WOOD FIBER SUBSTRATE

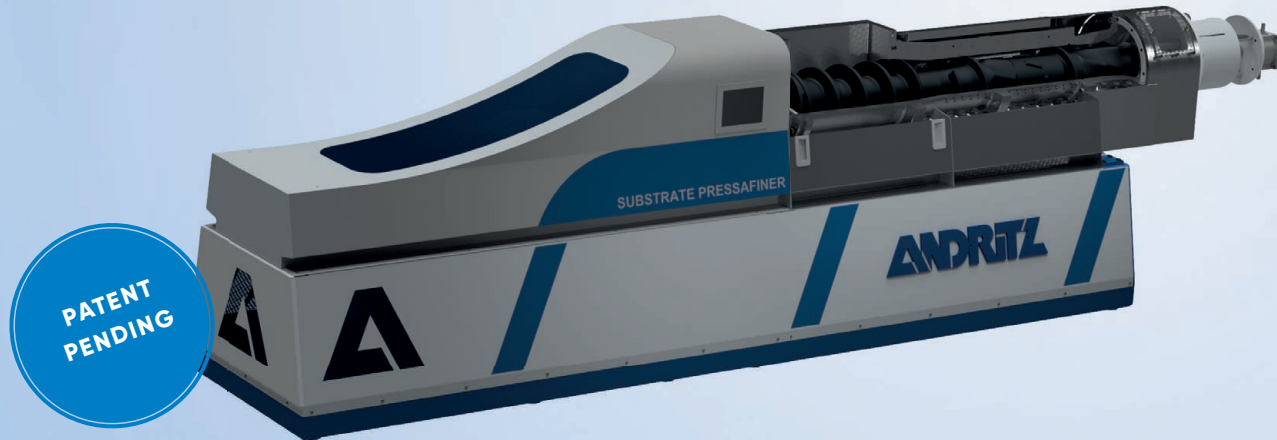

ANDRITZ INNOVATIONS FOR INDIVIDUAL SOLUTIONS

ANDRITZ

ANDRITZ Innovations: Substrate Pressafiner and Substrate Refiner

The **Substrate Pressafiner by ANDRITZ** is robust and designed for a long service life.

- Based on high-reliable existing equipment consisting of several well-proven technical solutions and also innovative patented concepts, the Substrate Pressafiner by ANDRITZ offers the right choice for economical operations.
- The Substrate Pressafiner provides you control of wood fiber properties independent of raw material variations: wood chips, recycled wood and also wood waste of different origins.

The **Substrate Refiner by ANDRITZ** offers outstanding fiber quality, that is reproduced from season to season.

- For complex applications where a wide range of wood fiber qualities with consistent homogeneity is required, a comprehensive range of individual solutions is available. As a global technology leader in the panelboard industry, ANDRITZ supports its customers with various refiner technologies that fully meet specific customer requirements.
- The Substrate Refiner produces wood fibers using fresh wood chips as raw material, optionally also in combination with recycled wood.
