

Alligator L-tank®

Flexible storage for liquids

The Alligator L-tank is a storage system suitable for all, non-aggressive, liquids up to 500 m³. The simple rectangular shaped L-tank provides the solution when a quick or temporary storage of liquid is necessary.

This flexible tank is very easy to install at any stable and levelled surface. On a hard surface a protection layer is advisable. Due to its low shape, the L-tank fits easily into the landscape.

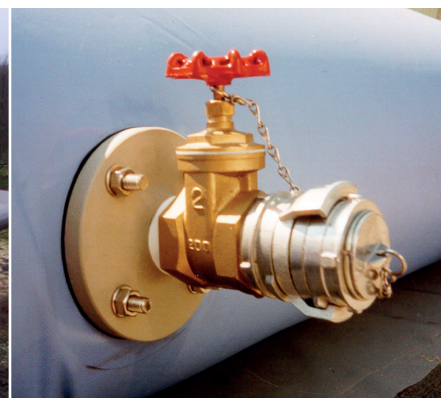

Albers Alligator produces the L-tank from a polyester fabric which is coated on both sides with PVC. The reinforced material is especially suited to resist

all mechanical forces which may occur during use of the L-tank.

A long lifetime is guaranteed thanks to maximum stabilization against the effects of ultraviolet radiation. To store drinking water a special material is available.

The Alligator L-tank can be provided with almost every kind of connection or valve.

Albers Alligator and partners provide you with reliable advice on placing, using, emptying and cleaning the L-tank after use.

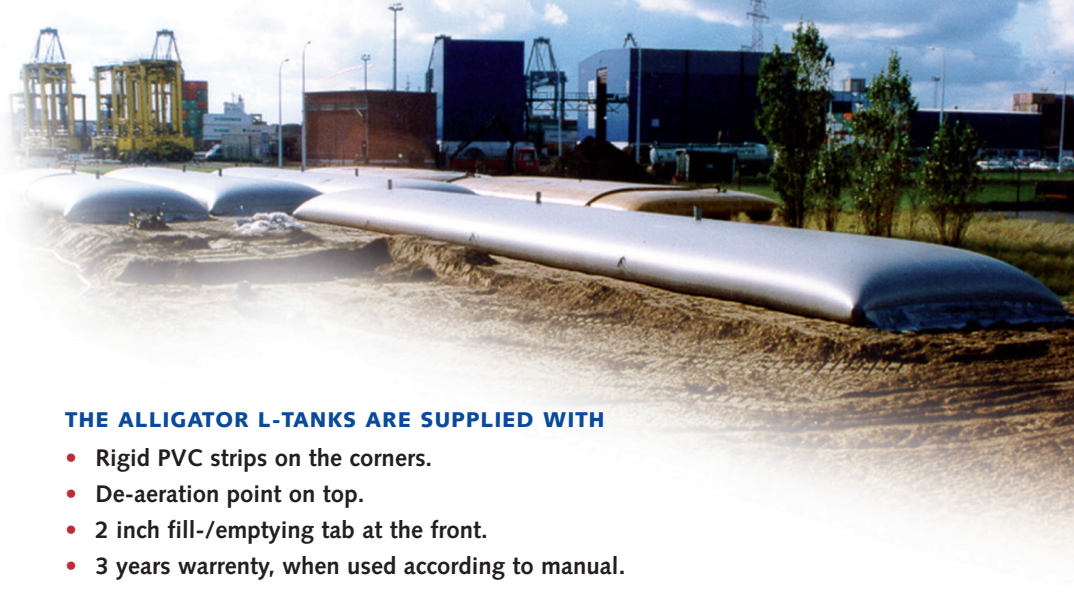

Albers Alligator
Specialist in flexible constructions

SINCE 1903

BY APPOINTMENT TO THE
COURT OF THE NETHERLANDS
