CEILING TV LIFT

ULISSE

CEILING TV LIFT

The installation of a ceiling-mounted TV lift is an innovative and practical solution for optimising space in modern homes, where furniture often requires a balance between functionality and aesthetics.

This system allows the TV set to be completely hidden when not in use, thus freeing the living area from visual clutter and creating a tidier, cleaner environment. By using the ceiling, an often neglected space in furniture, an element of surprise and modernity is added to the room. Not only does it improve the overall aesthetics, it also provides convenient access to the TV set at the touch of a button or via a remote control, thus ensuring maximum convenience. Furthermore, a ceiling-mounted TV lift is particularly useful in rooms with limited space, such as flats or multifunctional rooms, where every inch counts. By choosing suitable materials and design, this system can integrate perfectly with any furnishing style, from the most classic to the most contemporary.

DISCOVER OUR COLLECTION...

ULISSE SERIES

ULISSE

Our motorized tv mount ceiling **Ulisse** is made of a box, with tv fixed on tilting opening bracket that moves up to 120°, giving you the best view experience, whether you're sitting on the sofa or lying in the bed.

ULISSE ROTOR

Inserted and fixed in the middle of a room, **Ulisse Rotor** it will be the right choice. With a rotational movement up to 350° you'll be free to set and watch your tv from every point or angle of your room.

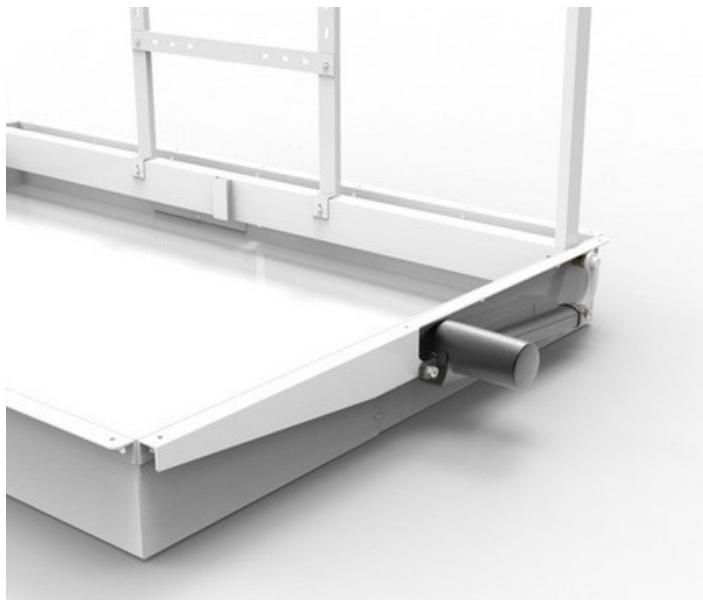

ULISSE EXTENDER

For high ceiling we recommend **Ulisse Extender**, with a downward race up to 1 mt from the ceiling to the floor.

PREMIUM COMPONENTS

By choosing quality components and high performance motors we realize effort and reliable products durable over the time, completely silent that support 100 kg weight.

All parts are made with max. precision, assembled between in a perfect combo, trying to extract performance and saving space finding the right fit.

Thanks to our engineered software applied with the control board, all the movements and functions can be managed by a small remote control quickly and easily

APPLICATIONS

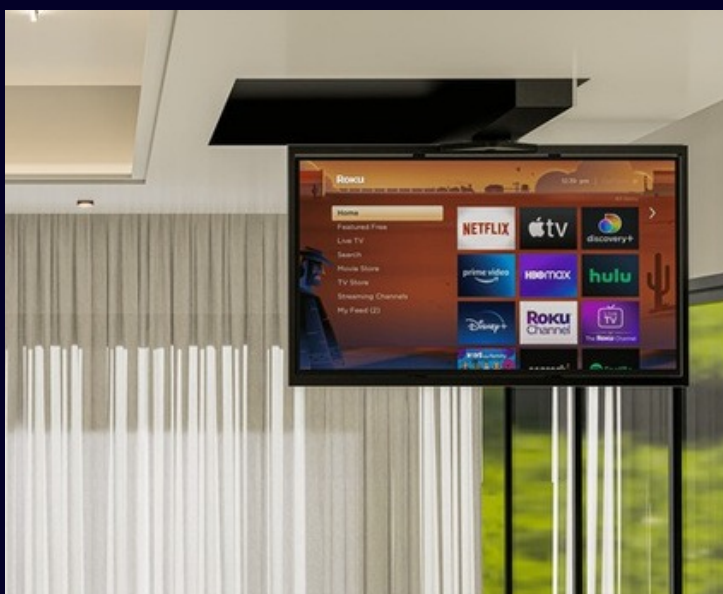

Installing a ceiling TV lift in different areas of the home offers numerous advantages and a great deal of freedom of choice to improve the aesthetics and functionality of the space.

A ceiling-mounted TV lift is an elegant and technological solution for optimising space and improving aesthetics in various rooms. Among its main advantages is its ability to conceal the television when not in use, freeing up space and maintaining an uncluttered environment. This technology is particularly popular in hotel lobbies, where an atmosphere of luxury and modernity is essential. In a living room, a ceiling-mounted TV lift can transform the room, allowing for a versatile area for relaxation or entertainment. Making clever use of the ceiling, using innovative solutions such as the TV lift, allows you to integrate technology and elegance in a harmonious and functional way.

APPLICATIONS

In the bedroom, our Ulisse Extender offers the luxury of watching television from the comfort of the bed, with the option of extending the TV to the desired height for perfect, comfortable viewing

A ceiling-mounted TV lift with up to 350 degrees rotation is an innovative and versatile solution for those who wish to optimise space and enhance the viewing experience in the home. The ability to rotate up to 350 degrees ensures optimal viewing from anywhere in the room, offering maximum flexibility and comfort.
