The Tenderlift® platform, the perfect solution for tender lifting and accessibility

The Tenderlift® platform has become a **reference** on cruising catamarans. It provides an **additional living space** to enjoy lifetime close to the sea level. The platform can be positioned at any level. It can serve as a **cockpit extension, an additional deck, or a swimming platform**.

The Tenderlift® platform is the **perfect solution** to lift tenders easily and safely. Extremely simple, our patented solution provides **easy access to the tender** and the boat, guaranteeing safety and comfort.

Based on hydraulic energy, our systems are perfectly compatible with the hostility of the marine environment. Our systems require **minimal maintenance**. They have equipped more than **1500 catamarans** all over the world for more than 20 years.

PLEASURE

SPACE

SIMPLICITY

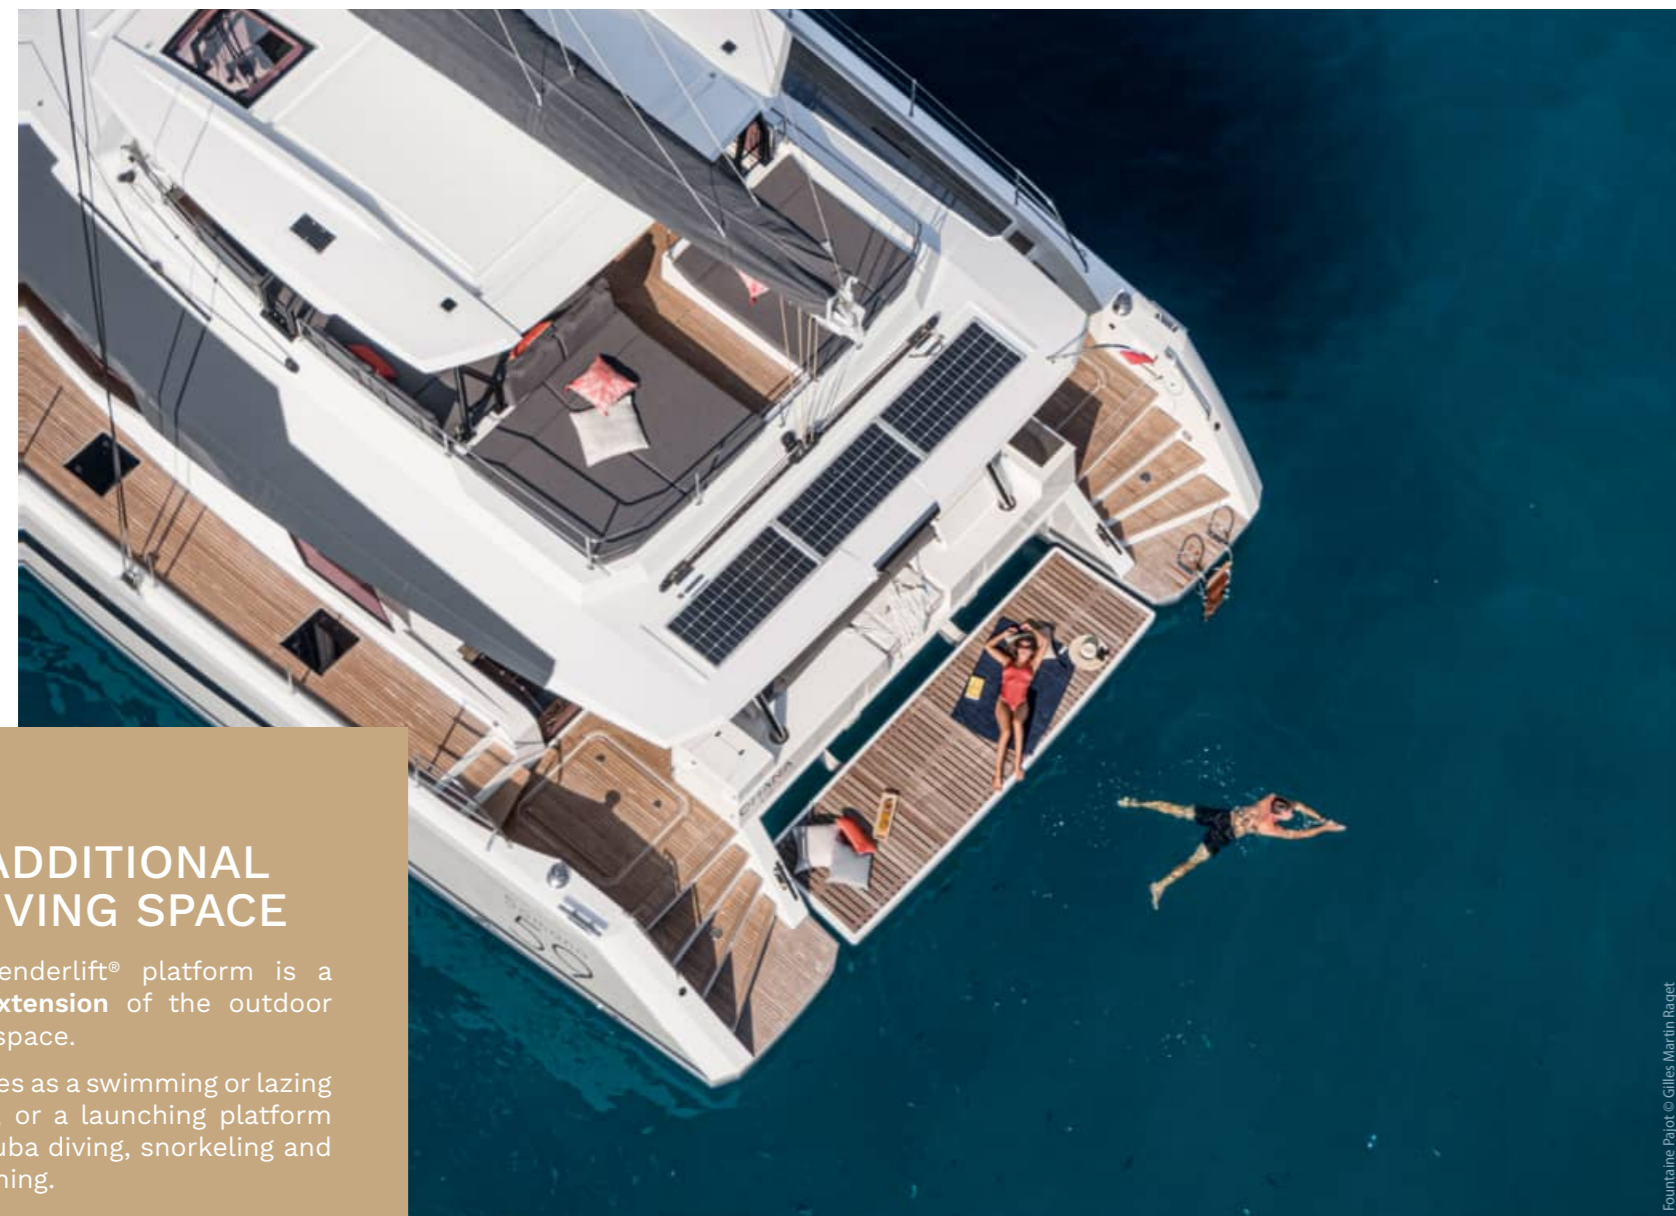

© Gunboat

ADDITIONAL LIVING SPACE

The Tenderlift® platform is a **real extension** of the outdoor living space.

It serves as a swimming or lazing beach, or a launching platform for scuba diving, snorkeling and swimming.

LIFTING SOLUTION

The Tenderlift® platform is the **ideal solution** to lift or launch your tender.

It can be handled by a **single person** with the help of a remote control.

The Tenderlift® platform can be customised for **all types of dinghy** brands and models.

ENJOY THE SEA PROXIMITY!

ACCESSIBILITY AND SECURITY

The Tenderlift® platform is also very helpful to embark on the tender in a **simple and secure way**.

It provides **easy access** to the water or the different levels (sterns, cockpit, dock...). It can also **assist people** to get out of the water.

