

Emate Reverse osmosis systems

# 100G Small Size

Under-sink Reverse osmosis water purifier

- ◎ Two cartridges and three filters, PP/carbon composite cartridge + RO reverse osmosis filtration;
- ◎ Horizontal layout design, first step twist, second step pull, easy to change the filter;
- ◎ Silent booster pump, high water supply efficiency, stable water, less noise;
- ◎ Intelligent core replacement reminder, machine status, at a glance;
- ◎ Optional filter life expiration lock function, NFC activation restart after core change.

## Product parameters

|                              |  |                        |               |
|------------------------------|--|------------------------|---------------|
| Applicable water quality     | Municipal water  | Working Pressure       | 0.4~0.6MPa    |
| Applicable water pressure    | 0.1~0.35MPa  | Rated power            | 28W           |
| Applicable water temperature | 5~38°C   | Daily water production | 100G          |
| Filtration System            | RO+PAC   | Product size           | 110×350×310mm |
| Water quality                | In line with the Ministry of Health "living drinking water quality processor health safety and functional evaluation Specification a reverse osmosis treatment device" requirements. |                        |               |
