

Press Release

New Profurl product - displayed at METSTRADE 2025 HALL 5 - stand 441 - 18th to 20th November

NEXeLITE2.5

For immediate release

Profurl once again expands its range of NEXeLITE motorized flying sail furlers with the launch of the NEXeLITE 2.5, a model designed to deliver the performance and reliability of large systems in a more compact format.

This new size will be unveiled to marine industry professionals at the **METSTRADE** show, taking place from **November 18 to 20, 2025**.

Available in 12 V, the **NEXeLITE 2.5** can furl flying sails up to 90 m². It is aimed at owners of **sailing boats under 40 feet** who are looking for a powerful, discreet, and easy-to-integrate motorized system.

With this new model, Profurl completes its NEXeLITE range, already including the 4.0 (for sails up to 140 m²) and the 6.5 (up to 250 m²).

This new addition continues a proven legacy of expertise: for several years, Profurl has offered motorized headsail furlers (NDE2 range) and motorized flying sail furlers (NEXe range), which have won over demanding sailors seeking simplicity and reliability at sea.

Specifications

- Sail area: up to 90 m²
- Multi-engine technology
- Power: 400 W
- Power supply: 12 V