Launching various equipment (seabobs, diving equipment, jetskis...w) or temporarily storing bulky toys such as buoys, paddles, inflatable platform... is now possible.

OPTIMIZE YOUR LEISURE TIME AT SEA!

RETURN ON INVESTMENT

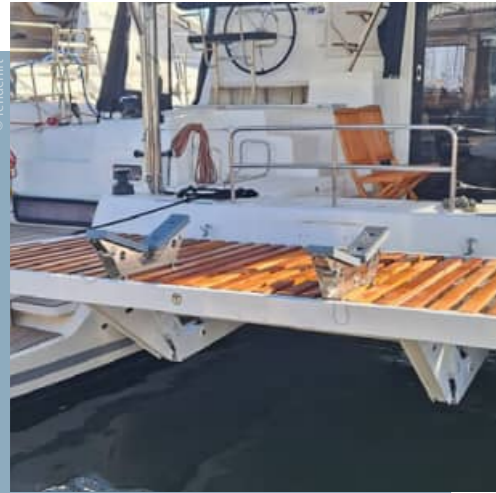

The Tenderlift® platform brings a **real added value** to the boat in case of resale or rental.

Statistics show that boats with platforms are rented faster and over a greater number of weeks than boats without platforms.

According to the feedback from our customers, **the purchase of a platform is profitable** after 3-4 weeks of rental.

Our Tenderlift® platform categories

250

450

800

- The choice of your platform depends on:
- the lifting capacity
 - the weight and size of the tender
 - the size of the boat to be equipped
 - the design and the features (gangway, lights, colour...)

TENDERLIFT® PLATFORM CATEGORIES

MODEL	LIFTING CAPACITY*	DINGHY WEIGHT	PLATFORM WEIGHT	TYPICAL BOAT LENGHT (in feet)				
				40"	50"	60"	70"	80"
250	250 kg	150 kg	±150 kg	█				
450	450 kg	350 kg	±200 kg		█			
600	600 kg	550 kg	±300 kg			█		
800	800 kg	700 kg	±350 kg				█	
1000	1000 kg	900 kg	±450 kg					█
1500	1500 kg	1200 kg	±600 kg					

* Due to the dinghy center of gravity offset, the total dinghy weight is lower than the lifting capacity in the middle.

We produce tailor-made systems

For more than 20 years, we have designed **innovative, compact and high-performance** mechanical and hydraulic solutions. We work with both **individual clients and boat manufacturers**. Our solutions are plug and play and do not require specific boat design modification.

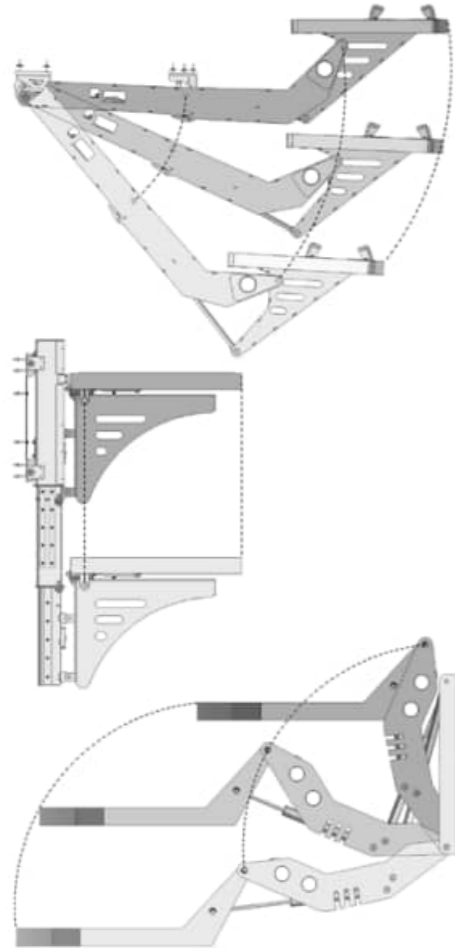

At our premises in Canet-en-Roussillon, our team of passionate engineers works on a daily basis to develop platforms with customers. Committed to a constant improvement of our solutions, we do our utmost to design **light and perfectly safe products**. We combine FEA structural analysis, technological materials and a strong quality control process.

