

Odor control

15 years of expertise in enzymes & beneficial ferments

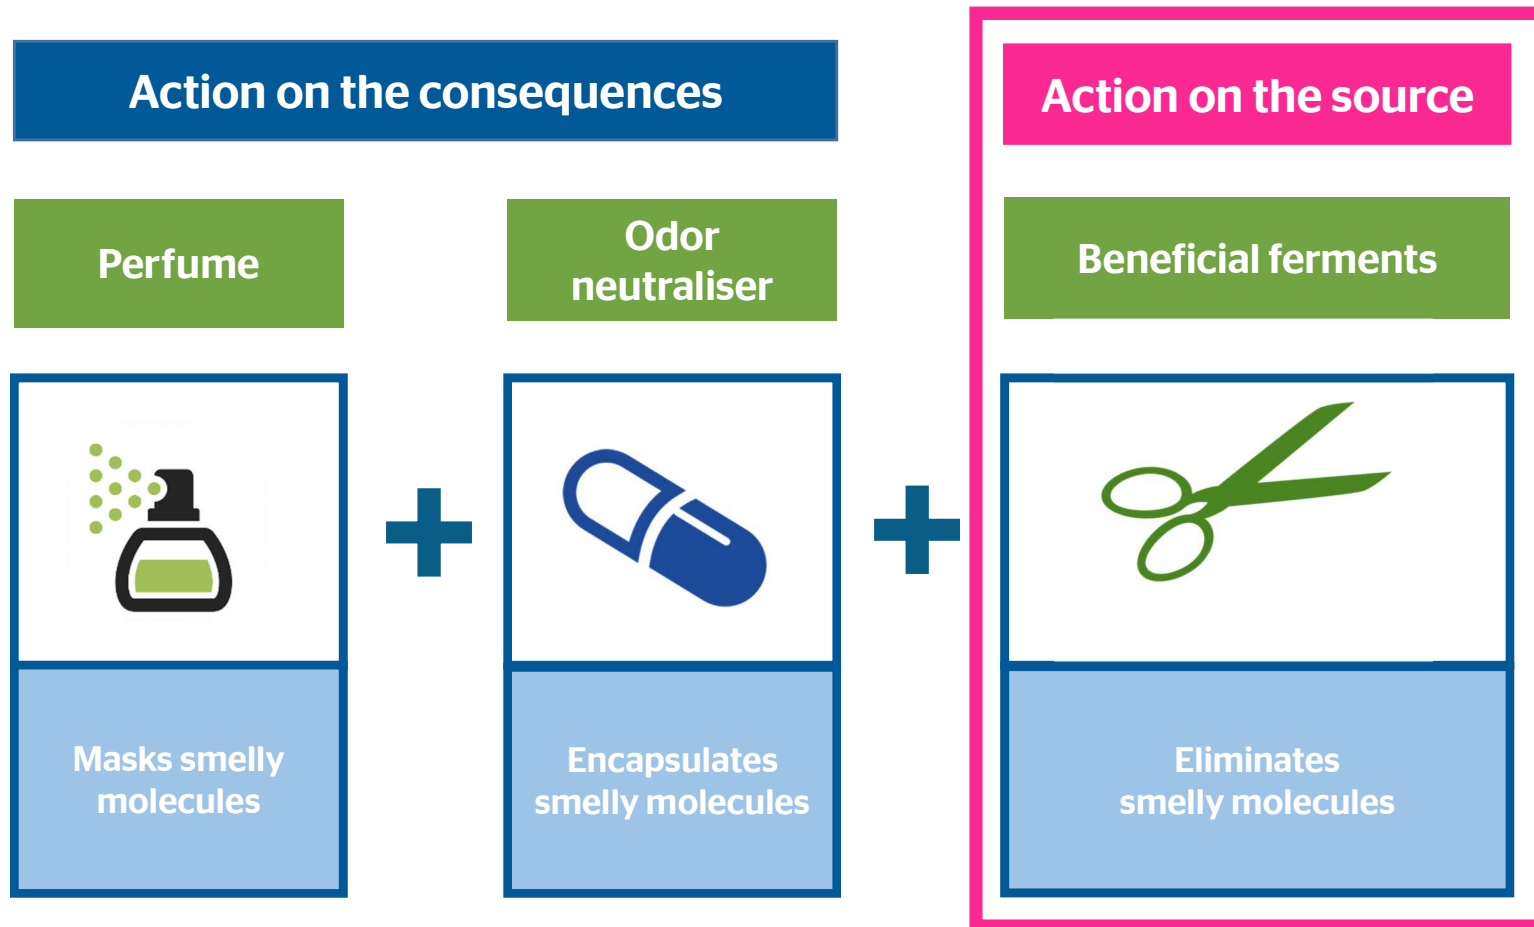

Beneficial ferments = enzyme factories

Odor destruction

thanks to enzymes/beneficial ferments

How does it work?

The power of biotechnology = 3 actions simultaneously

Odor destruction in various environments

1. Sanitary

2. Dirt bins

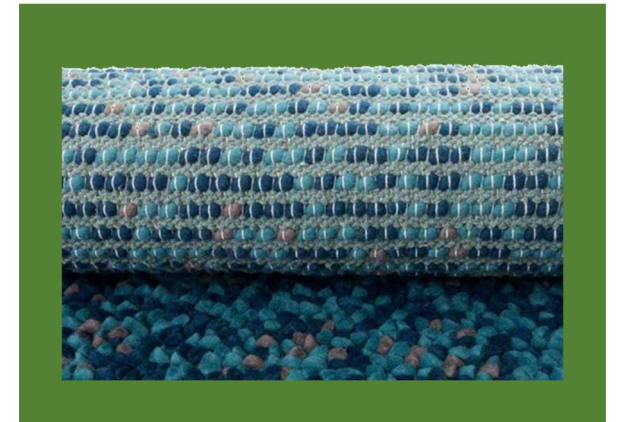

3. Kitchens

4. Pipes & drains

5. Floors

6. Carpets

Odor destruction

1. in sanitary environments

Biotechnology enables you to clean, unstick dirt, and descale, while deodorizing tenacious smells instantaneously and for good!

Complete odor control range with floor & surface cleaner, WC gel, urinal blocks, and odor destructing spray, all with the same fresh mint perfume

Odor destruction

1. in sanitary environments

ENZYSAN: powerful deodorizing biotechnological cleaner

- for any type of floor, sanitary installations, drains and pipes, urinals, toilets etc.
- destroys any type of tenacious smell, such as urine smells, even when impregnated in tile joints
- 58% of raw materials come from renewable sources

