

Cabinet Office

Recycling done with style

The solution that brings order to your spaces.

Design, functionality, and sustainability come together to transform a daily task into an experience of care and attention

The **Saclò Cabinet Office** is a piece of furniture with a minimalist and functional design, **specifically conceived for waste sorting** in professional and public environments such as offices, schools, hospitals, and commercial spaces.

Thanks to its **continuous bag system**, it helps keep spaces clean and orderly, making waste disposal practical and efficient.

Available in wood or powder-coated steel, **it features a solid, modular structure** with configurations of two or

three openings.

Its **wide range of finishes** makes it suitable for any setting, combining operational efficiency with aesthetic refinement.

Upon request and with minimum order quantities, it can be customized with special colors, unique finishes, non-standard configurations, and personalized graphics.

Gas spring for upper shelf support

The gas strut keeps the upper shelf raised during the replacement of the bag refill, making the operation easier and more convenient.

Enhance your Cabinet Office with these practical optional features and make the most of its potential

The practical steel lids help **maintain a more hygienic environment by blocking unpleasant odors.**

To optimize internal organization, you can add a shelf—a simple yet effective solution for **dividing the space and creating a convenient storage compartment.**

The perfect finishing touch for your Cabinet Office

Standard or customized: choose how you want to stand out

Saclò Cabinet Office units are available with two standard graphics, designed to blend seamlessly into any environment.

Upon request, we can customize the cabinet and back panel with **your**

company's logo and branding for a truly distinctive result.

Turn your Cabinet Office units into communication tools, making your spaces more welcoming and aligned with your brand identity.

Cabinet graphic version A (Standard)

Cabinet graphic version B

Custom client graphics

The Cabinet can also be customized with your own graphics or logo.

Cabinets ordered without back panels or graphics will be delivered with high-resistance high-tack PVC stickers, featuring a waste type indicator on the upper shelf.

If Version B is selected—by default including stickers applied to both the shelf and the doors—it is still possible to customize the Cabinet by applying the stickers to only one of the two surfaces.

Customizable backrest with graphics

A functional element that speaks your brand's language

The back panel of the Cabinets provides valuable space for **clear, consistent, and effective communication**.

In addition to supporting the functionality of the unit, it can serve as a true tool for branding and information. It can be customized with waste type indicators **to make waste sorting immediate and intuitive**, or with corporate graphics that enhance your

logo, brand colors, and the overall style of the surrounding environment.

This solution combines **practicality, visual identity, and attention to detail**—helping create more organized, recognizable, and well-designed spaces.

Available for all
two- or three-hole
models

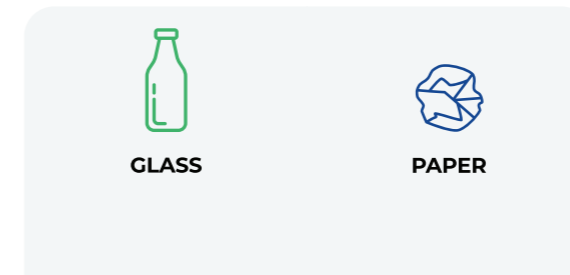

Backrest - Version 1

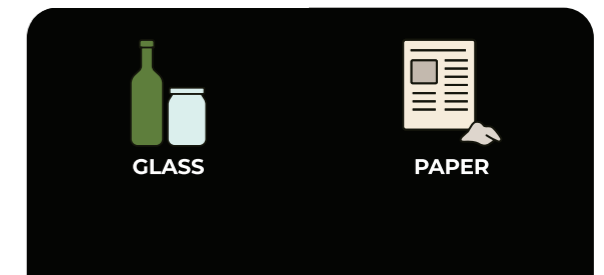

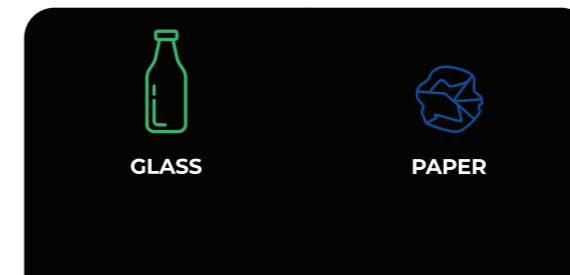

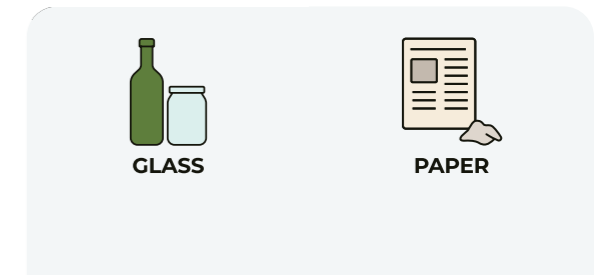

Backrest - Version 2

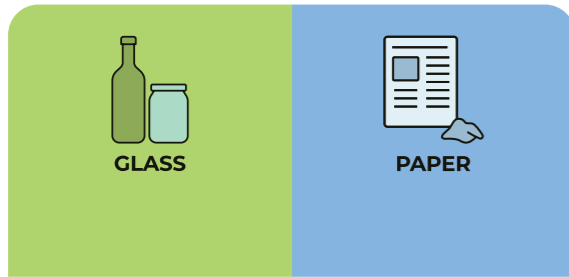

Backrest - Version 3

Backrest - Version 4

Backrest - Version 5

Custom backrest

The back panels are **available in all graphic versions**, for both two- and three-hole models, and are **perfectly compatible with both Cabinet Office finishes**: steel or wood.

This versatility ensures visual consistency and functionality, regardless of the selected configuration.

Discover the world of Saclò

The innovative continuous bag system

SACLÒ is a young and dynamic brand built around the **revolutionary continuous bag system for waste sorting**.

Born from the ecological expertise of Falcor, a leading company in the

compaction sector, SACLÒ **offers an innovative range of bins, cabinets, and waste containers** with a clear goal: helping customers save money while making waste separation easier for everyone.

The SACLÒ continuous bag system is as simple as it is effective. Unlike traditional single-bag bins, our containers feature a special “endless” bag.

No plastic waste, no unpleasant odors—just maximum hygiene and unmatched user convenience.

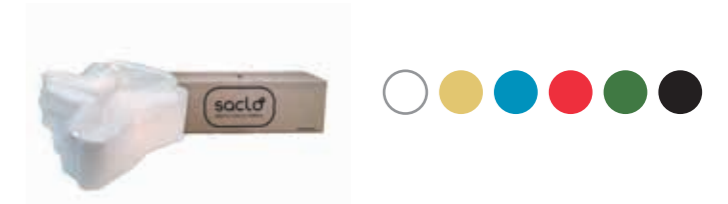

How does it work?

Save time and space—reduce plastic waste by up to 70%!

The Saclò system is based on a special **“endless”** bag—up to 110 meters long—that is unrolled, sealed, and cut each time waste needs to be removed.

Once one bag is sealed, the next **is instantly ready for use!**

Practical and cost-effective, they are available in 6 different colors to enhance waste sorting.

BAG REPLACEMENT ⌚ **25 sec.**
