

Rulefinder Simplifies Compliance with EU, UK and International Standards for Manufacturers

For companies navigating the complexities of EU and UK legislation, Rulefinder has emerged as a comprehensive tool, providing all the necessary documents for product design, manufacturing, and compliance assessment. With a subscription, users gain full access to EN and ISO standards, key legislative texts, and official guidance for both regions.

The platform's standout features include its 'intelligent-hyperlink' system, allowing users to seamlessly cross-reference documents with live links and pop-up summaries. Additionally, expert insights within the documents offer valuable background information, helping users understand the context behind the standards.

Rulefinder also offers flexible subscription plans, tailored to specific industries.

One of its most popular tools is the free-to-use Pressure Equipment Category Calculator, designed to help manufacturers determine risk categories in line with the EU Pressure Equipment Directive (PED).

We now offer users the availability to print from Rulefinder.

For those in the recreational boating sector, Rulefinder's award-winning CEproof software is another essential resource. This tool simplifies compliance with the EU Recreational Craft Directive (RCD) and the new UKCA regulations, providing all the necessary documentation. CEproof is available in modular packages to meet a variety of compliance needs.

With its extensive resources and user-friendly design, Rulefinder is making compliance more accessible for manufacturers across industries.

More than just standards

Have a look at our Pressure Equipment Category Calculator is **FREE** to use. It is the fastest tool to determine the risk category according to the EU Pressure Equipment Directive (PED).

About Us

At Rulefinder, we lead the market by offering solutions designed by expert engineers with deep knowledge of each industry and its unique needs. Our team goes beyond standard documentation by providing comprehensive reviews, enriched with technical insights, to offer you informed, valuable guidance for better decision-making.

EN & ISO standards for both SMALL and LARGE craft

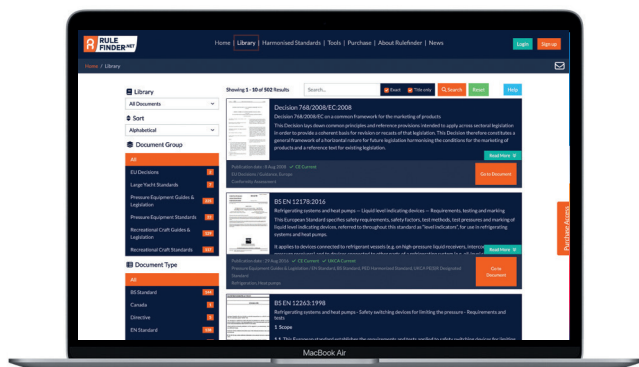

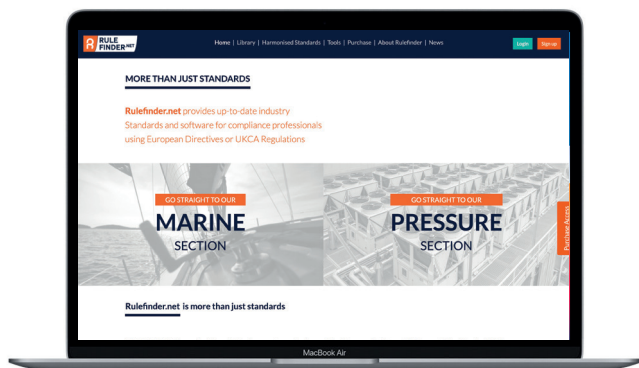

- Both original PDF + html with active links
- Current + superseded editions
- Table of dates: publication, EU/UK harmonisation, expiry of presumption of conformity

UK and EU Legislation:

- The EU Recreational Craft Directive (RCD) and UK 'RCR'
- Small craft MGN from MCA

Guidelines including:

- RSG Guidelines (from the forum of EU Notified Bodies for RCD)
- EU Commission's RCD Application Guide (known as the 'CC document')
- EU Commission 'Blue Guide' for all Directives

Pricing