Odor destruction

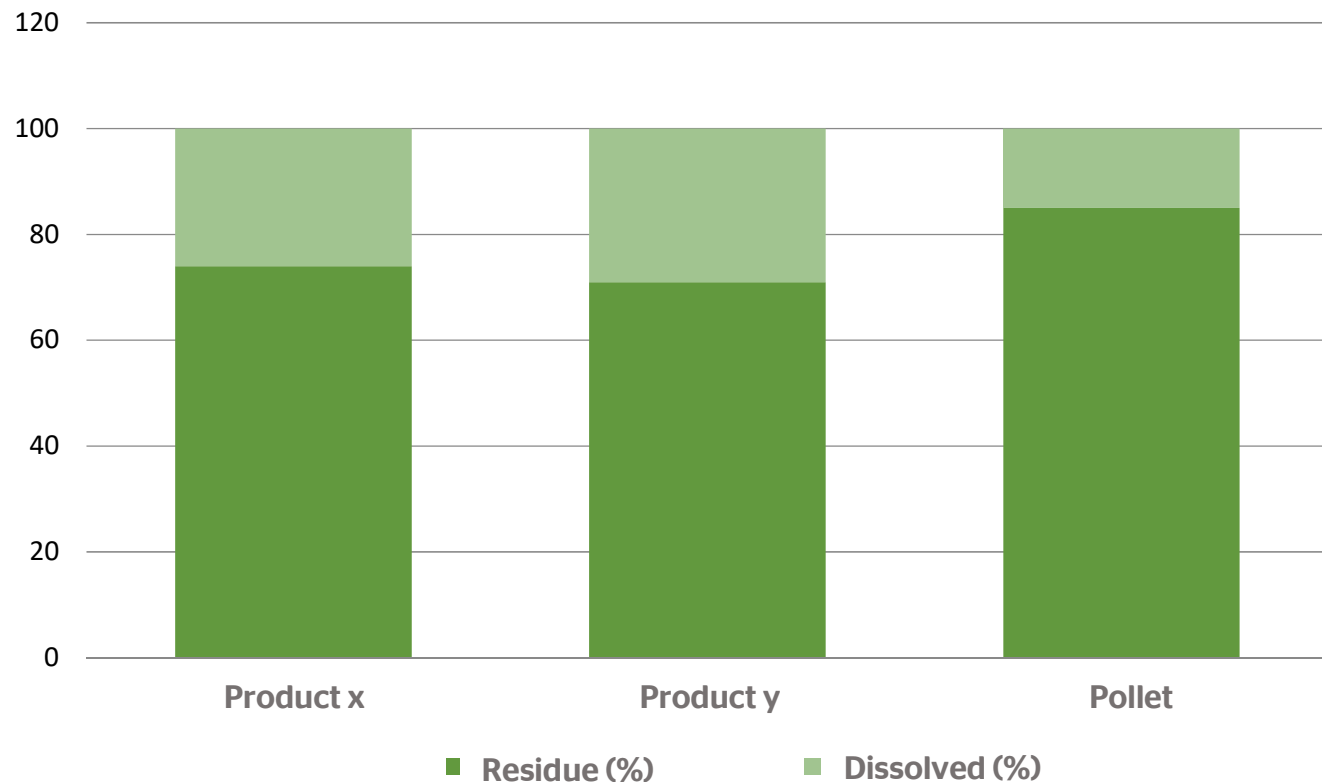

1. in sanitary environments

Enzybloc: cleaning & descaling block for urinals and floor drains

The new generation of Enzyblocs dissolve 45% less quickly than other products on the market today

Immersion testing in water at 20°C during 24h

Odor destruction

1. in sanitary environments

Enzygel : biotechnological deodorizing descaling gel

- descaler containing organic acids
- sanitary installation and piping cleaning product
- beneficial effect on septic tanks and wastewater
- lengthens the lifespan of your drains and sanitary installations, because they won't be any scale deposits
- product without any specific user risk

Odor destruction

2. in dustbin rooms

PolBio EnzyFlash enables you to **eliminate bad smells instantaneously** in **any type of environment** **without having to clean it** (dustbins, ash trays, shoes, cat litter, sanitary plugholes ...)

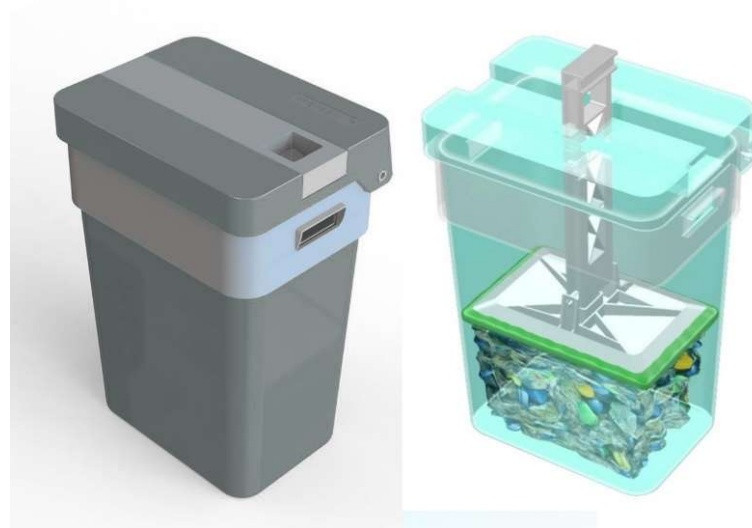

Odor destruction

2. in dustbin rooms

PolBio EnzyFlash eliminates bad smells
instantaneously and for good!

