OnBoard

OnBoard System

An advanced application designed to control and monitor yacht systems, offering seamless compatibility with devices from top marine manufacturers.

Modules

Six different types of innovative modules that integrate control functions and sensors, supporting both analog and digital inputs and outputs, offering a versatile and comprehensive solution for modern yachting needs.

Displays

OnBoard displays available in sizes of 7", 11.6", 15.6", 18.5", and 21.5" features a Full HD multi touch screen.

Expander

Main Control Unit that manages OnBoard modules and allows you to display and control the OnBoard app on any navigation plotter, tablet, phone, or PC.

The system offers comprehensive control and monitoring of yacht functionalities, including water systems, lighting, ventilation, energy management, alarm systems, and integration with most marine equipment manufacturers.

Our solutions include advanced features like maps, weather updates, and remote control via OnBoard. Real-time diagnostics ensure safety and reliability, with manual overrides for critical functions in emergencies.
