

## **Nilfisk celebrates 120 years of improving quality of life at Interclean Amsterdam**

We are excited to celebrate our 120th anniversary with the global cleaning community at Interclean Amsterdam. If you are planning to attend the show, we would love to welcome you to our stand.

For more than a century, Nilfisk's focus has been simple: developing cleaning solutions that help you create healthier, safer, and more productive environments. This year at Interclean, you will be able to explore some of our latest innovations in cleaning technology, including a new range of commercial vacuum cleaners designed to deliver powerful performance, improved ergonomics, and greater energy efficiency. The new range reflects the same principles that have guided Nilfisk since the early days of the company, when our founder, P.A. Fisker, introduced Europe's first electric vacuum cleaner in 1910, transforming how cleaning could be done.

Visitors to the Nilfisk stand will also be able to discover our newest floorcare machines, intelligent robotic cleaning solutions, durable pressure washers, and high-performance equipment designed for demanding commercial and industrial environments. Across our portfolio, the focus remains the same: helping you achieve consistent cleaning results while optimizing resources such as energy, water, and labor.

You can also learn more about Nilfisk's service solutions, designed to keep your equipment running smoothly so you can focus on keeping your business running efficiently.

We look forward to meeting customers, partners, and industry peers at Interclean Amsterdam, Hall 7 and sharing how Nilfisk continues to advance cleaning performance after 120 years.
