## TOILET ULTRA SLIM BEVELLED

This ULTRA SLIM toilet was specifically designed to fit in all those tight spaces on boats where the addition of a toilet seems to be an afterthought at times. This originally boasted the smallest footprint in a one-piece china bowl allowing it to fit on “the step” in most head areas. The Ultra slim Bevelled is an excellent choice for those tight on space and looking for simplicity with a variety of flushing options.

The base is impact resistant. It can be installed either above or below the sea level. The running cycle is completely automatic and eliminates wastewater through a high performance pump that allows drainage of waste up to 7 m. in height and at a distance of 70 m.

This hydrovacuum toilet can use an automatic water system or a flush pump installed onboard for water inlet. It is fitted with an electronic switch to regulate automatically water inlet and outlet at 2 different stages: first the bowl is filled up with clear water, and then waste is discharged by leaving the bowl empty and clean. The water consumption is very low (about 1 – 2,5). Flush pump or electrovalve to be ordered apart.. Port connections: Inlet. 19mm. 3/4", Outlet 25/38 1"1/2

## AERATOR RECIRCULATION KIT

The "cartridge" Recirq Kit recirculates livewell water to keep it cooler and rich in oxygen. This self-contained system feeds a separate aerator spray head and works even while you are underway and cannot use a thru-hull connection.

Add this kit to any tank that already has a freshwater fill system. Or use as a backup pump for a fail-safe system.

Recirq Kit includes:

- 500 GPH or 750 gph Aerator pump with short inlet, threaded outlet
- kit aerator spray head
- Stainless Steel strainer
- 2 x Plastic hose clamps
- 3/4" diameter x 23" long poly hose
- Straight thread-to-barb connector

5700609116 550 gph kit 12v

5700609135 750 gph kit 12v

5700609136 750 gph kit 24v.
