

EPS Box Pro

**Access control at a new level,
revenue from tomorrow**

**The EPS Box Pro doesn't just control the barrier,
it turns parking into a digital service.**

**You get a system that works automatically,
can be controlled, scaled – and makes money
from day one.**

Smart access from the basics

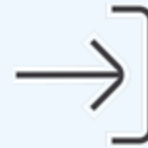

EPS Box Pro doesn't just control the barrier – it automates the entire access control process.

With a built-in LPR camera, the car's license plate number is the access card.

Access = license plate recognition

Eligible vehicles will enter automatically.
- No more peak time chaos at the gate.

No phone, No card, No call required
- the camera decides instantly.

Fully digital access management

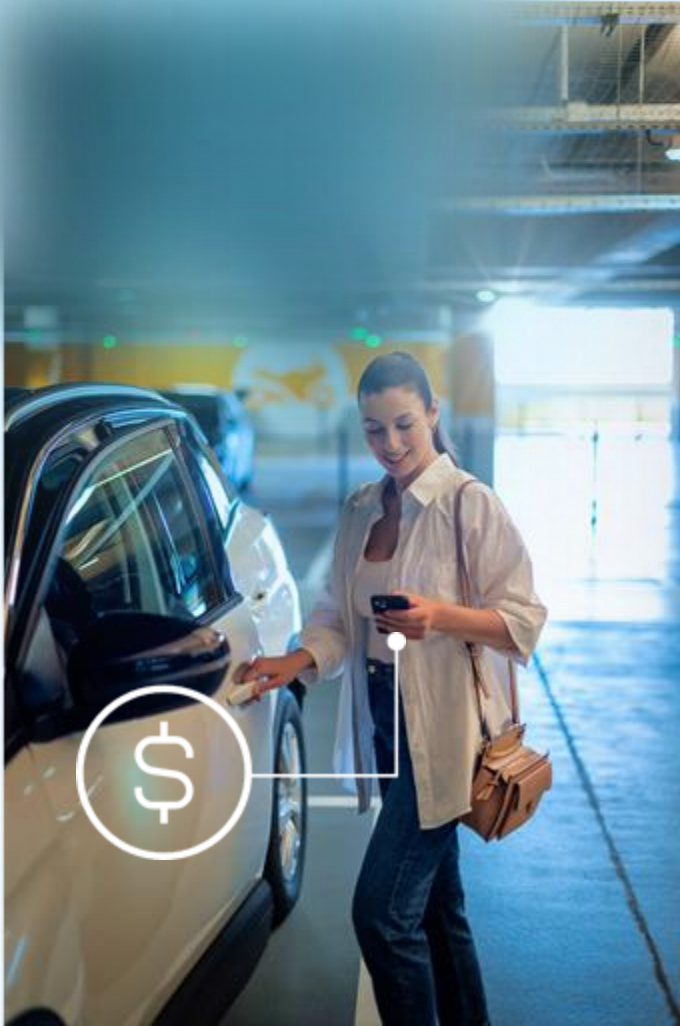

Season ticket/Permit holders, employees and guests can be treated with separate rules.

It can be modified and tracked in real time on a web interface.

Mobile payment, in-app

Guests and occasional users can also pay in the application.

After payment, the barrier will be opened automatically.

Guest parking and QR code invitation

Send a temporary authorization with a QR code or license plate pre-registration.

Ideal for office buildings, hotels or landlords.

Time-based and discounted parking

Free periods, employee or VIP discounts can also be managed.

Dynamic rates based on time of day, event or traffic.

Flexible expansion options

EPS Box Pro is an open, scalable platform:

Payment machines

Occupancy Indicators

LED guidance system

Credit card payment
at the exit

Multi-level discounts

"Parking within a parking lot"
zone management

Paperless, Device-free operation

No NFC cards or remote controls are required.

The license plate number or the phone is the key
– nothing else is needed.

Fail-safe operation

Internet issues? No problem.

Power outage? The system will open safely and then resync.

All events are also logged locally

Real-time control and statistics

Live map traffic and status monitoring.

All openings, closures and any event can be retrieved and exported.

Immediate revenue after installation

From the first day, it is possible to introduce guest parking and time-based fee collection.

The system can recoup the investment in a short time – often only by replacing, the cost of remote controls.

Stable background, professional team, software that has been working stably in different parts of the world for years

EPS Global has been providing parking solutions in many cities in several countries around the world since 2012.

Our continuous developments and proprietary software solutions make us one of the most dynamic players in the market.

Our software in 2024 processed

- >9 million parking incidents,
- >1 million license plate recognitions,
- >3 million barrier openings and
- >1 million payment transactions.

Intelligent parking management – what you imagine and beyond

What you can imagine today in the field of parking, the system already knows, and it knows already what you can't even imagine now.

What you cannot imagine yet, the system knows it, but if does not know it, then we will implement it on request.

Unlimited license plate numbers, users, locations
– you just use it, we provide the background.

EPS Box Pro

The system
that doesn't limit you
it empowers you..
