ECO-PRO

Mold & Mildew Stain Remover

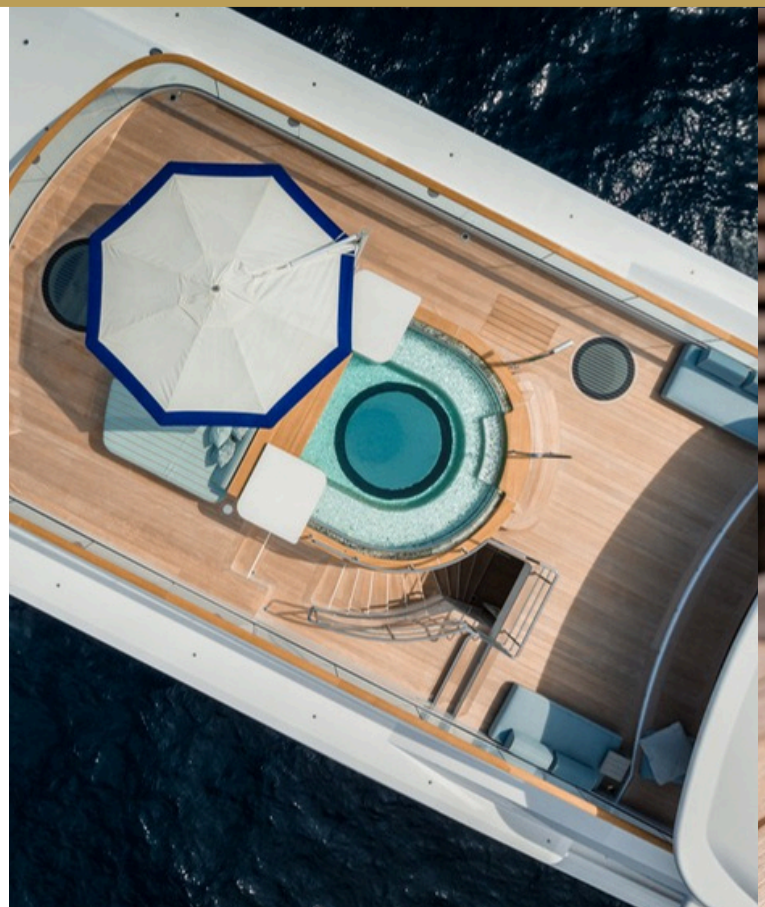

The Professional's Choice

Established in 1983 and employee-owned, Teakdecking Systems (TDS) specializes in designing, manufacturing, and installing premium marine decks for the worldwide yacht industry, while also developing professional products for deck installation, repair, maintenance, and care.

What Makes Us Different?

Decades of hands-on marine decking experience shape every TDS product we develop. From installation through ongoing care, our products are created to meet the real-world needs of yacht builders, shipyards, captains, crew, and marine professionals worldwide.

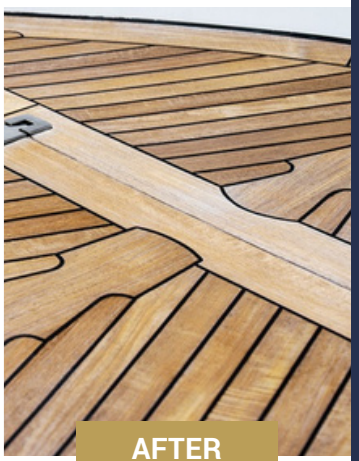

TDS ECO-PRO Mold & Mildew Stain Remover

BEFORE

AFTER

ECO-PRO Mold & Mildew Stain Remover is a plant-based, pH-neutral concentrate developed in-house by Teakdecking Systems for marine deck care.

Designed to help lift visible mold and mildew staining from teak and other marine surfaces, **ECO-PRO** offers a practical solution for stains that can be difficult to address through routine cleaning alone.

ECO-PRO is part of the **TDS ECO Deck Care System**, working alongside **ECO-100** for teak cleaning and **ECO- 300** for cleaning and brightening. Together, the system provides a practical, professional and environmentally safe approach to ongoing teak care and maintenance ultimately ensuring a longer enjoyable life for your decks.

Why TDS ECO-PRO?

Plant-Based Formula
A plant-based approach developed specifically for professional marine deck care.

pH-Neutral
Formulated with marine surfaces in mind, including teak and surrounding deck materials.

Targets Persistent Mold & Mildew Stains
Helps remove visible mold and mildew staining that routine cleaning may not fully address.

Highly Concentrated
A little goes a long way, making ECO-PRO efficient for both routine maintenance and heavier staining.

Up to 8 Gallons From One 32 oz Bottle
At standard dilution, one bottle produces up to eight gallons of ready-to-use solution.

Excellent Coverage
Approximately 100–120 sq. ft. of coverage per mixed gallon, depending on conditions and application.

Versatile Across Marine Surfaces
Designed for use on teak and compatible surrounding marine surfaces, helping simplify onboard maintenance.

No Harsh Acids, Phosphates, Biocides, or Bleach
Formulated as an alternative to more aggressive approaches. ECO-PRO is biodegradable and safe for use in marinas.

Formulated by Teakdecking Systems
Formulated in-house by a company with decades of hands-on experience designing, installing, repairing, and caring for marine decks.

Made for Real-World Yacht Maintenance
Designed with the needs of yacht crew, captains, boat owners, shipyards, and marine professionals in mind.

Concentrated Performance. Simple Application.

1 Mix with Fresh Water
For standard mold and mildew stain removal, mix 4 oz of ECO-PRO concentrate with 1 gallon of fresh water. For heavier stains, mix 6 oz per gallon. Do not mix with seawater.

2 Apply to a Dry Deck
Apply the ECO-PRO solution evenly across the deck or stained surface using a brush, deck pad, or large deck squeegee. If the deck is too hot to the touch mid-day- wet with water to bring the surface temperature down. Best time of application is in the morning.

3 Let Sit, Then Scrub
Allow the solution to sit for 5 minutes, keeping the surface moist. Do not allow it to dry. Scrub with a multi-directional deck pad or soft brush to help lift stains.

4 Rinse Thoroughly
Rinse the surface well with fresh water to remove cleaner residue and loosened dirt. Allow the deck to air dry.