We look forward to be working with you!

Our solutions

We design and engineer custom-made solutions adaptable to all types of boats - multihulls or monohulls, motor yachts or sailing vessels. Every system is developed in close collaboration with shipyard architects to ensure seamless integration. Our mission? To deliver lightweight, high-performance systems that elevate both functionality and aesthetics on board.

Classic Tenderlift, our signature kinematic

- Operates using a strap system
- Designed to be lightweight, minimising the impact on the hull
- Specifically designed for sailing catamarans, but also available for motorboats

VerticalLift

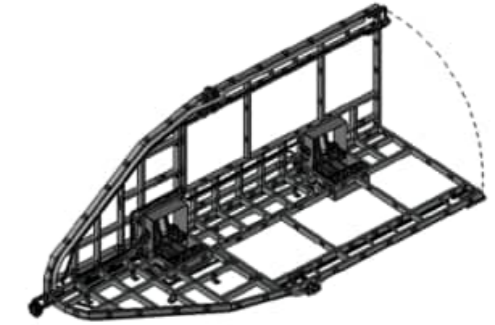

- Compatible with both catamarans and monohulls
- Designed to be lightweight, minimising the impact on the hull
- Remains close to the hull while in motion

Deformable Parallelogram

- Compatible with monohulls
- Suitable for motorboats
- Durable solution designed for high lifting capacities with low impact on the hull

Side Doors / Hydraulic Hinges

From side doors to terraces, balconies, and garage doors, Tenderlift can design and build any modular system for your boat.

Davits

- **Hydraulic Davits:** Powered by a hydraulic unit, these davits can be installed on any type of boat.
- **Hybrid Davits:** Electric-powered for convenience, these davits lift your tender using the boat's winch system.
- **Manual Davits:** Designed for manual use, this system operates with a single winch mounted on the side of the boat, making it easy for one person to lift the load without effort.

STANDARD EQUIPMENT

- Iroko planking 60/30
- Removable dinghy supports
- IP69 Remote controls
- 316L Positionny balcony
- Hydraulic unit, hoses and cylinders
- Structural reinforcements

OPTIONAL EQUIPMENT

- Choice of the type of material, wood species, lantage...
- Underwater light RGB and dimable
- Specific RAL colour
- Foldable wings
- Sliding boarding gangway
- Pop-up dinghy supports
- Dinghy safety lashing straps
- Maintenance pack & hydraulic manual pump

Installation of a Tenderlift® platform

Our products are **simple and easy to install**. For all our clients, particulars or industrials, we provide a complete installation kit, including the structural backing plates, the hydraulic hoses and fittings, the stainless-steel screws and nuts, etc...

