

**ANTIBACTERIAL
FOR UP TO 500 WASHES**

Next Level Hygiene

The new r-MicronSafe

Introducing r-MicronSafe

The most powerful antibacterial cloth we ever built

In healthcare, every surface tells a story. We created r-MicronSafe to help make that story one of safety, trust, and hygiene.

Designed specifically for high-risk environments, r-MicronSafe combines the performance of advanced recycled microfibre with built-in antibacterial protection that prevents bacterial growth in the cloth itself. This helps to clean faster, safer and with greater confidence, day after day and wash after wash.

By reducing bacterial growth in the cloth, r-MicronSafe minimises the risk of cross-contamination and extends its hygienic usability, making it ideal for environments with high hygienical requirements.

The new r-MicronSafe is a premium healthcare cloth built for modern hygiene demands.

*Contains the active substance silver sodium zirconium hydrigenphosphate to prevent growth of bacteria in the cloth.

Next level hygiene

- Non-woven microfiber cloth made from min. 71% recycled PES
- Designed for superior hygiene and performance
- Streak-free and lint free cleaning
- High durability of min. 500 washing cycles
- Externally certified to physically remove up to 99.9% of viruses, bacteria, and fungi through high-performance microfiber technology