Odor destruction

2. in dustbin rooms

**PolBio EnzyFlash
eliminates bad smells
instantaneously and for good!**

Enzyflash deodorizes instantaneously...

shoes

sports materials

cat odors

car carpets

sports bags

dirt bins

Odor destruction

3. in kitchens

POLBIO ENZYFLOW

improves the efficiency and lifespan of your grease traps

- concentrated biotechnological product for maintaining drains and grease tanks
- eliminates existing deposits in pipes
- easy dosing via an automated dosing system
- eliminates bad smells, and significantly reduces operational risks
- lowers the emptying frequency of grease tanks, because it augments its grease digestion capacity
- improves the lifespan of your installations a
- conform environmental legislations

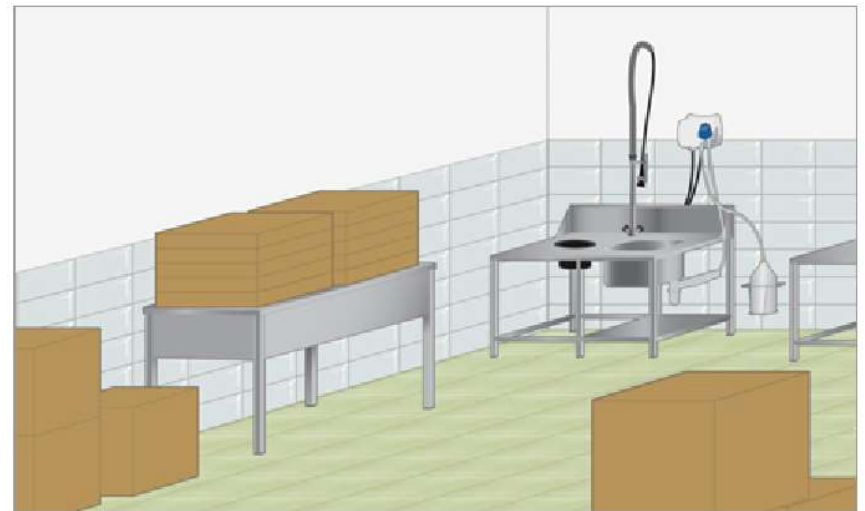

Odor destruction

3. in kitchens

Electronic dosing system that regulates the flow of beneficial ferments & enzymes for wastewater treatment purposes in drains and grease traps

The programmable dosing automatically injects the right dose of **POLBIO ENZYFLOW**

Odor destruction

3. in kitchens

POLBIO ENZYFLOOR: degreasing biotechnological detergent

- multi-purpose cleaner for kitchens
- destroys impregnated floor & surface grease, excellent product for non-slip surfaces
- reduces the risk of work accidents by falling, because it reduces slipperiness
- timesavings, because no rinsing
- Long-lasting action thanks to selected enzymes
- fit for food-contact environments

Odor destruction

4. in pipes & drains

POLBIO ENZYPIPE: concentrated biotechnological cleaner especially conceived for cold gel obstruction in cooling systems

- for drain maintenance; eliminates existing deposits in pipes
- eliminates bad smells
- prevents clogging
- enzymes & beneficial ferments digest grease, starch, cellulose & cold gel obstruction in cooling systems

