

Typ C
Made for the road.

**Safely regulated.
Simply operated.**

MOBILE TRAFFIC LIGHTS
MADE IN GERMANY

 **FABEMA**®
MOBILE TRAFFIC LIGHT SYSTEMS

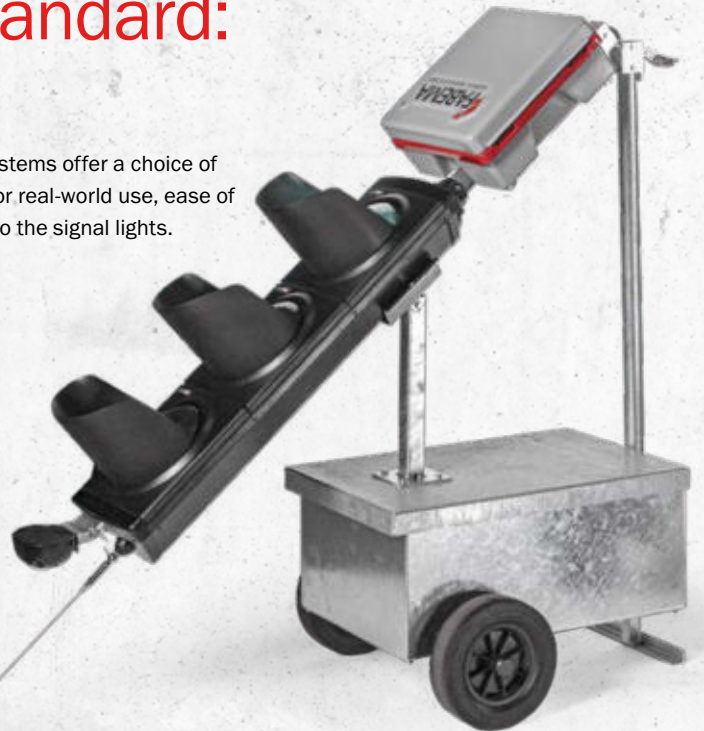

BASIC and EURO series

Three designs. One standard: FABEMA® quality.

Whether FABEMA® BASIC or EURO series – our mobile traffic signal systems offer a choice of three designs. Each follows the same principle: maximum suitability for real-world use, ease of operation, and uncompromising quality – from the battery enclosure to the signal lights.

Standard equipment for all designs:

- Radio / cable / quartz mode
- Vehicle actuated via radar detectors
- Full-surface LED with the highest phantom protection class
- Multi-frequency technology with **automatic** frequency switching
- 12 V battery or optional 230 V power supply
- Plug-in battery connection system
- Large battery enclosures for two 180 Ah batteries
- Optional features such as video detection, fire brigade control, code lock, handheld radio transmitter, remaining-red-time display, and more

CLASSIC hinged
Space-saving. Practical.
Perfect to handle.

The new FABEMA® BASIC series

Type C with Quick-Start. For those who value efficiency.

Ready in no time. Clearly controlled.

The new FABEMA® BASIC has been specifically developed for alternating one-way traffic at roadworks in Germany – wherever traffic control needs to be simple, safe, and fast. Whether for a planned project or a short-notice installation: thanks to the integrated **Quick-Start**, the traffic lights are operational within seconds – no technical expertise required.

Key facts of FABEMA® BASIC:

- ✓ Tested in accordance with German standard TL tLSA 23: Type C
- ✓ Tender-compliant according to German standard VOB with a wide range of daily programs
- ✓ Test tool for standards-compliant commissioning and documentation in accordance with German standard TL / RiLSA

- ✓ FABEMA® BASIC Quick-Start: equipped with all functions required for a German standards-compliant Type C system
- ✓ Alternating traffic control with **2 up to a maximum of 8 traffic lights**
- ✓ Automatic calculation of the cycle time

**THREE CLICKS.
ONE START.**

**FABEMA® BASIC –
so you can focus on what
matters most: your roadworks.**

CLASSIC

The standard for tough use.

FABEMA® designs – as flexible as you need

KOMET

Telescopic.
Stackable.
Logistics-friendly.

FABEMA® EURO series

The Export Version*

Key facts of the FABEMA® EURO 2000:

- ✓ Pre-installed programs ranging from alternating two-stage traffic systems to four-stage intersections
- ✓ Freely programmable special configurations for intersections up to eight-stages
- ✓ Expandable to up to eight main signals and eight parallel signals
- ✓ Flexible subdivision: for example, six EURO 2000 units can be configured as two separate three-stage intersections or three alternating two-stage traffic systems
- ✓ Signals can be configured as pedestrian signals via software settings
- ✓ Five different traffic response modes: extension of green time, waiting during red, waiting during green, delayed extension of green time, delayed waiting during red

**Note: Please observe the applicable national regulations when operating this variant!*

FABEMA® Service

Always reliably by your side.

At FABEMA®, our partnership does not end with the delivery of the traffic signals. Our systems operate reliably – and if something does not work as expected, we are there for you personally: direct, responsive, and solution-oriented.

What sets our service apart:

- ➔ **Direct access to our technical experts** – no call centers, no handovers
- ➔ **Experienced contacts** – who know your system
- ➔ **Clear, practical advice** – focused on solutions
- ➔ **Fast response times** – by phone or on site

We are prequalified:

Normec VQZ
Zertifiziertes QM-System
Reg. Nr.: 11988-3018
DIN EN ISO 9001:2015
