

Emate Reverse osmosis systems

Multi-functional water dispenser

PCT/CTO/RO three kinds of water quality

- ◎ Multi-water quality: PCT water can used for fruit and vegetable cleaning; CTO/ Ultrafiltration water can used for cooking; RO water is used for directly drinking;
- ◎ Convenient: Horizontal shaft filter design, first step twist, second step pull, easy to change the filter;
- ◎ Safety: Integrated waterway, integrated molding, refuse water leakage, can be matched with intelligent faucets, water quality monitoring, filter life reminder;
- ◎ High-efficiency: The whole pipes are 1/2 inches, large water flow: 2.08L/min, reduce waiting. 70% water production rate, energy saving and high efficiency, reduce waste, rated total pure water up to 6m³.

Product parameters

Applicable water quality	Municipal water	work pressure	0.1-0.8MPa
Applicable water temperature	5~38°C	Rated Total Net Water Capacity	6m ³
Rated pure water flow	2L/min	mixer	6/8 inches intelligent faucet
Filtration stages	PCT+CTO+RO	Product size	310×405×310mm
RO water quality	In line with the Ministry of Health "living drinking water quality processor health safety and functional evaluation Specification a reverse osmosis treatment device" requirements.
