The POP DOCK FENDER

**MAXIMUM PROTECTION.
MINIMAL SPACE.
EFFORTLESS HANDLING.**

DESIGNED TO ROLL, NOT RUB.

The rotatable foam body of the POP Dock Fender offers optimum protection for the boat hull by reducing friction – for maximum protection and long enjoyment of your own boat.

MORE SPACE. MORE FREEDOM.

Thanks to its rolling axle, the POP Dock Fender is not only functionally superior, but also a real space saver: up to 10 cm of additional space is created in the box – an advantage that is immediately noticeable.

WELL THOUGHT OUT DOWN TO THE LAST DETAIL.

The foam body can be changed without tools. At the end of the season, simply remove it and store it in a protected place – this will keep your POP Dock Fender clean and free from the elements over the winter.
