of high quality materials, the high degree of specialization of the personnel, the environment and the daily care that our company is able to offer its customers before, during and after the implementation of a project.

Products and Services:

- ▶ Complete exhaust systems for marine engines
- ▶ Exhaust pipes classic and silenced
- ▶ Fiberglass silencers and terminals of any kind
- ▶ Exhaust systems with integrated IMO TIER III SCR system
- ▶ Thermal insulation, rigid, textiles or coated with metal sheet
- ▶ Gas purification systems
- ▶ Dry Silencers
- ▶ Expansion Joints in stainless steel
- ▶ Silicone hoses and sleeves
- ▶ Soundproofed boxes and containers
- ▶ Clamps , flanges and clamping collars
- ▶ Valves and Actuators
- ▶ Vibrations reduction systems
- ▶ Rollbar and handrails
- ▶ Bolts, Anodes and Gaskets Kits

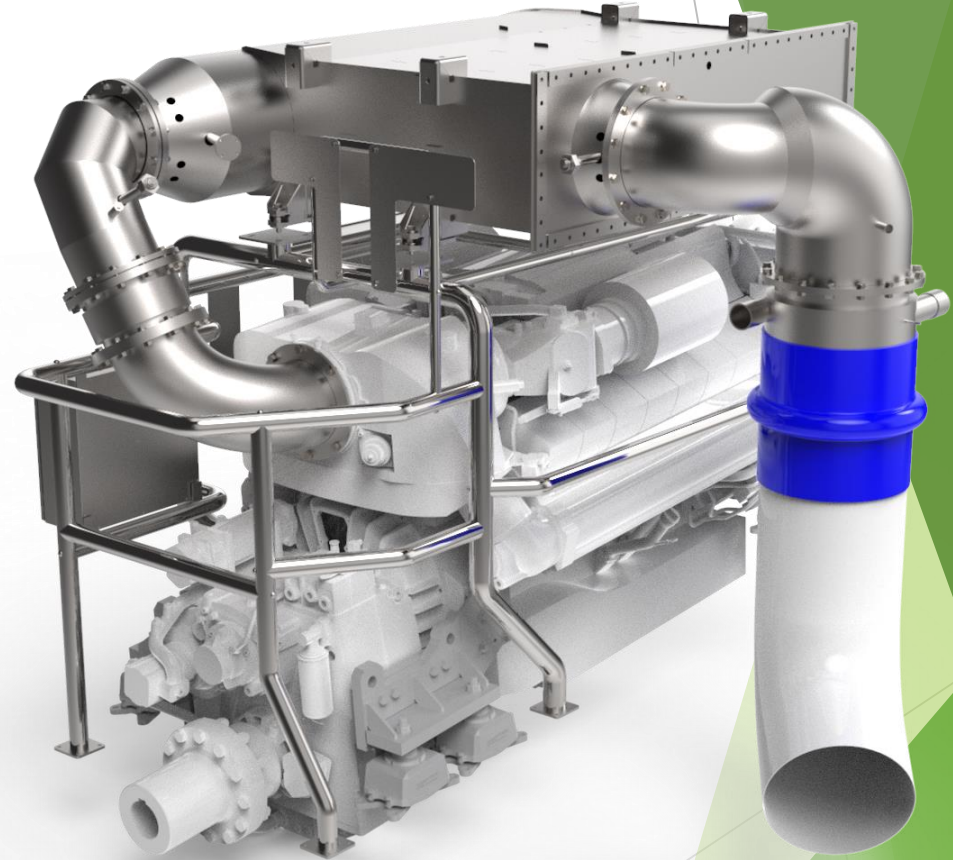

Exhaust systems for marine engines

- ▶ Mive Eco srl designs, manufactures and installs complete exhaust systems for boats of any type (new construction or refit)
- ▶ The first step is to study the most suitable solution for the customer in order to optimize plant performance, minimize noise and ensure over time the operator safety.
- ▶ Once the project agreed with the customer, our operators proceed with the survey, the construction of pipelines and supporting structures, the insulation, the construction of silencers (if required), the supply of all the accessories and if necessary also the installation.
- ▶ All of our products can be customized to the needs of space, noise and vibration and thermal insulation.

