### Delphy Locations

Delphy optimizes crop production through knowledge development and knowledge implementation taking into account location, crop, sustainability and market demand. Delphy contributes to health, food safety, sustainability and the well-being of the people of this world.

Delphy Academy guides growth and flourishing of employees by supporting them in their development as experts, professionals and persons. A job at Delphy is based on personal expertise, strengths and interests. Working at Delphy is possible in a wide range of positions in the five main pillars of our company: consultancy, research, training, data-driven crop management and projects.

Delphy has an independent position in knowledge and advice.

Delphy's culture is based on trust, freedom, responsibility and entrepreneurship.

Through our website you can order our crop protection guides, brochures and newsletters.
