

# The operating system for your production

hexafarms offers automated and highly precise yield forecasts weeks into the future. Get access to all the data across your operations in one place using wireless cameras and sensor technology today.

## WHY IT'S IMPORTANT

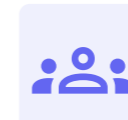

### Increase revenue

Utilise increased accuracy and future production numbers to sell produce earlier and at better prices.

### Optimise plant quality

Harvest your produce at optimal ripeness to ensure the highest plant quality and shelf life.

### Team efficiency

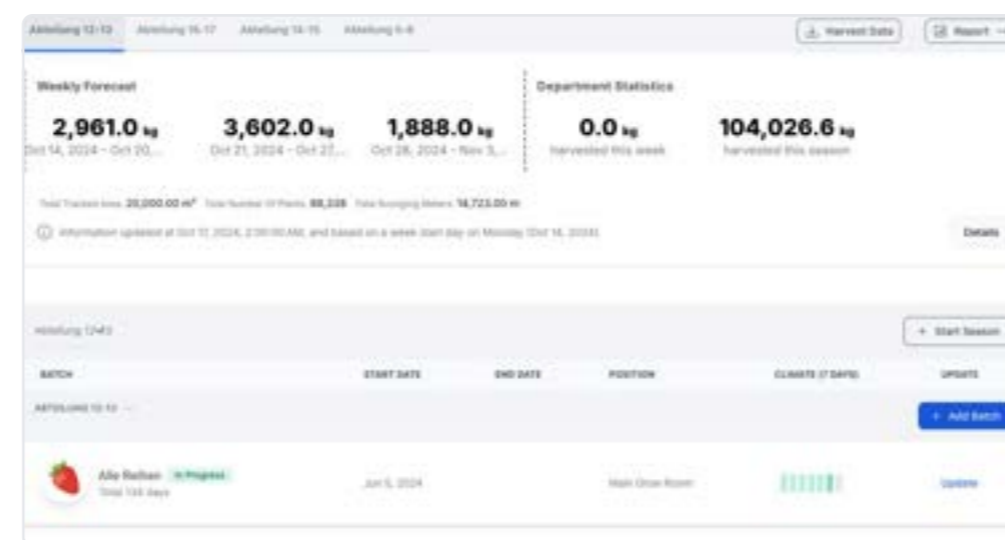

No more hours pouring over measurements, constant communication, wasted labour.

## HOW IT WORKS

### Observe & track

Get all the data about your yield, plant health, climate, crop plan, and so much more in one simple dashboard.

### Measure

The hexafarms system takes in 100+ parameters from climate data, images, sensor readings and more.

### Optimize

Forecasts will go straight to your production and sales teams preventing unnecessary time and revenue loss. It's never been this easy!

<<<< IN THE WORLD OF FOOD PRODUCTION BEST-IN-CLASS YIELD FORECASTING IS KEY >>>>

## Stay up-to-date, 24x7

Link your forecast to all your other systems through our APIs. This makes sure your cooperative, wholesalers, and sales team always have the best data to get you the best price.

## WHAT HEXAFARMS DOES FOR YOU

 Yield forecasting

 Digital crop registration

 Production reports

 Health evaluation

 Automated plant measurements

## SEAMLESSLY INTEGRATES WITH

# No matter your setup, we have the solution

The hexafarms system adapts to your operations, making integration seamless. Whether you grow your crops in a greenhouse or a foil tunnel we're there to help you get the most out of your season!
