

ROAM<sup>®</sup>

The ultimate companion for outdoor enthusiasts.  
Start your adventure with ROAM.

## THE ROAM CONCEPT

ROAM is the brainchild of Superyacht Tenders and Toys, working in partnership with Naval Architects Argo Navis. Born from clients increasing appetite for adventure and the desire to explore remote areas in safety and comfort.

Carefully designed to offer maximum deck and storage space, ROAM Boats are perfectly suited to the dive and toy arena.

Employing one of the most versatile and efficient techniques of boat building, ROAM's fully recyclable aluminium hulls deliver superyacht tenders of unrivalled seaworthiness.

Combining a highly robust form with impeccable high-end superyacht aesthetics, a ROAM boat is always adventure-ready.

## ADVENTURE READY

Perfectly aligning range and speed with comfort and capacity, ROAM Boats pose the ultimate multi-purpose tender.

The versatile ROAM series comprises durable, no-nonsense aluminium tenders designed for ultimate resilience and unrestricted exploration.

The ROAM ethos of adaptability ensures that the aluminium construction techniques enable customisation to suit any garage, deck or berth in the world. Choose your platform and build your boat with ROAM's extensive customisation options.

The adventure starts here.

## THE BUILD PROCESS

We can build your ROAM Boat in as little as four months. From concept and design to production and outfitting, we execute your entire project, without exception, from start to finish, under one roof.

Specialising in the construction of one-off vessels to perfectly suit the individuality of our discerning customers, ROAM's multi-faceted team will make you feel at complete ease at every project stage.

Experts in constructing aluminium and inflatable boats, we also deliver vessels in fibreglass and composite. Proud of our modern facilities, our skilled workforce brings prowess across aluminium, GRP, carbon, stainless steel, wood, and synthetics.

### Super strong aluminium hulls

ROAM hulls are constructed from aluminium, making them markedly lighter than fibreglass and steel counterparts while significantly reducing fuel consumption. ROAM Boats also boast an extended lifespan thanks to impressive tensile strength, durability, and relatively low maintenance requirements.

### Ultra-tough foam-filled tubing

At ROAM, the meticulous process of crafting tubes for our tenders is a testament to our commitment to quality. Utilising various foam densities, we fine-tune performance and strength. The foam undergoes an additional layering of Hypalon for exceptional durability and is perfected with a protective PU coating. This method guarantees unparalleled strength and resilience against the challenges of both your adventurous pursuits and the marine environment.

### Limitless level of customisation

The sky is almost the limit when tailoring your ROAM. The range showcased in this brochure serves as a mere reference; you can unleash your creativity in terms of size, appearance, and functionality, courtesy of the versatile hull construction. ROAM Boats go beyond the customisation boundaries set by other comparable vessels in the market.

## ROAM 8

The ROAM 8 has been designed with adventure in mind, whilst not compromising on deck space, comfort, or storage.

The blueprint is designed to accommodate storage for bikes, kayaks, stand-up paddleboards (SUPs), dive gear, wakeboards, Seabobs and much more.

## TURNKEY PACKAGES

Elevate your ROAM experience with our all-inclusive turn key packages. As part of the Superyacht Tenders and Toys family, we offer complete integration with all our specialist teams spanning tenders, toys, deck equipment and inflatables. Whether customising your vessel to accommodate a specific set of toys or components or sourcing items as part of a special order, our passionate team will take care of every step of outfitting for you.

## CARBON COMPOSITES

Our turnkey yacht tender packages, centered around cutting-edge carbon composite products, are meticulously designed to revolutionise your ROAM experience on the open waters. At ROAM, we recognise the significance of innovative materials in elevating maritime experiences, and our exclusive packages showcase the pinnacle of carbon composite technology.

- Boarding poles
- Boarding steps
- Ladders
- Awnings
- Lifting beams
- Flag poles
- Ski poles
- Tender whips

## TOY PACKAGE

Fanatical about yachts and water sports, our team offer some of the best product advice in the industry. From impartial guidance on the latest toys to tips and techniques for foil sports, diving, paddle and water sports, cycling and more. Whether its individual items, or full outfitting, the team are well set up to offer the latest products and packages tailored to suit your needs and budget. With the ability to source everything you need from under one roof, items can be grouped together thereby making additional savings. The 24/7 support extends beyond delivery, to warranty, and after sales.
