

# MatGrip Installation Guide

Use this guide to properly install your MatGrip magnetic base and mat. Follow each step to ensure secure placement and long-lasting performance.

## PREPARATION & MATERIALS

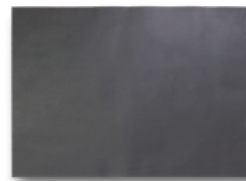

### PREPARATION:

- Ensure the floor is clean, dry, and free of debris.
- Check that you have the correct magnetic base size for your mat.
- Make sure you have enough space to fully unroll the mat during installation.

### MATERIALS:

Carpeted Mat  
(with MatGrip backing)

46x69 cm Magnetic Base or  
(For 85 cm wide Mat)

69x76 cm Magnetic Base  
(For 115 cm wide Mat)

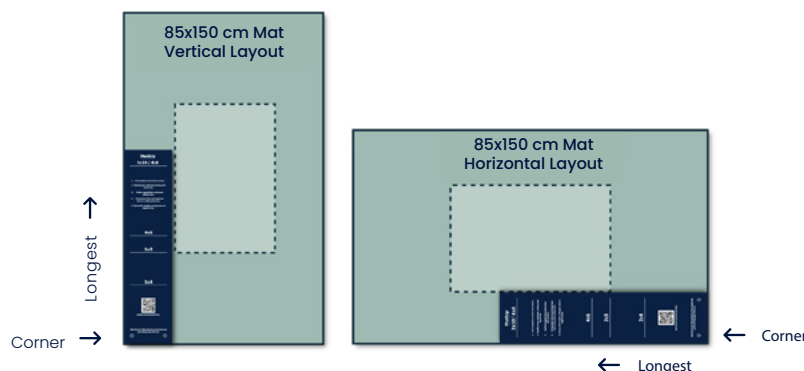

MatGrip Placement Guide

## INSTALLATION

### 1. Place the Guide

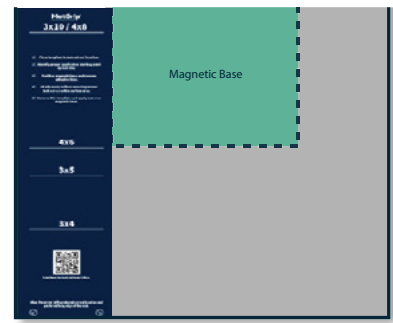

Locate your MatGrip Placement Guide and position it in the mat's ideal location. Make sure the corner and longest edge of the guide are aligned correctly. This ensures the base will be oriented properly for both vertical and horizontal applications.

**TIP:** For some applications, you may need to temporarily place the mat in the desired location to ensure the fit and desired aesthetics.

## 2. Locate Base Placement

Identify the size of your mat using the printed placement marks on the guide to find the correct bottom corner placement for your magnetic base. The base should rest flush against the guide.

## 3. Apply the Magnetic Base

Peel back part of the adhesive liner, align the base with the guide, and press to secure. Then remove the rest of the liner and press firmly across the entire base to ensure full adhesion, starting from the center and pressing outward to remove any trapped air.

## 4. Position Mat Over Base

Once the magnetic base is fully adhered, place your mat directly on top of the base.

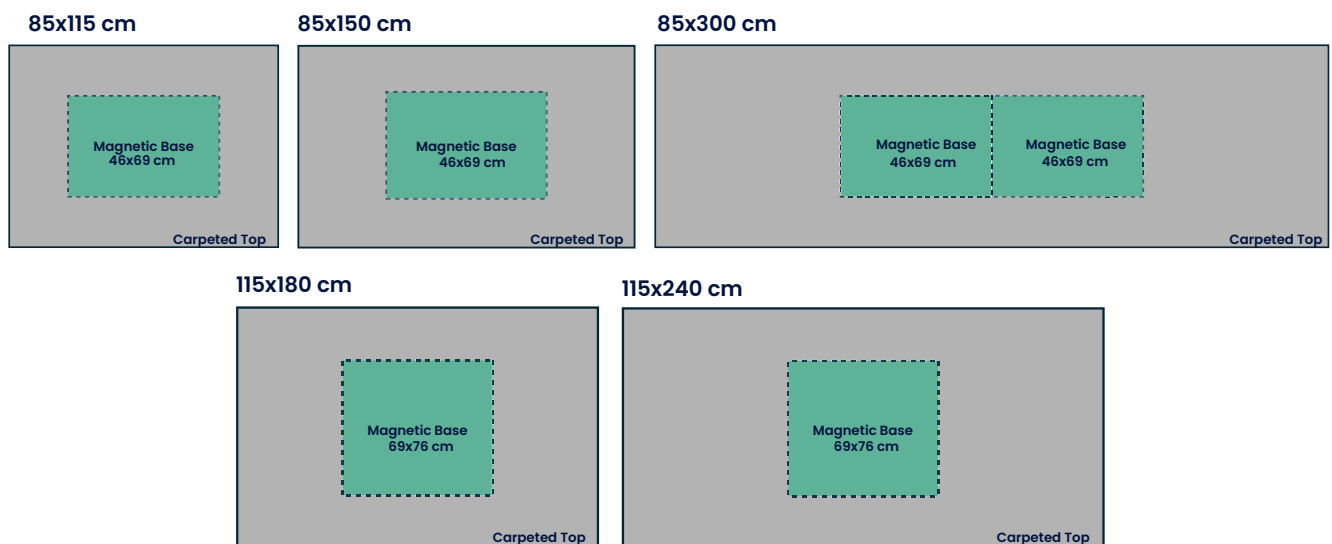

**TIP:** Roll up your mat and set the leading edge in place over the base, then allow the mat to unroll naturally into position.

## 5. Make Adjustments (If needed)

If adjustments are needed, gently lift a corner and create a small ripple of air beneath the mat to release the magnetic hold and allow for easier repositioning.

**NOTE:** The magnetic backing is intentionally oversized to accommodate small variances in placement or production.

## AVAILABLE SIZES AND SPECIFICATIONS

**NOTE:** For longer mats, such as 85x300 cm, install two 46x69 cm magnetic bases linearly. For larger mats, such as 115x180 cm or 115x240 cm, use the 69x76 cm magnetic bases as directed.
