## ABOUT POLYGRIP MINI-STRIPS

Experience safety excellence with GripFactory PolyGrip Mini-Strips – a superior, anti-slip solution exceeding international safety standards. Made from glassfiber reinforced polyester with an aluminum grain, these Mini-Strips are not only robust and resilient but also lightweight. They offer a lasting solution, enhancing winter safety on wooden decks by preventing ice and snow adherence. Request samples now to witness the superior quality firsthand.

### FEATURES AND ADVANTAGES

#### Durability

- Built to withstand impact for lasting performance.

#### Ease of Use

- Easy to assemble, reducing installation costs;
- Maintenance free.

#### Safety

- Non-conductive, eliminating electrical and thermal hazards;
- Virtually indestructible and splinter- / crack-free;
- Exceeding international (fire) safety standards.

#### Strength

- PolyGrip is up to seven times stronger than steel on a weight-for-weight basis.

### R-VALUE

PolyGrip Mini-Strips proudly carry an R13 rating, ensuring outstanding slip resistance. Ideal for high-risk environments like industrial settings or areas with substantial water exposure, these strips deliver effective anti-slip performance where it matters most.

**R13**
