

Extraordinary becomes ordinary.

FLASH!

ATTACHING TOOLS QUICKLY

The Jack cone lets you **deal with any need, whether foreseen or unforeseen**: the operator does not have to go back to the storeroom to get the tool required for extraordinary operations, nor even get ladders or stools to reach higher surfaces, as **he always has everything he needs** for any cleaning operation, planned or unplanned.

Jack allows you to quickly switch to high cleaning: the operator can **attach the same handle used with the dusting and washing frames to dusters and web brushes**.

Practical and intuitive, it doubles the possibilities of use thanks to its **handle** and **pole** versions.

THE ADVANTAGES OF JACK

- **Makes cleaning quicker and easier**, eliminating time wasted
- **It keeps the tool fixed during use**, preventing accidental release
- **Ensures maximum flexibility** when using the equipment

JACK LAMPO AND JACK ANGLED

Facilitates operations: switch from one tool to another with just a few clicks, reducing time and increasing safety.

Jack Lampo

code	notes	∅
00008546	for handles	23 mm
00008547	for poles	21 mm

Jack Angled joint

Glass —Line—

NEW

HOOK UP THE GLASS LINE SAFELY

Glass and mirrors no longer have to deal with stains and halos but can finally shine again, without effort or time wasted rubbing the surface again and again: the glass line is specially designed to **make polished surfaces shine, without waste of time and energy.**

Each tool is equipped with Lampo connection, ensuring **quick and safe attachment to poles and handles:** he operator doesn't have to use ladders or stools to clean high surfaces or fear accidental release during operations.

SAFETY

Extraordinary

EASY!

WOW

Time saving!

CONVENIENCE

becomes ordinary

NO ACCIDENTS!

Accessing high areas is a true challenge: in order to save time, operators use unsuitable tools to deal with extraordinary cleaning, with the risk of dangerous accidents. Moreover, traditional systems do not ensure safe attachment of the equipment, which could unhook, causing damage and injury.

Lampo System allows **quick and easy hooking of dusters and web brushes** to handles or poles, reaching high surfaces, while keeping them **firmly anchored** during use.

NO COMPLICATIONS!

Connecting handles and poles to the tools is a waste of time and effort, requiring complicated procedures that affect the efficiency of the cleaning service. In addition, emptying a bin in the bag holder without hitting the handles or opening doors and drawers without hitting the frames is not so easy.

The Lampo system allows **the same handle to be used with the whole range of dusters, web brushes and frames**, hooking them up in a flash: this optimises the cleaning process, removing from the trolley unnecessary obstacles that make different activities difficult. The innovative system is **practical, simple and intuitive**: the operator needs no training to learn how to use it.

NO LIMITS!

Lampo offers a **wide range of tools for cleaning surfaces and floors**: the operator can use the same handle to remove cobwebs with the brushes, dust high surfaces with the dusters and clean floors with the dusting and washing frames, customising the process according to the needs.

In addition, the Jack terminal cone allows **any tool with an Italian thread** to be used, increasing the range of uses offered by the system.

FLEXIBILITY

PLUG

HANGS FRAMES WITHOUT CONTACT

Thanks to the Plug device, the extraordinary becomes ordinary: the operator **can place the dusting and washing frames on the trolley** and switch to cleaning high surfaces with manual tools, avoiding direct hand contact with contaminated surfaces.

In addition, he does not have to constantly space out his tools to empty the bins in the bag holder, open the drawers, pull out the tray and access the baskets: the Plug allows **all the frames to be placed in their place while reducing the number of handles**, thus ensuring a trolley free of obstacles that slow down the various activities.

Applied to **Magic** trolleys, it allows you to have all frames available and ready for use without obscuring the operating areas of the trolley. If you also choose **Nickita trolleys with integrated Plug**, you benefit from compact workstations that can be equipped as required with floor dusting and washing systems and manual cleaning tools.

PLUG ADVANTAGES

- **Eliminates contact with dirt**, ensuring maximum hygiene
- **Eliminate the number of handles** hindering operation of the trolley
- **Allows maximum equipping** of even the most compact trolley

PLUG LAMPO

Optimises performance: maximises the efficiency of your cleaning service by removing obstacles that slow down operations and waste time.
