

STRUCTURAL MULTI-PURPOSE EPOXY RESIN

Ideal for repairs, bonding, and
structural laminations

EpoGryps MP

**FLUID - FAST CURING
HIGH MECHANICAL STRENGTH**

Two-component (A+B) fluid epoxy
resin with fast curing and high
adhesion.

Mix ratio 2:1 by weight

Packaging (A+B): 0.15 Kg | 0.3 Kg | 0.75 Kg | 1.5 Kg |
| 3 Kg | 6 Kg | 18 Kg

EpoGryps MP variants:

MP SLOW

MP EXTRA SLOW

Slow and extra-
slow curing
versions.

MP UV

UV-filter
version for
carbon-look
finishes.

MP TH

Medium-
viscosity, pre-
thickened
version.

CREATE YOUR OWN VARIANT WITH BYGRYPS ADDITIVES

Additivo ADDENSANTE

Ultra-fine white powder used to thicken resins to a **spreadable consistency**. Ideal for bonding and filling.

Packaging: 0.5 L | 1 L | 5 L

Additivo ADDENSANTE EVO

Fine gray powder that produces **lightweight fillers**, easy to apply and sand. Ideal for treating large surfaces.

Packaging: 0.5 L | 1 L | 5 L

Additivo MICROFIBRE

Ultra-fine E-glass filament powder for creating **high-strength structural fillers**. Perfect for repairing fiberglass, wood, and other damaged materials.

Packaging: 0.5 L | 1 L | 5 L

Additivo ANTISCIVOLO 01-03

Fine beige quartz powder (0.1–0.3 mm) to be added to the final coat of resin to create a **non-slip surface**.

Packaging: 0.5 L
