

## **Nottrot's human touch in a world of technology**

Our way of work, forming the heartbeat of our process

### **Everything in-house: quality at every step**

We design, engineer, test, develop, assemble and repair all from our in-house facility.

### **Tailored technology**

We have developed our own NCOM board, dimming knob, LED driver, and written proprietary software/firmware to ensure every component works seamlessly together.

This complete control guarantees that our monitors meet the highest standards of reliability and performance, reinforced by:

### **Firm quality control, handcrafted precision**

We are dedicated to ensuring that when our products leave the factory, they don't come back.

### **Extended lifespan and continued support**

Nottrot displays are built for longevity, with essential components kept in stock even after the official product lifespan.

### **Fast and reliable repairs**

We aim to complete repairs within three working days, minimizing your downtime.

This authentic, human-driven approach to manufacturing is key to Nottrot's reputation for reliability, further enhanced by:

### **Personal service, no automated call menu**

We value direct communication with our customers to understand each use case. For us, technology is human centered, from product to service.

### **Modular production: tailored to your needs**

Our modular production system allows you to configure your display(s) based on specific requirements rather than a preset package.

### **Built to order with fast lead times**

We build each product to order, ensuring that it's tailored to your exact specifications. All while ensuring a timely delivery.

### **Custom projects: made for you**

In addition to our high-quality standard monitors, our customers utilize our expertise to create tailored solutions that address their unique industry needs when required.

### **Innovation in every detail**

From our Varicap touch button for quick video input selection to our N-Control device for advanced dimming and management.

### **Required Certification(s)**

Our monitors are type-approved by DNV, a certification commonly required in maritime environments.
