

The Citea ticket vending machine is a tailor-made solution for intelligent on-street parking management. Thanks to its high level of modularity, key components such as the payment system, power supply and integrated communication can be combined to provide individual solutions. The Citea is fitted with a solar panel to guarantee energy-efficient operation. Parking charges can be paid quickly and easily in cash or by card. Customised colour schemes together with individual advertising opportunities add the finishing touches to this optimum range of services.

Advantages

- Visual elegance and robustness
- Simple & self-explanatory operation
- Highly suitable for individualization (function and design)
