

DIGITALCRAFT

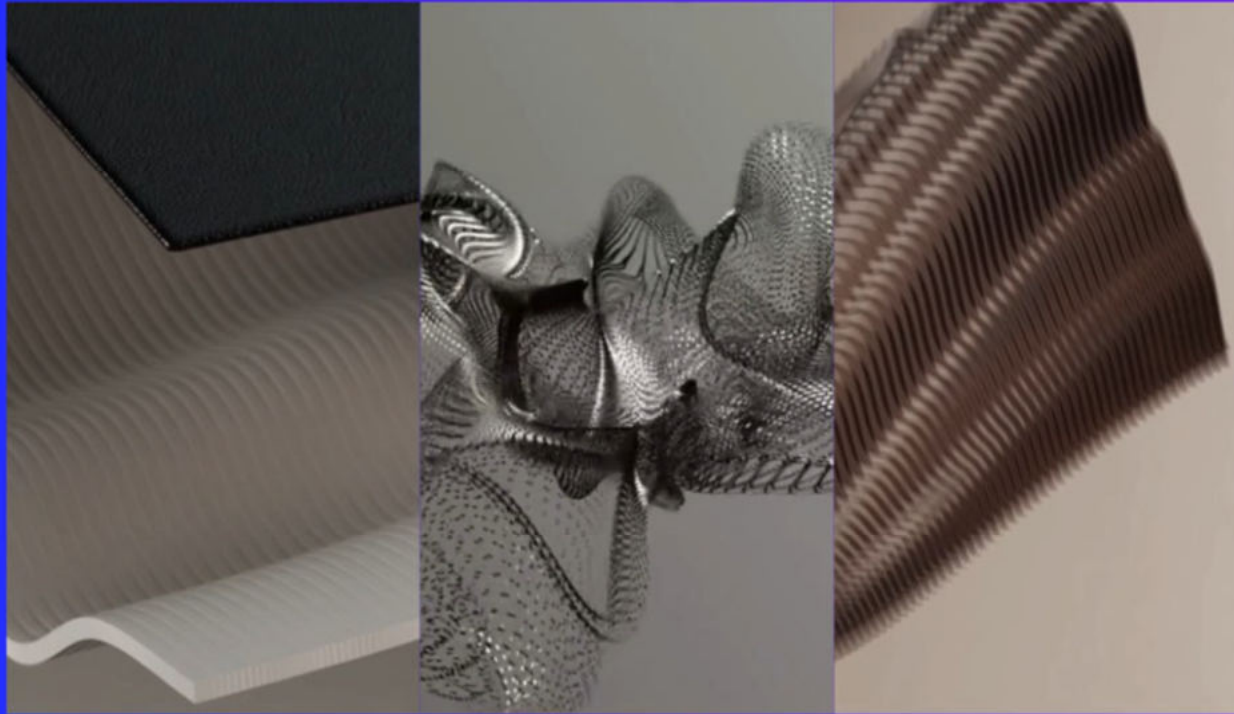

With BÖWER DigitalCraft, we are opening a new dimension in interior design. Using 3D printing and other digital production methods, we enable you to realise complex geometries, architectural elements and surfaces – tailor-made, with the highest precision and almost limitless design freedom.