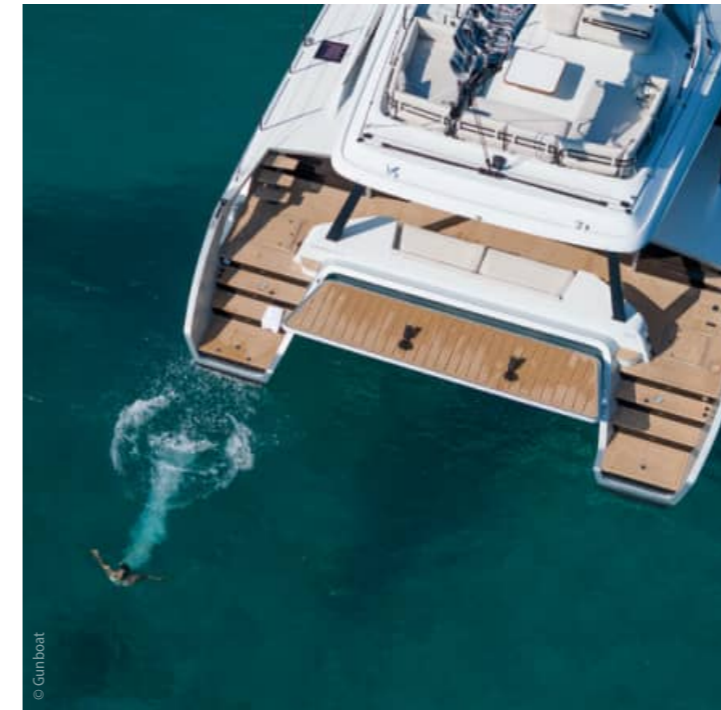

Our platforms can be installed either by the boat manufacturers itself or by our network of distributors. Installation only requires minimal structural adjustment on the boat thanks to the low structural constraints imposed by our system.

Our warranties

- ✓ Two-years guarantee on the structural parts
- ✓ One-year warranty for all wear parts (thread pads, hydraulic seals, textile components, hoses, friction components...)
- ✓ One-year warranty for paintwork and wood

