

The 316 L S/S Bar

Qbe Steel bars come with an inner core of Duralene, a very resistant PVC.

Compared to a solid steel bar, it is much lighter and more flexible.

Compared to a half moon bar, it is more resistant and much more aesthetic.

It can be easily fitted to most boat curves using the boat itself as a template.

Choose your size !

The 3 m long Stainless Steel bar is available in 3 different sizes:

25 mm

35 mm

50 mm

The Dual Use

Qbe Steel has been conceived for being an elegant and protective alternative for boats that come with a sandwich junctions between deck and hull.

Nevertheless, thanks to its specific design, it is easily adaptable to any flat surface as well.

This dual use allows it to be installed on any type of boat.

The Materials

An extremely innovative product that combines 2 different materials:

- Top of the notch PVC for marine use. This flexible structure allows it to follow the shape of the boat
- 316 L Stainless Steel bar that grants elegance and protection to any vessel.
