

IGLOO

THE ENCHANTING CHILL, THE SURPRISING DESIGN

IGLOO

THE FURNITURE PIECE THAT CONCEALS LUXURY

Ilgloo is an integrated system of elegance, technology, and comfort, designed to offer a unique sensory experience in the most exclusive environments. A gesture — silent, smooth, fluid — and the surface rises, revealing a refrigerated core, ready to hold everything that makes every moment special.

PERFECT INTEGRATION OF AESTETICS AND FUNCTION

The simplicity of clean lines and discreet power coexist in a motorized system powered by a high-capacity rechargeable battery. Designed to move effortlessly thanks to integrated wheels, it's perfect for spaces that demand flexibility, elegance, and functionality.

THE HIDDEN HEART OF SERVICE

The motorized refrigerated compartment of IGLOO is designed to provide maximum service efficiency within a compact, rational, and easily accessible space. The internal organization is crafted to accommodate and showcase a selection of beverages and accessories, with particular attention to stability, ease of use, and quality of materials.

An interior designed to impress...

The motorized refrigerated compartment of IGLOO is designed to offer maximum configurational freedom, providing a versatile space that can be organized according to the specific needs of the client and the context of use.

Among the possible setup options, one of the most requested configurations includes:

- A central housing for 4–5 bottles (wine, sparkling wines, or soft drinks)
- Two compartments dedicated to containers for fresh fruit, ice, snacks, or garnishes
- A suspended rack to hang up to 6 flute glasses upside down
- A steel shelf for lowball glasses, tumblers, or accessories

This arrangement optimizes the compartment's capacity, making the most of space and accessibility, transforming IGLOO into a true mobile service station.

Each element is easily removable, hygienic, and made with quality materials, but above all customizable: from the number of bottles to the type of glasses, from finishes to accessories, IGLOO adapts perfectly to the client's style and requirements.

MATERIALS & CONSTRUCTION

DURABLE QUALITY

IGLOO is crafted with premium materials selected to ensure durability, longevity, and style. The stainless steel structure provides strength and protection against the elements, making the table suitable even for outdoor environments. The interior is fully insulated to maintain the ideal temperature for extended periods without loss. Wood finishes enhance the exterior appearance, with options available in various wood types and surface treatments, allowing for seamless integration into any décor setting. The system is powered by a rechargeable automotive-grade battery, designed to offer high autonomy and reliable performance without the need for electrical connections or visible cables.

APPLICATION

ELEGANCE IN MOVEMENT

IGLOO is designed to meet the demands of contemporary, high-end hospitality, where aesthetics and functionality must coexist harmoniously.

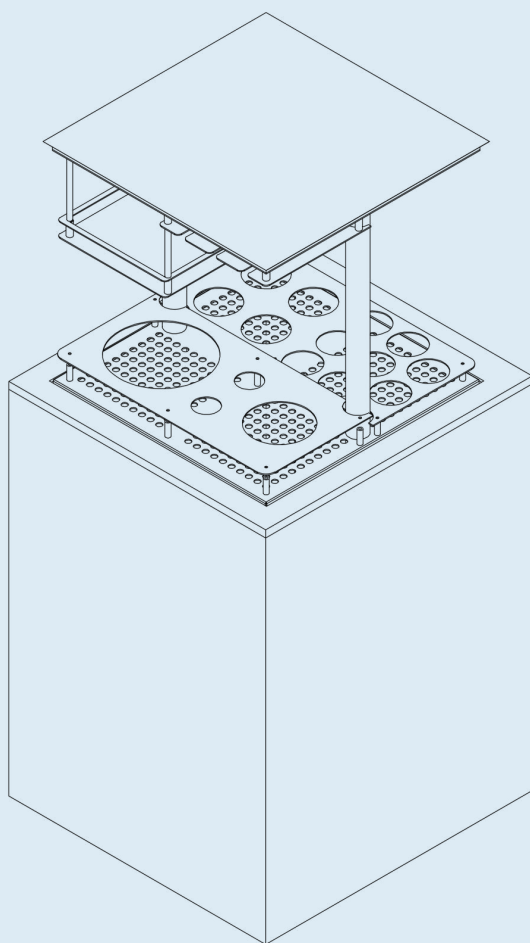

The integrated wheels and complete energy autonomy make it ideal for spaces requiring versatility and freedom of placement, even in environments without dedicated technical infrastructure.

IGLOO is particularly suited for:

- Hotels and resorts
- Yachts, Cruise ships and private boats
- Lounge areas and poolside terraces
- Spas, wellness centers, and private suites
- Private properties and outdoor verandas

Thanks to its compact design, customizable aesthetics, and ability to provide a fully refrigerated service without technical constraints, IGLOO seamlessly integrates into settings where comfort, efficiency, and prestige are essential.