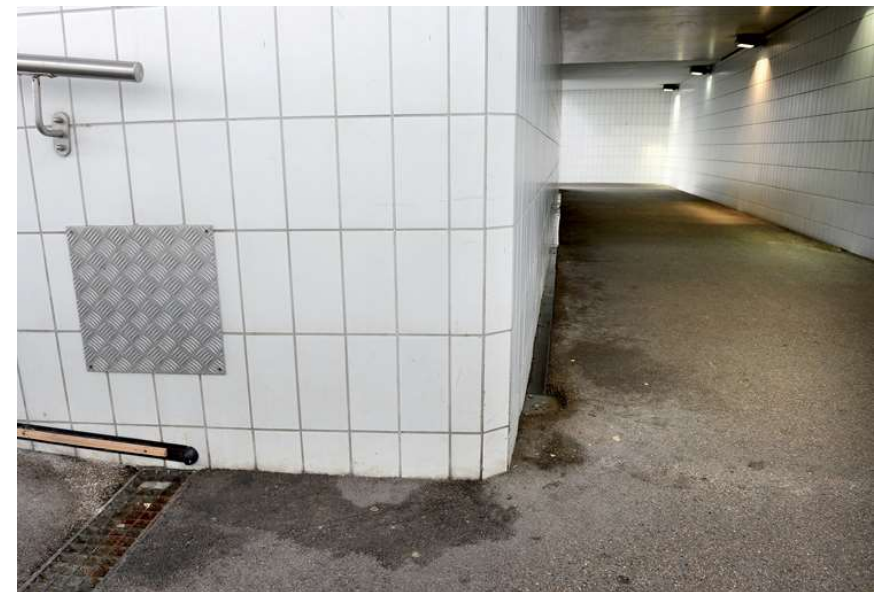

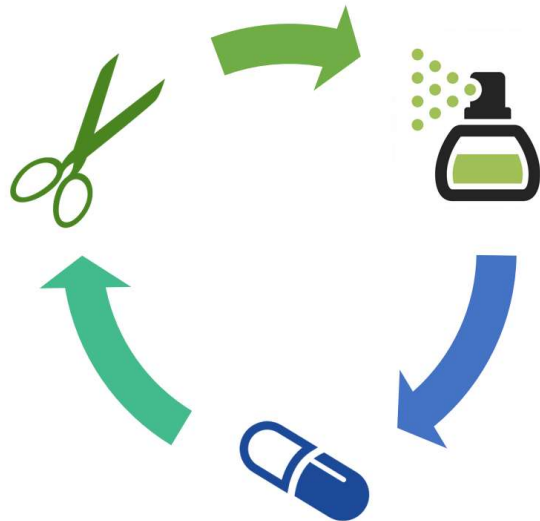

Odor destruction

5. for floors

ENZYSAN 2000: concentrated deodorizing biotechnological cleaner

- excellent cleaner for any type of floor, for example parking lot floors soaked with urine
- with ecological label
- 69% of raw materials come from renewable sources

Odor destruction

5. for floors

Superior products with proven efficiency

vs.

PolBio Enzyzan 2000 is 2 times more efficient than Febreze
according to a test carried out in 2014 (ASTM E 1593)
by the University of Lowell Massachusetts, USA
thanks to its capacity to **destroy bad smells,**
and on top of this, it's an **outstanding cleaner.**

Odor destruction

5. for floors

ENZYSAN 2000

Discover how
PolBio EnzySan
cleans & deodorizes thoroughly
thanks to biotechnology

Odor destruction

6. for carpets & textiles

POLBIO TAPINET: concentrated foaming carpet shampoo - dry foam

- in-depth cleaner
- beneficial ferments & enzymes destroy bad smells
- stain remover
- revives the colors
- powerful flower fragrance
- actively contributes to carpet mite elimination
- prevents the re-deposition of the dirt after treatment
- for the renovation and restoration of fitted carpets
- manual or single-brush application with foam system

New formula: even more efficient cleaning & degreasing, removes difficult stains more easily

Beneficial ferments & enzymes destroy all bad smells instantaneously and for good

Thank you