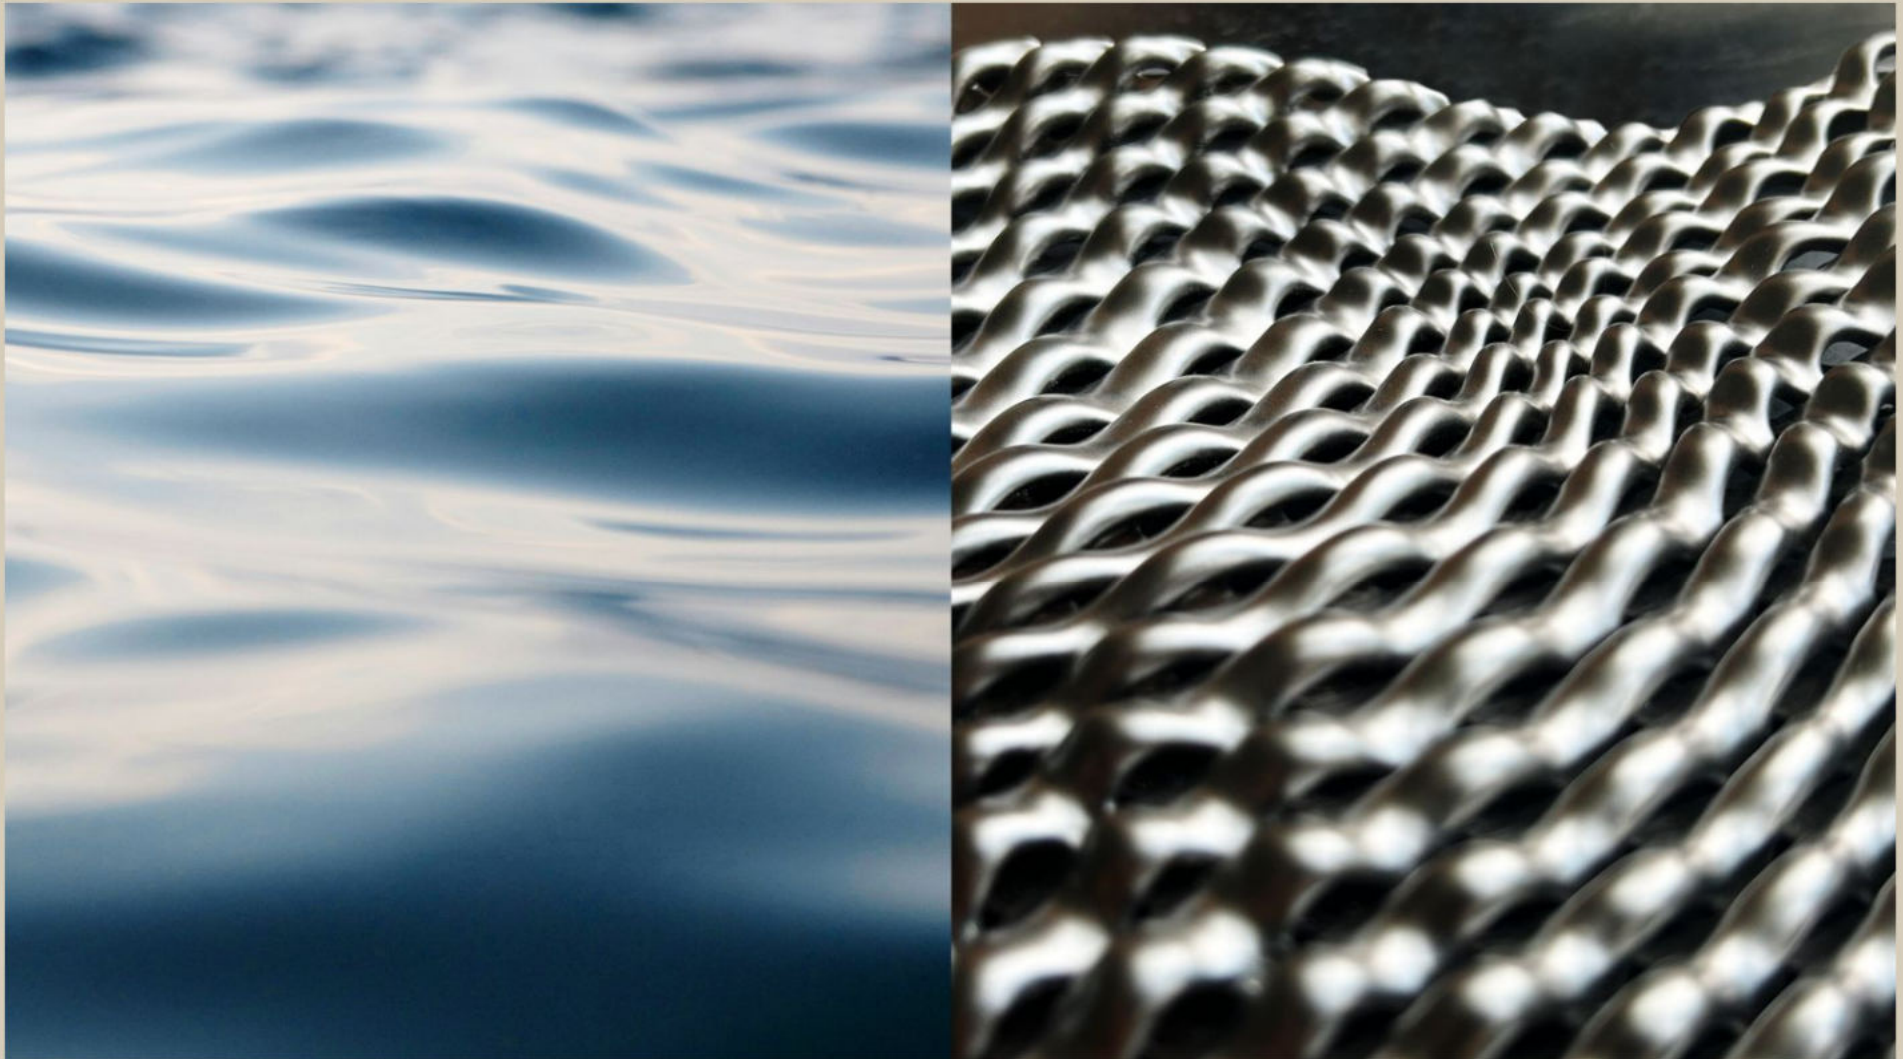

A new generation of craftsmanship

Pushing the boundaries of what is possible has always been our driving force. Our foundation is traditional manufacturing, which we continue to develop and expand through new