

# Z MOTION

The Future of Boating, Today.

Z Motion is a revolutionary transom lift that offers a new level of convenience and efficiency. Its innovative drive system is designed to be simpler, easier to maintain, and more affordable than traditional options.

Z-Motion's advanced technology ensures reliable performance and long-lasting durability, making it a valuable investment for boaters seeking a hassle-free and enjoyable transom lift.

## Introducing the Z-Motion System: A Paradigm Shift in Transom Lifts

After years of meticulous research and development, Ocean Group has engineered the Z-Motion system, a groundbreaking solution that addresses the longstanding challenges faced by boat owners worldwide. By carefully analyzing the feedback from our customers, we identified few issues: the use of incompatible materials in traditional transom lifts. Also, any maintenance would result in the removal of the lifts from the vessel. This often resulted in inconvenient and quite costly procedures.

To overcome these limitations, we created a lift system that could be maintained without ever needing removal from the vessel. Through innovative design and engineering, we have successfully achieved this goal, resulting in the revolutionary Z-Motion system, made completely from 316L stainless steel.

The Z-Motion system offers a range of models, catering to diverse boating needs. With safe working loads (SWL) ranging from 500 KG to 3000 KG and configurations from 3 to 7 steps, we have a solution to suit virtually any vessel. Custom sizes are available on request.

## Z-MOTION BENEFITS

What sets the Z-Motion system apart from other solutions on the market today?

- No steel actuators
- No oil unions
- No steel parts used in the construction
- No need to remove the lift from the boat for maintenance
- 700 cycles before any maintenance is needed
- Weight saving
- AC main and DC backup power
- Completely made from 316L stainless steel
- High-end composite bearings
- Innovative mechanical rotation system

*\*Z-Motion is patent-pending.*