IMO TIER III SCR Exhaust Systems

- ▶ Mive Eco has integrated the latest generation SCR into its exhausts, offering a complete system of all connection pipes, risers, support structures and highly performing insulation in order to guarantee perfect operation, compliance with back pressure, surface temperature on the components and the safety of the yacht, despite the limited space available.
- ▶ All our integrated SCR systems are IMO TIER III certified as required by current regulations.

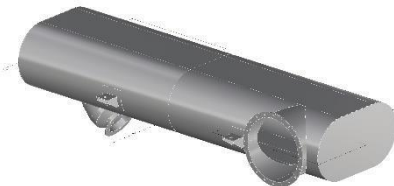

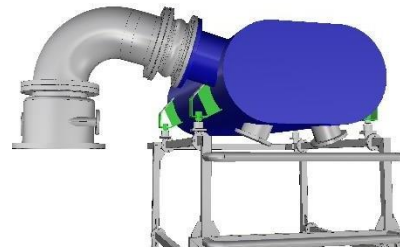

Insulations

- ▶ Mive Eco srl realizes thermal insulations rigid, textiles or coated with steel sheet or aluminum.
- ▶ Our insulation have been awarded the certification MED A1 3.18, and particularly our rigid insulation is fireproof, so even in the presence of flames in the engine room does not burn and does not emit toxic fumes.
- ▶ The Mive Eco rigid insulation also it is the only one currently on the market to allow repairs the pipe insulated without having the entire dismantling of the insulation.

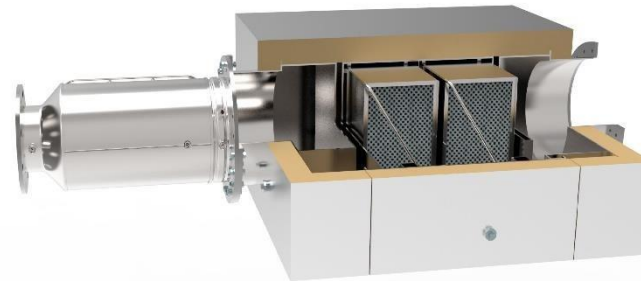

Dry and Wet Silencers

- ▶ Mive Eco srl also produces a wide range of silencers dry and wet high performance as regards the reduction in noise of the system.
- ▶ All our silencers can be sized as required and according to the space available in the engine room.
- ▶ We offer various types of silencers and various types of finishes: on the dry silencers you can choose as well as on the type of piping classical insulation (rigid, textile or metal sheet), the silencers wet where the insulation is not necessary we allow the customer to choose the surface finish and color finish.

Gas Purification Systems

- ▶ Parallel to the production of exhaust systems Mive Eco Srl install systems for smoke removal on new boats or during refit operations.
- ▶ Exhaust emissions are nowadays one of the most annoying problems for owners and guests of the yacht and at the same time cause pollution of our seas.
- ▶ Mive Eco srl assists customers in selecting the system to be installed, designs and manufactures entirely the same while optimizing the use of space residues in the engine room.

Soundproof boxes and containers

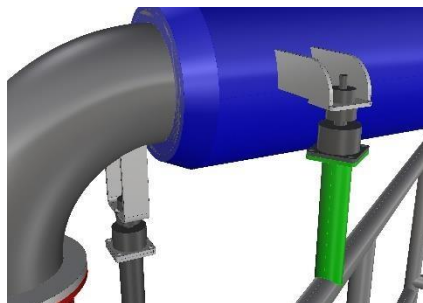

- ▶ Mive Eco srl also produces soundproof boxes for generators (standard or custom), and soundproof containers for industrial applications and for working boats.

Accessories:

We manufacture, install and commercialize also

- Metal expansion compensators
- Piping and silicone manicotteria
- Clamps, couplings and tightening collars
- Rollbar, handrails and anti-vibration mounts
- Valves and actuators
- Kit bolts and gaskets
