certified

↑ SUPER-CONCENTRATED FORMULAS ↓

### PREVENTIVE HYGIENE

**Our approach is based on a combination of two key elements:  
Biosurfactants and probiotics**

A probiotic cleanser ensures effective cleaning thanks to the synergistic action of biosurfactants and surfactants, while providing significant added value thanks to the presence of bacteria:

**Optimised cleaning frequency / Prevention of unpleasant odours at source / Digestion of organic matter / Increased user safety: 0 picto, 0 risk / Reduced environmental and social impact**

**CURATIVE + PREVENTIVE = OVERALL PERFORMANCE**
