ABOUT POLYGRIP DECKING STRIPS

Experience safety excellence with GripFactory PolyGrip Decking Strips – a superior, anti-slip solution exceeding international safety standards. Made from glassfiber reinforced polyester with an aluminiumoxide grain, these strips are not only robust and resilient but also lightweight. Providing a 10-year warranty, they offer a lasting solution, enhancing winter safety on wooden decks by preventing ice and snow adherence. Request samples now to witness the superior quality firsthand.

FEATURES AND ADVANTAGES

Durability

- Built to withstand impact for lasting performance.

Ease of Use

- Easy to assemble, reducing installation costs;
- Maintenance free.

Safety

- Non-conductive, eliminating electrical and thermal hazards;
- Virtually indestructible and splinter- / crack-free;
- Exceeding international (fire) safety standards.

Warranty

- 120 months factory guarantee on wear and color.

Strength

- PolyGrip is up to seven times stronger than mild steel on a weight-for-weight basis.

R-VALUE

PolyGrip Decking Strips proudly carry an R13 rating, ensuring outstanding slip resistance. Ideal for high-risk environments like industrial settings or areas with substantial water exposure, these strips deliver effective anti-slip performance where it matters most.

R13

COLOURED SCREWS

Elevate your project with our coloured top countersunk screws. Versatile and stainless steel, they effortlessly complement your stair and floor products for a polished finish.
