## ABOUT POLYGRIP PREMIUM PLATES

Experience safety excellence with GripFactory PolyGrip Premium Plates – a superior, handcrafted anti-slip solution exceeding international safety standards. Made from glassfiber reinforced polyester with an aluminumoxide grain, these plates are not only robust and resilient but also lightweight. Providing a 15-year warranty, they offer a lasting solution for hazardous surfaces, enhancing winter safety on concrete floors, ramps, and walkways by preventing ice and snow adherence. Request samples now to witness the superior quality firsthand.

### FEATURES AND ADVANTAGES

#### Durability

- Built to withstand impact for lasting performance.

#### Versatility

- Suitable for all surfaces, indoor and outdoor.

#### Ease of Use

- Easy to assemble, reducing installation costs;
- Maintenance free.

#### Safety

- Non-conductive, eliminating electrical and thermal hazards;
- Virtually indestructible and splinter- / crack-free;
- Exceeding international (fire) safety standards.

#### Warranty

- 180 months factory guarantee on wear and color.

#### Strength

- PolyGrip is up to seven times stronger than mild steel on a weight-for-weight basis.

### R-VALUE

PolyGrip Premium Plates proudly carry an R13 rating, ensuring outstanding slip resistance. Ideal for high-risk environments like industrial settings or areas with substantial water exposure, these plates deliver effective anti-slip performance where it matters most.

**R13**

### COLOURS

Available in all RAL colours

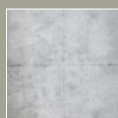

## MATERIAL PROPERTIES

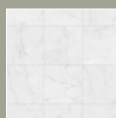

Subject	Thermal expansion	Thermal conduction	Tension	Flexibility	Size (max)*	Thickness
Value	$0 \times 10^{-6} \text{ } ^\circ\text{C}$	0.2 w/m <sup>2</sup> K	123 MPa	193 MPa	1250 x 3000 mm	3 - 10 mm

\*Customized sizes are available on request

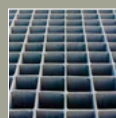

## SUITABLE SURFACES

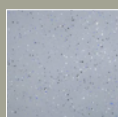

Concrete

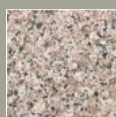

Ceramic Tiles

Steel Grids

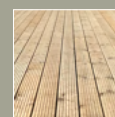

Epoxy

Marble | Granite

Tear Plate

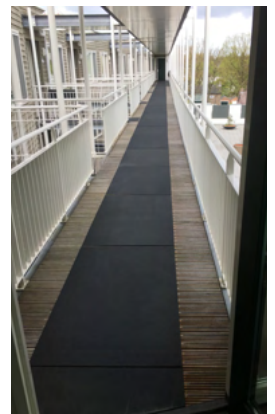

Wood

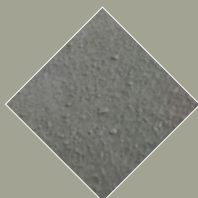

## REFERENCES

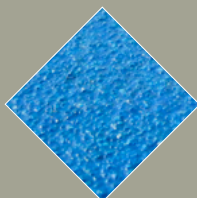

PolyGrip Premium Plates offer versatile application, seamlessly fitting onto an array of surfaces. From concrete, wood and steel (fire) stairs, galleries, loading platforms, bridges, bankrai / hardwood ramps, uneven surfaces, offshore and underground applications, work platforms, steel grids and much more...