materials, technologies and processes. This is how we arrive at extraordinary solutions that enable us to realise visions of the highest individuality.

A COLLABORATION WITH NIEDERSACHSEN ADDITIV

DIGITAL**CRAFT**

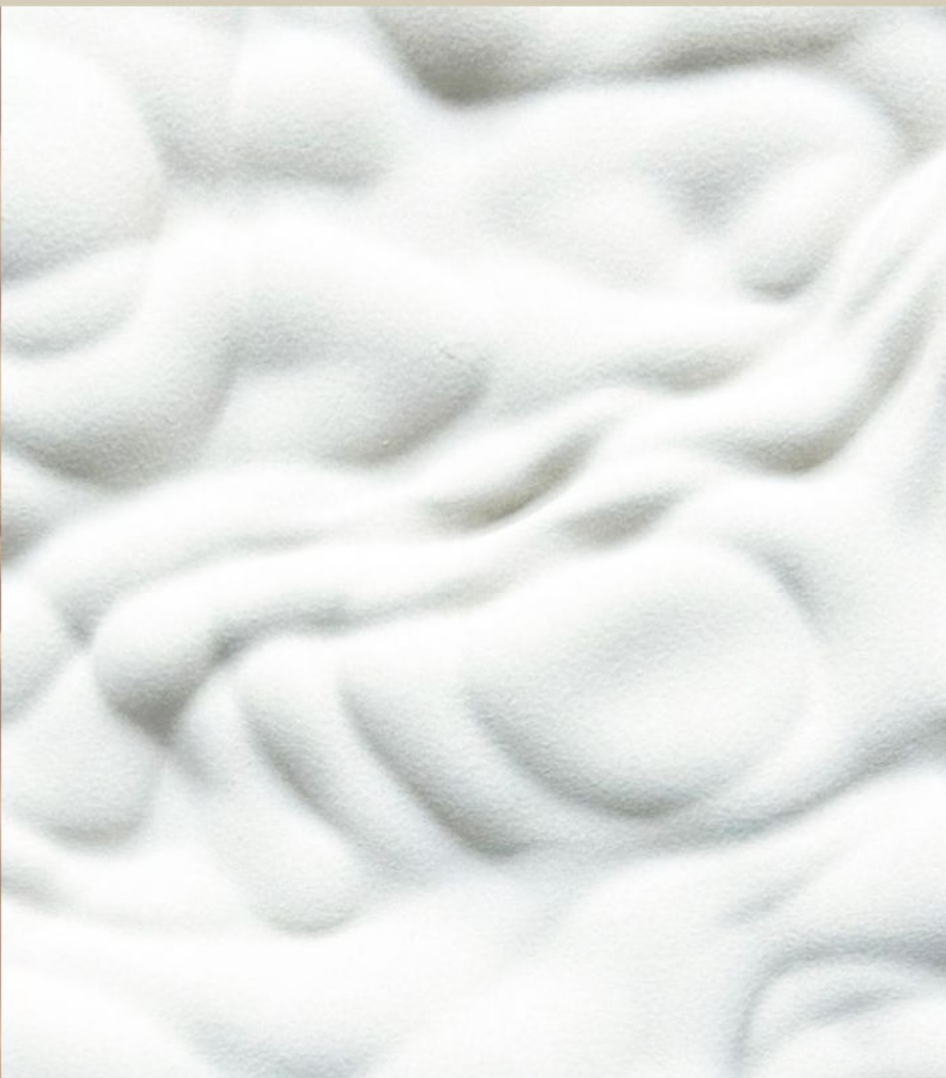

Wavy Grid