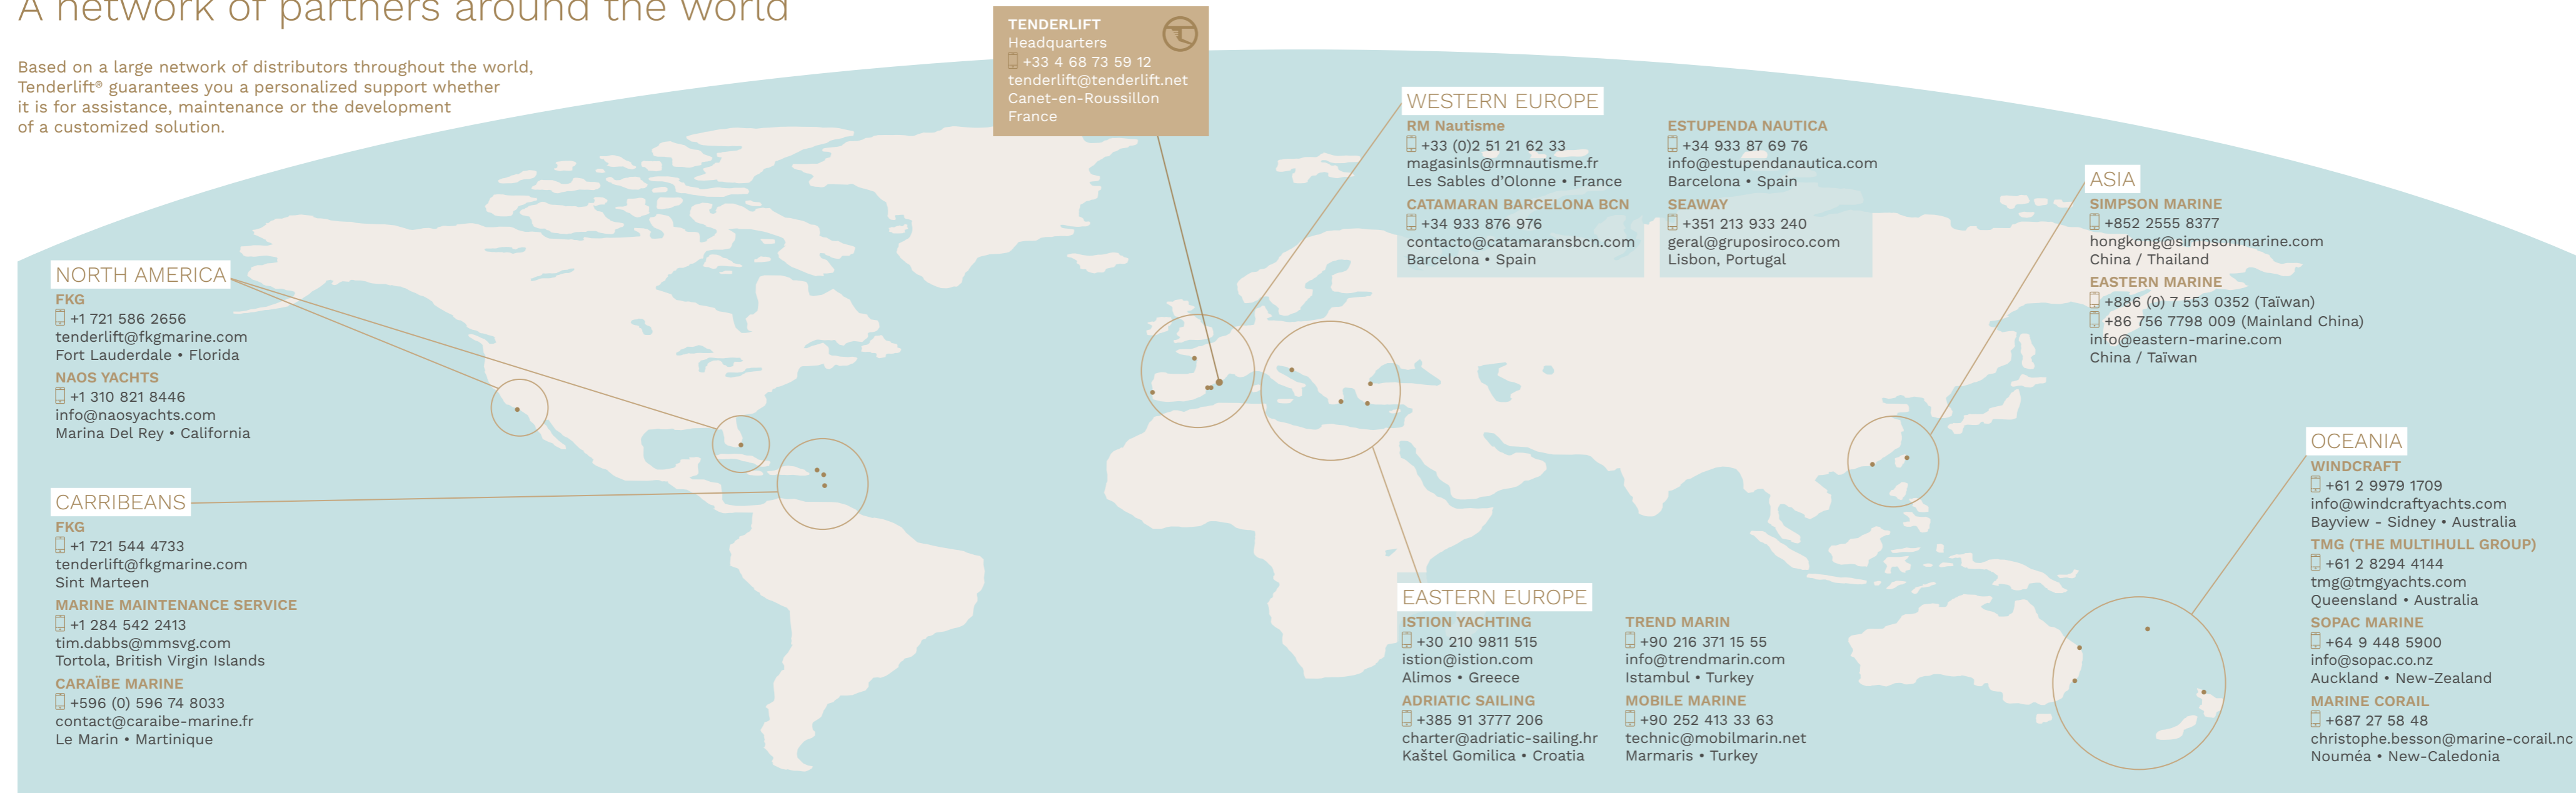

A VERY LOW MAINTENANCE FOR YOUR TENDERLIFT®!

- ✓ Due to hydraulic energy, our systems require very low maintenance.
- ✓ We recommend changing lifting belts every 3 years and to change oil every year.
- ✓ As any external equipment, it requires to be cleaned regularly and be taken care of.

Maintenance

A network of partners around the world

Based on a large network of distributors throughout the world, Tenderlift® guarantees you a personalized support whether it is for assistance, maintenance or the development of a customized solution.

Who are we?

Tenderlift® is a passionate team of 60 people designing and manufacturing complex and innovative solutions for the boating industry in the south of France.
Each member of our team plays a key role in the quality of our products and the satisfaction of our customers!

We have more than 20 years of aluminium welding experience in the boating industry

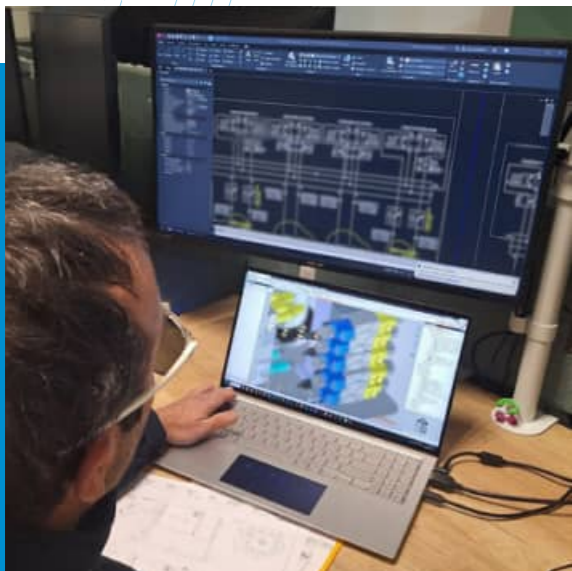

Our team consists of hydraulic specialists, carpenters, installers, assemblers, welders, engineers & technicians, assistants, logisticians, planners, managers...

You are welcome to visit us!

Did you know?

Hydraunautic, customized automated powerpacks

Within Tenderlift Group, Hydraunautic is an expert in custom hydraulic engineering for the marine industry. From design to integration, it develops high-precision hydraulic systems and control interfaces tailored to the requirements of shipyards and vessel owners.

Technical expertise for enhanced performance

Carbotrim® cylinders

The Carbotrim® hydraulic cylinders ensure speed and safety in manoeuvres. They are the result of several years of development in association with research laboratories and universities specialized in composites.

On-board hydraulic systems

Our engineers have more than 20 years of experience in the boating industry. They design hydraulic solutions combining compressed air, argon and flow control to optimize the speed of adjustments or sheet drops.

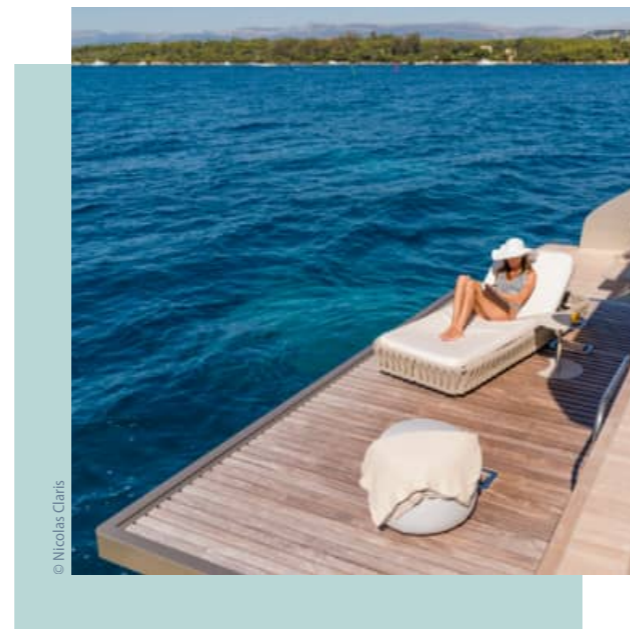

Lightweight products for the marine industry

Our hydraulic products are the lightest on the market while maintaining the same power. They are particularly adapted to racing boats or super yachts looking for a significant weight saving vs. power ratio.

Tenderlift Group, a specialist in hydraulic platforms for yachts and catamarans

Tenderlift Group designs **innovative solutions that combine performance, safety, and design**. With its expertise in hydraulics and marine engineering, the group supports shipyards and owners in optimizing their onboard equipment.
